Plugins for each agent (ChatGPT edition)

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · Use ChatGPT, then Codex

Install once from the Plugins tab (desktop app or web), sign in with your PERSONAL Google account, then call them with @. Sites and $imagegen are built in.

Agent	May use	Limit
Marketing Team Lead	@Google Drive (read), @Gmail	@Gmail: drafts only
Growth Strategist	web search, @Google Drive (read)	cite every source
Content Creator	@Google Drive (docs), @Gmail	@Gmail: drafts only
Creative Designer	$imagegen; ffmpeg in Codex	no real or synthetic "clients"
Website Designer	@Sites, @Computer Use	publish only after approval
Growth Analyst	@Google Drive and Sheets (read); Python in Codex	no personal data in reports

Least privilege: write each role's plugins and limits into its card in agents/. Subagents inherit your sandbox and permissions, so keep Codex at workspace-write. The approval gate (Lab 10) stops agents approving or publishing.
