The Turning 55 campaign (Lab 15)

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex

Owner: the Marketing Team Lead, with Codex subagents.

Window: January 2027. Budget: S$1,200 of the month's S$4,000.

The strategy on the table

"Lead January with 'Turning 55? What happens to your CPF' — a plain-English explainer of the retirement sums and CPF LIFE for pre-retirees — on YouTube and in the Sunny Sunday email, inviting them to a free 30-minute chat."

Part 1 — argue it before you run it

- An ADVOCATE argues for the strategy; a CRITIC argues against it.
- Every point cites data/campaign-results.csv, strategy/personas.md, data/facts-2026.md or data/compliance-checklist.md — no opinions without evidence.
- The Lead gives each one the other's case: two rounds of rebuttal at most.
- The Lead writes strategy/turning-55-decision.md: pros, cons, a verdict (go / go with conditions / no-go) and the conditions. A person decides.

Part 2 — the QA loop

- Start from data/turning-55-draft.md (an intern's first draft).
- Deliverables in content/turning-55/: email.md, video-script.md and one thumbnail image with alt text.
- The QA Auditor audits every piece with fact-check and fin-compliance and writes review/turning-55-qa.md — one section per round, PASS or FAIL per check, with the line to fix.
- FAIL goes back to the writer: the Lead passes on the auditor's lines unchanged and never fixes them itself. Three rounds at most; after that the Lead escalates to a person.

- PASS goes to the designer, then the Lead submits for approval.

Rules

- Figures only from data/facts-2026.md, named as 2026 figures.
- General information, not advice. No promised payouts or returns; no

"everyone should".

- The website disclaimer on the email, word for word.
