

Prompts — Lab 11: Campaign 3: Newsletter and a Landing Page

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Use Codex, then ChatGPT Work

Use: Codex, then ChatGPT Work — start in Codex; the step that moves you to ChatGPT Work says so. Paste each prompt as written; change only what the lab tells you to.

Easiest: copy each prompt from <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/chatgpt/#lab-11> (one Copy button per prompt).

PROMPT A — Codex: the newsletter team

You are the Lead for the November Sunny Sunday email (data/newsletter-brief.md, data/newsletter-spec.md) and its landing page (data/landing-page-brief.md). Use subagents:

- content-creator: issue.md (id nl-2026-11) with newsletter, and the landing-page copy.
- website-designer: web/checklist/index.html with lead-magnet, web-design and landing-page; page-qa.
- growth-analyst: recipients.csv and excluded.csv from data/subscribers.csv.

Check everything, then submit nl-2026-11. After I approve, build newsletter.html and .txt, and deploy web/checklist with @Sites (Only those invited). Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — ChatGPT Work: Gmail drafts

Using @Gmail, create a DRAFT of the newsletter in content/newsletter/2026-11/newsletter.html (upload it) for each address in recipients.csv, plus one draft to me only. Send nothing. Report how many drafts and how many people were excluded, and why.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Explain the email in three sentences. What do we want readers to do?"
- "Who was left off the mailing list, and why?"
- "What did the landing-page check look at, and did it pass?"
