

Prompts — Lab 06: Growth Analyst: Personas from Evidence

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · Codex (analyst subagents)

Surface: Codex (analyst subagents). Paste each prompt as written; change only what the lab tells you to.

PROMPT A — Codex: three analysts

Use three growth-analyst subagents in parallel, one per file: data/survey-responses.csv, data/enquiries.csv, data/checklist-results.csv. Each uses audience-insights: counts with code, n and the file on every claim, INFERENCE and LOW CONFIDENCE labels, enquiry quotes verbatim with ids. Combine the results into three personas with data/persona-template.md → strategy/personas.md.

PROMPT B — Codex: requirements

Use the growth-strategist and the content-creator subagents to write strategy/content-spec.md with data/content-spec-template.md: for each persona the top 3 questions, channels, formats, length, tone, proof, call to action and never-say – each with the evidence (file and count) behind it.
