

Prompts — Lab 10: Campaign 2: Social Media Posts (Demo)

Multi AI Agents Workflow for Content Creation (Claude Edition) · Day 2 · Use Claude Code

Use: Claude Code — Code mode (the `</>` button) in the Claude desktop app, in your horizon-studio folder. Paste each prompt as written; change only what the lab tells you to.

Easiest: copy each prompt from <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/claude/#lab-10> (one Copy button per prompt).

PROMPT A — Claude Code: the social team

Create an agent team for Week 1 social from data/social-brief.md and strategy/calendar.csv. Spawn two teammates using the agent types content-creator and creative-designer; you are the Lead.

- content-creator: 1 LinkedIn + 1 Facebook post with linkedin-post, facebook-post and copywriting, one file each in content/social/week-01/, with the frontmatter in data/publishing-spec.md.
- creative-designer: one image per post (a rendered card in Horizon colours) with alt text; message the creator for each post's hook before designing.
- You: fact-check and fin-compliance on every post; message fixes to the teammate who owns it.

Before you start, ask me how I will review: in the artifact, or by email (then ask for the approver's address). When a post passes, submit it for review with scripts/submit.mjs. Publish the two posts as an artifact, each as it will look in the feed, with its image and alt text; under each post put an Approve button and a Request changes box that copy the exact line for me to paste in the chat. If I chose email, send ONE review email to the approver with Gmail: the artifact link and what passed the checks. Send nothing else; publish nothing. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: publish

For every Week 1 post approved in review/approvals.csv, do a dry run of publishing it (scripts/publish.mjs) and publish each request as an artifact: one card per post with channel, time and link. Wait for me to say "go" before anything goes live.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Which post do you expect to do best, and why?"
- "What did the Lead send back to the writer, and why?"
- "Is anything here not ready to post? Explain in plain English."
