Prompts — Lab 14: Measure, Govern and Write the Team Playbook

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex

Use: Codex — Codex, in your horizon-studio folder. Paste each prompt as written; change only what the lab tells you to.

Easiest: copy each prompt from https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/chatgpt/#lab-14 (one Copy button per prompt).

PROMPT A — Codex: compare

```
Use the growth-analyst subagent. From
data/run-log.csv compare the patterns we used —
one agent, subagents, parallel subagents with a Lead review and the scheduled task
— on minutes, tokens, defects caught before a person
and human edits. Which pattern pays off for which
job? Save reports/agent-comparison.md.
Write for a business owner, in plain English: no
codes, IDs, file names or line numbers; start with
what it means and what I do next. Save a Word copy
(.docx) of each result.
```

PROMPT B — Codex: the playbook

```
Write strategy/team-playbook.md with
data/playbook-outline.md. Include the roster: for
each agent its instructions file in agents/, its
skills, connectors, model and what it may never do;
the approval matrix by risk; the rules in
data/responsible-ai-checklist.md; and what to do when
a wrong post goes out. Then run fin-compliance on
it.
Write for a business owner, in plain English: no
codes, IDs, file names or line numbers; start with
what it means and what I do next. Save a Word copy
(.docx) of each result.
```

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "In one line each: when should we use one agent, subagents and a Lead review?"
- "Who must approve a post that has a CPF figure in it?"
- "A wrong post went out. What are the first three things we do?"
