DOCUMENT VERSION CONTROL RECORD

Version Number	Effective Date of Release	Summary of Included Changes	Author
1.0	13 Sep 2026	Multi-agent content strategy courseware aligned to the current course page and TSC; GreenLeaf Café case; 12 labs.	Tertiary Infotech Academy
2.0	8 Oct 2026	Revamped in the house design of the Agentic AI Applications with Codex course. One central case — Horizon Wealth Planning, a Singapore financial-planning firm — across 14 labs, each in its own folder: Claude Cowork sub-agents (research, ideation, personas, cadence, skills, measurement), Codex (website, compliance subagent, approval gate, video), Claude Code subagents and agent teams (social, newsletter and video teams with LinkedIn, Facebook and YouTube publishing behind a human approval gate) and Hermes Agent bots on a Kanban board. Practice Exam slide (Claude Certified Associate — Foundations). WA (6 SAQ, K1-K6) and PP (4 tasks, A1-A7) rewritten for the v2.0 labs; assessment 4:00-6:00 PM Day 2 (WA 1 h, PP 1 h).	Dr. Alfred Ang
2.1	8 Oct 2026	Two Claude tools only: Claude (Chat and Cowork are one product) and Claude Code, which replaces Codex for the website, compliance subagent, approval gate and video. The website is published and shared as a Claude artifact instead of GitHub Pages. New slides: Claude plans and pricing; the agentic loop, why it matters and the loop in action; permission modes; publishing a Claude artifact. Topic 4 runs a scheduled weekly brief in Claude (Lab 12) and the playbook (Lab 13); Hermes Agent becomes an optional demo at the end (Lab 14). PP Task 4 updated to the Topic 4 labs.	Dr. Alfred Ang
3.0	8 Oct 2026	Two editions from one source — Claude and ChatGPT — each with its own deck, Lesson Plan, Learner Guide, labs and assessment. Rebuilt around an AI marketing team: a Marketing Team Lead and five specialists (Growth Strategist, Content Creator, Creative Designer, Website Designer, Growth Analyst), each with instructions, two skills and its own connectors. The team runs five campaigns: research to storyboard, a social week, newsletter and landing page, a YouTube explainer and an always-on weekly report. Claude edition: Claude Code subagents and agent teams; the website as a Claude artifact; optional Hermes Agent demo. 13 labs.	Dr. Alfred Ang
3.2	9 Oct 2026	Horizon's website is given, not built: Lab 1 now opens one public link (a shared Claude artifact) with a GitHub Pages backup for learners who cannot open artifacts or Sites, and adds the link to the team charter. The website links are printed and clickable on the scenario slide; the Practice Exam slide links to the exam. Lab 4 checks the public site; broken site URLs fixed.	Dr. Alfred Ang
3.3	9 Oct 2026	No-code Claude Edition: every lab says which app to use (Claude, or Claude Code) on its slides, README	Dr. Alfred Ang

