Lab 11 — Campaign 3: Newsletter and a Landing Page

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex, then ChatGPT Work

> **USE: CODEX, THEN CHATGPT WORK** — start in Codex; the step that moves you to ChatGPT Work says so

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 45 minutes · slides 123–128

Surface: Codex (subagents) → @Sites → ChatGPT Work (@Gmail)

Features: creator writes, website designer builds the lead-magnet page, analyst filters by consent, the Lead checks · drafts only

> **Copy the prompts:** https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/chatgpt/#lab-11 — click **Copy** next to each prompt, then paste it into the chat.

The story so far

The Sunny Sunday email books chats most cheaply. November's issue promotes a new landing page for the free checklist — and must reach only the 31 people who opted in.

Your goal

The Sunny Sunday email books chats most cheaply — if it is right and reaches only people who said yes. This issue promotes a new landing page for the Money Check-up Checklist.

You'll build

the November newsletter, its recipient list, the landing page published, and Gmail drafts — with a Word copy of each

What is in this folder

> **.md or .pdf?** A `.md` file (Markdown) is plain text that Codex reads. Every `.md` here has a `.pdf` twin with the same name — open the PDF to read it yourself.

- `assets/newsletter-brief.md`
- `assets/newsletter-spec.md`
- `assets/landing-page-brief.md`
- `assets/site-brief.md`
- `assets/checklist-items.md`

- `assets/subscribers.csv`
- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — In Codex start a new thread in horizon-studio and name it "Lab 11". Run all of this lab's prompts in it.
2. **Start the campaign** — Copy and paste Prompt A.
3. **Approve the words** — Read the email and the page copy; approve nl-2026-11 in your own terminal.
4. **Publish the page** — The website designer runs page-qa and publishes web/checklist/ as @Sites.
5. **Check the list** — Only people with consent = yes and unsubscribed = no are on the recipient list.
6. **Create the drafts** — After the page is published and the list checked, copy and paste Prompt B.
7. **Send one test** — Send only the draft addressed to yourself, and read it on your phone.

The prompts

PROMPT A — Codex: the newsletter team

> You are the Lead for the November Sunny Sunday email (data/newsletter-brief.md, data/newsletter-spec.md) and its landing page (data/landing-page-brief.md). Use subagents:
> - content-creator: issue.md (id nl-2026-11) with newsletter, and the landing-page copy.
> - website-designer: web/checklist/index.html with lead-magnet, web-design and landing-page; page-qa.
> - growth-analyst: recipients.csv and excluded.csv from data/subscribers.csv.
> Check everything, then submit nl-2026-11. After I approve, build newsletter.html and .txt, and deploy web/checklist with @Sites (Only those invited).
> Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — ChatGPT Work: Gmail drafts

> Using @Gmail, create a DRAFT of the newsletter in content/newsletter/2026-11/newsletter.html (upload it) for each address in recipients.csv, plus one draft to me only. Send nothing. Report how many drafts and how many people were excluded, and why.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Explain the email in three sentences. What do we want readers to do?"
- "Who was left off the mailing list, and why?"
- "What did the landing-page check look at, and did it pass?"

Check your work

- □ Three specialists worked on the campaign; the Lead checked all.
- □ You approved nl-2026-11 in your own terminal before the build.
- □ The landing page passed page-qa and is published.
- □ The recipient list holds 31 people; 9 are excluded, with reasons.
- □ The email has unsubscribe, address and disclaimer.
- □ Drafts only — nothing was sent to the list.

If it goes wrong

- **The build started before approval** — Tell the Lead the build waits for review/approvals.csv to say approved.

Stretch

- Ask for two subject lines to A/B test, with a reason for each.

> **Why it matters:** Consent decides who gets mail — not the agent and not the deadline. Marketing to people who did not opt in breaks the PDPA.

Next

Lab 12 — Campaign 4: The YouTube Explainer. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in .env. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
