Responsible AI checklist for the studio (Lab 14)

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex

Area	Rule	Control in our studio
Human oversight	A named person approves every external piece	approvals.csv + approve.mjs (people only) + the hook
Accuracy	Every figure from the facts sheet	fact-check skill; reviewer agents
Regulation	MAS digital advertising principles	fin-compliance skill; compliance checklist
Privacy (PDPA)	Marketing only to opted-in contacts; minimum personal data in prompts	recipients.csv filter; no client data in agents
Transparency	AI-made visuals and voices disclosed	video description line; no synthetic "clients"
Rights	Only images, music and fonts we may use	brand assets; licence notes
Security	Keys only in .env; agents never see them	.gitignore; publish.mjs masks tokens
Records	Keep the approved version, approver and date	approvals.csv, publish-log.csv
Cost	Teams cost more tokens — use them where they pay	run-log.csv review