		and Learner Guide page; Labs 6–9 and 13–15 run in Claude, Labs 3, 4 and 11 in both. Two new content labs: Lab 8 (a blog article from the storyboard, Day 1) and Lab 9 (the lead magnet and its welcome emails, Day 2); later labs renumbered 10–15. A person approves by typing "approved <id> by <name>" — the gate comes pre-installed. The optional demo is now code-free. Skills widened for content creation: twenty skills, adding content-marketing, copywriting, linkedin-post, facebook-post, blog-post, newsletter, web-design and lead-magnet, used in Labs 5 and 8–11. Lab 4 connects every tool the labs use (Google Drive, Gmail, Google Calendar, Firecrawl for web research); the Website Designer uses the built-in browser — Playwright removed.	
3.4	10 Oct 2026	Day 2 ends with agent teams at work: the optional demo is replaced by Lab 15, a hands-on agent-team lab in two parts — an advocate and a critic argue the pros and cons of a "Turning 55" CPF campaign while the Lead judges, then a QA loop in which a QA Auditor sends a failed draft straight back to the writer until it passes. New slides: subagents vs agent teams (diagram), a team that argues, and the QA loop. Hermes Agent references removed. Lab 15 runs 30 minutes; the course summary 15:45-16:00.	Dr. Alfred Ang
3.5	10 Oct 2026	Labs made for learners who are not IT people. Every lab runs in Code mode, in its own session named after the lab. From Lab 5 every result opens as a plain-English artifact with a Word copy, and each lab lists follow-up questions to ask. Prompts are copied from the Prompts page. Horizon's website gains a blog; each learner works on their own local copy of the site: Lab 8 (now one quick-blog prompt) posts an article to it and Lab 9 adds the checklist, with the welcome emails as Gmail drafts. Canva removed. Lab 10 is a two-post demo (40 min; Lab 9 40 min). Labs 10-11: review in the artifact or by a review email, then approve in the chat.	Dr. Alfred Ang
3.6	11 Oct 2026	No commands for learners: every action is a plain-English ask, and Lab 10 starts with "Get the latest kit", which fetches the current course files into a learner's folder. Posts link to each learner's own website at http://localhost:8080 ("Start my website"). Lab 10: the designer makes both images; the review page shows the Team chat and has working Approve / Request changes buttons; after approval a ready-to-post page, then the learner posts by hand, with an optional section for posting through LinkedIn and Facebook. Labs 4 and 13: Claude puts the data on Google Drive. Lab 15 shows the debate. PP Task 3 aligned to the new Lab 10.	Dr. Alfred Ang
3.7	11 Oct 2026	Final clean-up. Every lab file ships in horizon-studio from Lab 1, so the catch-up prompts are gone: Lab 10 no longer starts with "Get the latest kit" (its prompts are now A and B), Lab 13 reads the data Lab 4 already put on Google Drive, and Lab 15 has no download fix. The Lab 1 charter now holds the approve-in-the-chat and no-commands rules.	Dr. Alfred Ang

Course Overview

A two-day, hands-on WSQ course in content strategy with multi-agent AI workflows. Learners take one business — Horizon Wealth Planning, an independent financial-planning firm in Singapore with a website and no marketing team — and build it an AI marketing team: a Marketing Team Lead and five specialists (Growth Strategist, Content Creator, Creative Designer, Website Designer, Growth Analyst), each with instructions, skills and connectors. Day 1 forms the team and runs its first campaign; Day 2 runs a social week, a newsletter with a landing page, a YouTube explainer and an always-on weekly report, with a person approving every external piece. This Claude Edition uses Claude Code subagents and agent teams, Claude connectors and scheduled tasks, and publishes pages as Claude artifacts.

Course code TGS-2023036153 · 2 days · 16 hours including a 2-hour assessment · 172-slide deck v3.7 · 15 labs, each in its own folder. TSC: ICT-SNM-4004-1.1 Content Strategy.

- **Features practised:** an advocate and a critic argue the pros and cons · the Lead judges · a writer and a QA Auditor loop until PASS · FAIL goes straight back to the writer · human approval
- **Output:** the decision (pros, cons, verdict), then an email, a video script and a thumbnail that passed QA, submitted for your approval — shown as artifacts, with a Word copy of each
- **Evidence:** The advocate and the critic messaged each other; every point cites a file. Both teams were shut down and cleaned up.
- **Lab folder:** labs_claude/lab-15-agent-teams-debate-and-qa-loop/

- Each learner: a laptop with the Claude desktop app on a Pro plan or above (Claude Code and artifacts are not on the Free plan), signed in with their claude.ai account. Learners type no commands: each lab says whether to use Claude or Claude Code.
- Installed by the trainer before class: Claude Code, Node.js 22, Python 3 with Pillow and ffmpeg (they run the approval gate and the video). A personal Google account (Drive, Gmail, Calendar). A free Firecrawl account (1,000 credits a month, no card) for web research; Anthropic's Marketing plugin (free, added in Lab 4).
- Lab 15 (agent teams) runs in the same studio folder; agent teams come switched on in .claude/settings.json.
- Optional, for live publishing: a LinkedIn developer app, a test Facebook Page and a Google Cloud project with the YouTube Data API. Every lab also works in dry-run mode without them.
- All fixtures are synthetic. Every learner email address resolves to the learner's own Gmail via plus-addressing.
