# Evidence — Lab 10: Campaign 2: Social Media Posts (Demo)

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex

Capture a screenshot or file for each line. Evidence beats a description.

- □ The hook (or approve.mjs) stopped the agent from approving.
- □ Two subagents ran in parallel; both reached Done.
- □ The Lead sent at least one fix back to a subagent.
- □ Two posts with images, alt text, frontmatter and UTM links; each dry run shows its image being uploaded.
- □ You approved in your own terminal; the rows show your name and a hash.
- □ Dry runs printed every request; nothing went live unless you said go.

## Notes

What did not work first time, and what you changed:

What you did NOT verify:
