Lab 01 — Build Your Marketing Agent Team

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · Use Codex

> **USE: CODEX** — Codex, in your horizon-studio folder

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 1 · Topic 1 · about 30 minutes · slides 36–41

Surface: ChatGPT Project → Codex

Features: a ChatGPT Project with shared files · AGENTS.md · your own copy of Horizon's website

> **Copy the prompts:** https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/chatgpt/#lab-1 — click **Copy** next to each prompt, then paste it into the chat.

The story so far

October 2026. Rachel has a website and a goal: 40 booked chats a month by March. She has no marketing team. Before you hire one made of agents, give it a home — shared rules, shared facts — and open your own copy of Horizon's website.

Your goal

Before anyone builds a team, the team needs a home: one folder of shared facts and rules, and your own copy of Horizon's website — the one every post links to.

You'll build

the Horizon Marketing project, horizon-studio/ with AGENTS.md, and your own copy of the site running at http://localhost:8080/

Horizon's website

You work on your own copy in `web/site/` of your folder; Labs 8 and 9 add to it. Ask "Start my website" to open it at http://localhost:8080/ — every post links there. The public site is only for looking at; nobody changes it.

- **Your website (the link in every post):** http://localhost:8080/
- **Public site (to look at only):** https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/

Folder structure

```
labs_chatgpt/
└── horizon-studio/     ← choose this folder
    ├── content/        posts, newsletter, scripts (agents fill it)
    ├── data/           every lab's briefs and data, ready to read
    ├── README.md
    ├── reports/        campaign results, the weekly report
    ├── research/       market and competitor research
    ├── review/         approvals
    ├── strategy/       briefs, personas, calendar
    └── web/
        └── site/
            └── index.html  the local copy of Horizon's site
```

What is in this folder

> **.md or .pdf?** A `.md` file (Markdown) is plain text that Codex reads. Every `.md` here has a `.pdf` twin with the same name — open the PDF to read it yourself.

- `assets/horizon-site.html`
- `assets/team-charter.md`
- `assets/business-brief.md`
- `assets/brand.md`
- `assets/facts-2026.md`
- `assets/compliance-checklist.md`
- `solution/` — reference files from the verified build (each `.md` with its `.pdf`)
- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **Choose the folder** — In Codex create a local project and choose labs_chatgpt/horizon-studio. It is ready-made — do not create one.
2. **Make the Project** — In ChatGPT create the Project "Horizon Marketing" with the charter, brand, facts and compliance files. Copy and paste Prompt A as its instructions.
3. **Plan your team** — In Codex, copy and paste Prompt B. Answer as Horizon's owner and pick your team — keep the six charter roles. It is a plan only: Lab 2 builds the agents.
4. **Write the charter** — After Codex saves data/team-design.md, copy and paste Prompt C. Open AGENTS.md — every agent reads it.
5. **Open the website** — Ask: "Start my website." It opens at http://localhost:8080/ — your own copy of Horizon's website; every post links to it. Check the calculator shows S$693,138.

The prompts

PROMPT A — ChatGPT Project: instructions

> You support Horizon Wealth Planning's AI marketing team. Use the project files: team-charter.md for who does what, brand.md for the voice and look, facts-2026.md for every number, and compliance-checklist.md before anything is shown to a person. Never publish or send anything.

PROMPT B — Codex: plan your team

> Act as a marketing consultant. Interview me, the owner of Horizon Wealth Planning, to plan my AI marketing team. Ask one question at a time and wait for my answer: my goal, what success looks like by March 2027, who we want to reach, which channels we use, how much we publish each week, and who approves before anything goes out.
> Then list 8 to 10 team members I could have, numbered, each with a one-line job. Include the six roles in data/team-charter.md and mark the ones you recommend. Wait for me to choose.
> Save my answers and my chosen team, with each member's job, to data/team-design.md. This is a plan only: do not create any agent files yet.

PROMPT C — Codex: the charter

> Read data/team-charter.md, data/team-design.md and data/business-brief.md. Write AGENTS.md for this studio in four sections — What this is, The team, Rules, Files — under 60 lines. The team is the one I chose in data/team-design.md. Rules: every number comes from data/facts-2026.md; every piece passes fact-check and fin-compliance; nothing is published or sent without a person's approval (the one exception: a review email to the approver); anything shown to me is in plain English for a business owner, with no codes, IDs, file names or line numbers.
> In Files, add two lines:
> - Our copy of the site, which we edit: web/site/.
> "Start my website" runs scripts/serve-site.mjs in the background and opens http://localhost:8080/
> - Every post links to http://localhost:8080/ with UTM tags, never to the public site.

Check your work

- □ The Horizon Marketing project holds the four files and the instructions.

- □ data/team-design.md holds your answers and the team you chose, with the six charter roles in it — and no agent files yet.
- □ AGENTS.md has the four sections and is under 60 lines.
- □ Its rules name the facts sheet, the two checks and the human approval.
- □ AGENTS.md names your copy of the site and the link every post points to.
- □ Your website opens at http://localhost:8080/; the calculator shows S$693,138.

If it goes wrong

- **The website does not open** — Say: "Start my website again." If the page still does not load, say: "Open web/site/index.html in my web browser."
- **It created agent files already** — Not yet — say "Move everything in agents/ to _archive/. We build the team in Lab 2." The plan in data/team-design.md is all Lab 1 needs.

Stretch

- Ask: "Read web/site/index.html. In five bullets: who it is for, the offer, the main call to action, what the calculator does, and the disclaimer."
- Ask for a one-paragraph summary of the site from the point of view of a busy 35-year-old parent.

> **Why it matters:** Shared context first, agents second. Every agent you add later starts from these files, so a wrong rule here is wrong everywhere.

Next

Lab 2 — Form the Team: Instructions for Each Agent. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in .env. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
