

The four studio skills (Lab 7)

Multi AI Agents Workflow for Content Creation · Day 1 · Claude Cowork (/skill-creator) → every tool

Each skill is a folder with a SKILL.md: a name, a "Use when..." description,

then the steps. Keep each under 80 lines. Save them in the project's

skills/ folder so every tool can use the same files:

Tool	Where it looks
Claude Cowork	Customize -> Skills (saved by /skill-creator)
Claude Code (subagents, agent teams)	.claude/skills/<name>/SKILL.md
Codex	.agents/skills/<name>/SKILL.md
Hermes Agent	~/.hermes/profiles/<profile>/skills/<name>/SKILL.md

1. **sunny-voice** — Use when writing anything Horizon will publish. The voice, banned words and sign-off from brand.md. Plain English check: no sentence over 25 words; explain every acronym once.
2. **fact-check** — Use when a draft contains a number, age, rate, date or rule. List every claim; match each to facts-2026.md; mark it VERIFIED or UNVERIFIED; never "fix" a figure from memory.
3. **fin-compliance** — Use before any content goes to a person for review. Apply compliance-checklist.md rule by rule; output a table (rule, words, severity, fix) and PASS / FAIL; add the right disclaimer.
4. **channel-formats** — Use when writing a LinkedIn post, Facebook post, newsletter issue or YouTube script. The shapes in channel-formats.md and the content-file frontmatter from publishing-spec.md.
