

Prompts — Lab 04: Install the Plugins Each Agent Needs

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · ChatGPT plugins → Codex

Surface: ChatGPT plugins → Codex. Paste each prompt as written; change only what the lab tells you to.

PROMPT A — Codex: test each agent

Use subagents, one per check, each following its role card:

1. growth-strategist: web search – one 2026 news item about financial planning in Singapore, cited.
 2. growth-analyst: @Google Drive – read firm-metrics.csv from Horizon Studio; report average monthly enquiries.
 3. content-creator: @Gmail – a DRAFT to me with the subject "Connector test". Do not send.
 4. creative-designer: \$imagegen – a 1080x1080 test image in Horizon colours; @Canva – list designs.
 5. website-designer: @Computer Use – open Horizon's public site at mobile width and report any problem.
- Report each result in one line.

PROMPT B — Codex: least privilege

Update the "Plugins" section of each role card in agents/ to match data/connectors-setup.md: what it may use, and that @Gmail is drafts-only. Remove any plugin a role does not need.
