

Evidence — Lab 09: The Social Media Agent Team: LinkedIn and Facebook

Multi AI Agents Workflow for Content Creation · Day 2 · Claude Code (subagents + agent teams)

Capture a screenshot or file for each line. Evidence beats a description.

- ☐ Three subagent files exist, each with tools and a model.
- ☐ Three teammates appeared; the task list showed their tasks.
- ☐ The reviewer messaged the writer at least once, and the fix landed.
- ☐ Five posts with frontmatter and UTM links; all pending in approvals.csv.
- ☐ You approved in your own terminal; an agent attempt was blocked.
- ☐ Dry runs printed every request; live posts appear only if you said go.

Notes

What did not work first time, and what you changed:

What you did NOT verify:
