

Lab 09 — Campaign 3: Newsletter and a Landing Page

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 2 · Codex (subagents) → @Sites → ChatGPT Work (@Gmail)

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 45 minutes · slides 95–99

Surface: Codex (subagents) → @Sites → ChatGPT Work (@Gmail)

Features: creator writes, website designer builds the lead-magnet page, analyst filters by consent, the Lead checks · drafts only

The story so far

The Sunny Sunday email books chats most cheaply. November's issue promotes a new landing page for the free checklist — and must reach only the 31 people who opted in.

Your goal

The Sunny Sunday email books chats most cheaply — if it is right and reaches only people who said yes. This issue promotes a new landing page for the Money Check-up Checklist.

You'll build

content/newsletter/2026-11/ (issue, HTML, text, recipients, excluded), web/checklist/ published, Gmail drafts

What is in this folder

- assets/newsletter-brief.md
- assets/newsletter-spec.md
- assets/landing-page-brief.md
- assets/site-brief.md
- assets/checklist-items.md
- assets/subscribers.csv
- prompts.md / prompts.pdf — every prompt, ready to paste
- evidence/checklist.md — what to capture as proof

Step by step

1. **Start the campaign** — Paste Prompt A.
2. **Approve the words** — Read issue.md and the page copy; approve nl-2026-11 in your own terminal.
3. **Publish the page** — The website designer runs page-qa and publishes web/checklist/ as @Sites.

4. **Check the list** — recipients.csv: only consent = yes and unsubscribed = no.
5. **Create the drafts** — Paste Prompt B.
6. **Send one test** — Send only the draft addressed to yourself, and read it on your phone.

The prompts

PROMPT A — Codex: the newsletter team

You are the Lead for the November Sunny Sunday email (data/newsletter-brief.md, data/newsletter-spec.md) and its landing page (data/landing-page-brief.md). Use subagents:

- content-creator: issue.md (id nl-2026-11) and the landing-page copy.
- website-designer: web/checklist/index.html with landing-page; page-qa.
- growth-analyst: recipients.csv and excluded.csv from data/subscribers.csv.

Check everything, then submit nl-2026-11. After I approve, build newsletter.html and .txt, and deploy web/checklist with @Sites (Only those invited).

PROMPT B — ChatGPT Work: Gmail drafts

Using @Gmail, create a DRAFT of the newsletter in content/newsletter/2026-11/newsletter.html (upload it) for each address in recipients.csv, plus one draft to me only. Send nothing. Report how many drafts and how many people were excluded, and why.

Check your work

- ☐ Three specialists worked on the campaign; the Lead checked all.
- ☐ You approved nl-2026-11 in your own terminal before the build.
- ☐ The landing page passed page-qa and is published.
- ☐ recipients.csv holds 31 people; excluded.csv lists 9 with reasons.
- ☐ The email has unsubscribe, address and disclaimer.
- ☐ Drafts only — nothing was sent to the list.

If it goes wrong

- **The build started before approval** — Tell the Lead the build waits for review/approvals.csv to say approved.

Stretch

- Ask for two subject lines to A/B test, with a reason for each.

Why it matters: Consent decides who gets mail — not the agent and not the deadline. Marketing to people who did not opt in breaks the PDPA.

Next

Lab 10 — Campaign 4: The YouTube Explainer. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in `.env`. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
