

Lab 10 — Campaign 2: Social Media Posts (Demo)

Multi AI Agents Workflow for Content Creation (Claude Edition) · Day 2 · Use Claude Code

USE: CLAUDE CODE — Code mode (the `</>` button) in the Claude desktop app, in your horizon-studio folder

Course: Multi AI Agents Workflow for Content Creation (Claude Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 40 minutes · slides 115–120

Surface: Claude Code (agent team) → LinkedIn, Facebook

Features: the publisher kit and its hook · an agent team: creator, designer, Lead · teammates message each other · human approval → post

Copy the prompts: <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/claude/#lab-10> — click **Copy** next to each prompt, then paste it into the chat.

The story so far

Week 1 of the campaign starts Monday. As a demo, one LinkedIn post and one Facebook post, each with a visual — and Rachel's one rule: nothing goes out unless a person approved that exact version.

Your goal

A demo of Week 1: one LinkedIn and one Facebook post, each with a visual. Copy and design must agree, the Lead must check every claim — and only a person can approve.

You'll build

two posts with images, reviewed, approved by you and posted (or dry-run) — shown as artifacts, with a Word copy of each

What is in this folder

.md or .pdf? A .md file (Markdown) is plain text that Claude reads. Every .md here has a .pdf twin with the same name — open the PDF to read it yourself.

- assets/social-brief.md
- assets/publisher-kit/
- assets/publishing-spec.md
- assets/approvals-format.csv
- assets/connect-accounts.md
- assets/env.example
- assets/sample-calendar.csv
- solution/ — reference files from the verified build (each .md with its .pdf)

- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — Left sidebar: click + next to horizon-studio. Click the session title at the top and rename it "Lab 10". Run all of this lab's prompts in it.
2. **The gate is on** — Your studio folder came with the approval gate and agent teams switched on — nothing to install.
3. **Test the gate** — Ask Claude to approve a post itself. The gate must block it.
4. **Start the team** — Copy and paste Prompt A. Teammates appear in the panel; ↑ ↓ and Enter open one; Ctrl+T shows the task list.
5. **Watch them talk** — The designer asks the creator for each post's hook; the Lead sends fixes back.
6. **Approve as a person** — Review in the artifact (or open the review email and click its link). Click Approve or Request changes, then paste the copied line into the chat.
7. **Publish** — After you have approved the posts, copy and paste Prompt B. A dry run first; real posting only if your accounts are connected.

The prompts

PROMPT A — Claude Code: the social team

Create an agent team for Week 1 social from data/social-brief.md and strategy/calendar.csv. Spawn two teammates using the agent types content-creator and creative-designer; you are the Lead.

- content-creator: 1 LinkedIn + 1 Facebook post with linkedin-post, facebook-post and copywriting, one file each in content/social/week-01/, with the frontmatter in data/publishing-spec.md.
- creative-designer: one image per post (a rendered card in Horizon colours) with alt text; message the creator for each post's hook before designing.
- You: fact-check and fin-compliance on every post; message fixes to the teammate who owns it.

Before you start, ask me how I will review: in the artifact, or by email (then ask for the approver's address). When a post passes, submit it for review with scripts/submit.mjs. Publish the two posts as an artifact, each as it will look in the feed, with its image and alt text; under each post put an Approve button and a Request changes box that copy the exact line for me to paste in the chat. If I chose email, send ONE review email to the approver with Gmail: the artifact link and what passed the checks. Send nothing else; publish nothing.

Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: publish

For every Week 1 post approved in review/approvals.csv, do a dry run of publishing it (scripts/publish.mjs) and publish each request as an artifact: one card per post with channel, time and link. Wait for me to say "go" before anything goes live.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Which post do you expect to do best, and why?"
- "What did the Lead send back to the writer, and why?"

- "Is anything here not ready to post? Explain in plain English."

Check your work

- ☐ The gate stopped Claude from approving.
- ☐ Two teammates ran; the task list showed their tasks.
- ☐ The designer and the creator messaged each other.
- ☐ Two posts with images, alt text, frontmatter and UTM links.
- ☐ You reviewed in the artifact or by email and pasted the approval in the chat; the rows show your name and a hash.
- ☐ Dry runs printed every request; nothing went live unless you said go.

If it goes wrong

- **You got subagents, not a team** — Start a new session in your studio folder and ask for "an agent team" by name.
- **LinkedIn returns 426** — LINKEDIN_VERSION must be a recent YYYYMM.

Stretch

- Add the growth-analyst to suggest the best posting time per post from channel-benchmarks.csv.
- Link each LinkedIn post to the Lab 8 blog article.

Why it matters: Subagents report to one boss; teammates also talk to each other. A designer who can ask the writer for the hook makes a better image.

Next

Lab 11 — Campaign 3: Newsletter and a Landing Page. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
