

Lab 06 — Growth Analyst: Personas from Evidence

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · Codex (analyst subagents)

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 1 · Topic 2 · about 40 minutes · slides 69–73

Surface: Codex (analyst subagents)

Features: three analyst subagents, one per data file · counts, not impressions · confidence labels · content requirements

The story so far

Jun Wei drafted personas from instinct: 'busy young parents who love TikTok'. Rachel is not convinced. There are 150 survey answers, 60 enquiries and 200 checklists.

Your goal

Personas made up in a meeting steer content wrong. The Growth Analyst builds them from 150 survey answers, 60 enquiries and 200 checklists — and labels what is guesswork.

You'll build

strategy/personas.md and strategy/content-spec.md

What is in this folder

- assets/survey-responses.csv
- assets/enquiries.csv
- assets/checklist-results.csv
- assets/persona-template.md
- assets/content-spec-template.md
- prompts.md / prompts.pdf — every prompt, ready to paste
- evidence/checklist.md — what to capture as proof

Step by step

1. **Check the data** — The CSVs and templates are already in data/. Open one and skim it.
2. **Analyse in parallel** — Paste Prompt A — three analyst subagents, one per file.
3. **Challenge a claim** — Pick one persona statement and ask: "which rows show that?"
4. **Write the requirements** — Paste Prompt B.
5. **Check the gaps** — The 60+ group must be LOW CONFIDENCE.

The prompts

PROMPT A — Codex: three analysts

Use three growth-analyst subagents in parallel, one per file: data/survey-responses.csv, data/enquiries.csv, data/checklist-results.csv. Each uses audience-insights: counts with code, n and the file on every claim, INFERENCE and LOW CONFIDENCE labels, enquiry quotes verbatim with ids. Combine the results into three personas with data/persona-template.md → strategy/personas.md.

PROMPT B — Codex: requirements

Use the growth-strategist and the content-creator subagents to write strategy/content-spec.md with data/content-spec-template.md: for each persona the top 3 questions, channels, formats, length, tone, proof, call to action and never-say — each with the evidence (file and count) behind it.

Check your work

- ☐ Three analyst subagents ran, one per file.
- ☐ Every persona statement carries a count and a file.
- ☐ The 60+ group is LOW CONFIDENCE (n = 12).
- ☐ The most-unticked checklist item is the retirement number.
- ☐ Enquiry quotes are verbatim, with ids.
- ☐ content-spec.md has every field for every persona.

If it goes wrong

- **Numbers change between runs** — Insist on counting with code and showing the printed output.

Stretch

- Ask the analyst for a filterable dashboard of the survey as a Site.

Why it matters: Ask "which rows show that?" of anything that sounds insightful. If the agent cannot point to rows, it is an inference.

Next

Lab 7 — Growth Analyst and Strategist: Cadence and Calendar. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in `.env`. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
