

Lab 11 — Campaign 3: Newsletter and a Landing Page

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex, then ChatGPT Work

USE: CODEX, THEN CHATGPT WORK — start in Codex; the step that moves you to ChatGPT Work says so

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 45 minutes · slides 119–124

Surface: Codex (subagents) → @Sites → ChatGPT Work (@Gmail)

Features: creator writes, website designer builds the lead-magnet page, analyst filters by consent, the Lead checks · drafts only

Copy the prompts: <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/chatgpt/#lab-11> — click **Copy** next to each prompt, then paste it into the chat.

The story so far

The Sunny Sunday email books chats most cheaply. November's issue promotes a new landing page for the free checklist — and must reach only the 31 people who opted in.

Your goal

The Sunny Sunday email books chats most cheaply — if it is right and reaches only people who said yes. This issue promotes a new landing page for the Money Check-up Checklist.

You'll build

the November newsletter, its recipient list, the landing page published, and Gmail drafts — with a Word copy of each

What is in this folder

.md or .pdf? A .md file (Markdown) is plain text that Claude reads. Every .md here has a .pdf twin with the same name — open the PDF to read it yourself.

- assets/newsletter-brief.md
- assets/newsletter-spec.md
- assets/landing-page-brief.md
- assets/site-brief.md
- assets/checklist-items.md

- `assets/subscribers.csv`
- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — In Codex start a new thread in horizon-studio and name it "Lab 11". Run all of this lab's prompts in it.
2. **Start the campaign** — Copy and paste Prompt A.
3. **Approve the words** — Read the email and the page copy; approve nl-2026-11 in your own terminal.
4. **Publish the page** — The website designer runs `page-qa` and publishes `web/checklist/` as `@Sites`.
5. **Check the list** — Only people with `consent = yes` and `unsubscribed = no` are on the recipient list.
6. **Create the drafts** — After the page is published and the list checked, copy and paste Prompt B.
7. **Send one test** — Send only the draft addressed to yourself, and read it on your phone.

The prompts

PROMPT A — Codex: the newsletter team

You are the Lead for the November Sunny Sunday email (`data/newsletter-brief.md`, `data/newsletter-spec.md`) and its landing page (`data/landing-page-brief.md`). Use subagents:

- `content-creator`: `issue.md` (id nl-2026-11) with newsletter, and the landing-page copy.
- `website-designer`: `web/checklist/index.html` with lead-magnet, web-design and landing-page; `page-qa`.
- `growth-analyst`: `recipients.csv` and `excluded.csv` from `data/subscribers.csv`.

Check everything, then submit nl-2026-11. After I approve, build `newsletter.html` and `.txt`, and deploy `web/checklist` with `@Sites` (Only those invited). Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (`.docx`) of each result.

PROMPT B — ChatGPT Work: Gmail drafts

Using `@Gmail`, create a DRAFT of the newsletter in `content/newsletter/2026-11/newsletter.html` (upload it) for each address in `recipients.csv`, plus one draft to me only. Send nothing. Report how many drafts and how many people were excluded, and why.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Explain the email in three sentences. What do we want readers to do?"
- "Who was left off the mailing list, and why?"
- "What did the landing-page check look at, and did it pass?"

Check your work

- ☐ Three specialists worked on the campaign; the Lead checked all.
- ☐ You approved nl-2026-11 in your own terminal before the build.
- ☐ The landing page passed page-qa and is published.
- ☐ The recipient list holds 31 people; 9 are excluded, with reasons.
- ☐ The email has unsubscribe, address and disclaimer.
- ☐ Drafts only — nothing was sent to the list.

If it goes wrong

- **The build started before approval** — Tell the Lead the build waits for review/approvals.csv to say approved.

Stretch

- Ask for two subject lines to A/B test, with a reason for each.

Why it matters: Consent decides who gets mail — not the agent and not the deadline. Marketing to people who did not opt in breaks the PDPA.

Next

Lab 12 — Campaign 4: The YouTube Explainer. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in .env. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
