

Lab 05 — Campaign 1: Research to Storyboard, with Subagents

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · Codex (subagents in parallel)

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 1 · Topic 1 · about 50 minutes · slides 60–64

Surface: Codex (subagents in parallel)

Features: the Lead delegates · strategist and analyst in parallel · nine scored ideas · a human concept checkpoint · a five-beat storyboard

The story so far

The team's first campaign: 'Know Your Number', November to January. Rachel wants research, ideas for three audiences, her choice, and a storyboard every channel follows.

Your goal

The team's first job: find who to reach and what to say for the "Know Your Number" campaign — research in parallel, ideas scored, a person choosing, a storyboard every channel follows.

You'll build

research/ (competitors, funnel), strategy/ideas.md, strategy/storyboard.md with three channel variants

What is in this folder

- assets/campaign-objective.md
- assets/idea-rubric.md
- assets/storyboard-template.md
- assets/firm-metrics.csv
- assets/services.csv
- prompts.md / prompts.pdf — every prompt, ready to paste
- evidence/checklist.md — what to capture as proof

Step by step

1. **Brief the Lead** — The briefs are already in data/. You are the client; your session is the Marketing Team Lead.
2. **Research in parallel** — Paste Prompt A. Watch the strategist and the analyst run at the same time.
3. **Read the ideas** — Nine ideas, scored with the rubric. The Lead stops for you.
4. **Choose** — Pick one idea and say why — the human concept checkpoint.
5. **Storyboard** — Paste Prompt B with your choice.

6. **Check the claims** — Every beat's claim must have a source in facts-2026.md.

The prompts

PROMPT A — Codex: research and ideas

Act as the Marketing Team Lead for the campaign in data/campaign-objective.md.
Use subagents, in parallel:

- growth-strategist: competitor-scan → save research/competitive-analysis.md.
- growth-analyst: the funnel in data/firm-metrics.csv — what 40 chats a month needs → save research/funnel.md.

When both finish, the growth-strategist proposes three ideas each for young professionals, mid-career families and pre-retirees, scored with data/idea-rubric.md → strategy/ideas.md.
Show me the top five and stop — I will choose.

PROMPT B — Codex: the storyboard

I choose idea <number>, because <one line>.
Use subagents:

- growth-strategist: campaign-brief and a five-beat storyboard with data/storyboard-template.md → strategy/storyboard.md.
- content-creator: three channel variants that keep the same claims — LinkedIn, Facebook, a 60-second video.

Then run fact-check and fin-compliance yourself and show me the issues before anything is final.

Check your work

- ☐ The strategist and the analyst ran in parallel.
- ☐ research/ has the competitor analysis and the funnel, cited.
- ☐ strategy/ideas.md holds nine scored ideas with their authors.
- ☐ You chose the idea and recorded why.
- ☐ The storyboard has five beats; every claim has a source.
- ☐ The Lead's fact-check and fin-compliance report came back.

If it goes wrong

- **The Lead did the work itself** — Ask directly for subagents, naming each agent.

Stretch

- Ask the analyst which persona the funnel says to target first, and compare it with your choice.

Why it matters: Agents diverge; a person decides. The concept checkpoint is where the campaign becomes yours.

Next

Lab 6 — Growth Analyst: Personas from Evidence. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in `.env`. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
