

Lab 10 — Campaign 4: The YouTube Explainer

Multi AI Agents Workflow for Content Creation (Claude Edition) · Day 2 · Claude Code (agent team, render, upload)

Course: Multi AI Agents Workflow for Content Creation (Claude Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 45 minutes · slides 101–105

Surface: Claude Code (agent team, render, upload)

Features: strategist angle · creator script · designer storyboard, thumbnail and render · approve twice · private upload

The story so far

Pre-retirees say they would rather watch than read. Rachel wants the first 'Money in Plain English' video, uploaded privately until she has watched it.

Your goal

Pre-retirees would rather watch than read. The team makes "Your CPF retirement sums in 60 seconds" — and it goes up privately until a person has watched it.

You'll build

content/video/ep01/: scenes.json, thumbnail, ep01.mp4, ep01.md, and a private YouTube upload (or dry run)

What is in this folder

- assets/youtube-brief.md
- assets/video-spec.md
- assets/sample-explainer.mp4
- solution/ — reference files from the verified build
- prompts.md / prompts.pdf — every prompt, ready to paste
- evidence/checklist.md — what to capture as proof

Step by step

1. **Script it as a team** — Paste Prompt A.
2. **Approve the script** — Read scenes.json and ep01.md; approve yt-ep01-script in your own terminal.
3. **Render it** — Paste Prompt B. The designer runs video-render.
4. **Approve the video** — Submit ep01.md, watch ep01.mp4 to the end, then approve yt-ep01.
5. **Upload** — Paste Prompt C. It goes up as private.
6. **Disclose** — In YouTube Studio, answer the altered or synthetic content question before making it public.

The prompts

PROMPT A — Claude Code: the video team

Create an agent team for YouTube episode 1 from data/youtube-brief.md. Spawn three teammates: growth-strategist (the angle and hook), content-creator (content/video/ep01/scenes.json, 5-7 scenes, and ep01.md with title, tags, description, chapters and the AI disclosure) and creative-designer (a storyboard of the scenes and a thumbnail, using brand-visuals). You fact-check and fin-compliance the script, then submit it as yt-ep01-script. Publish nothing.

PROMPTS B and C — Claude Code: render and upload

PROMPT B

Use the creative-designer subagent with video-render on the approved scenes.json → content/video/ep01/ep01.mp4 (data/video-spec.md). Check it with ffprobe. Do not change approved words.

PROMPT C

Run node scripts/publish.mjs yt-ep01 as a dry run. If I say "go", run it with --live: it uploads as PRIVATE. Give me the YouTube Studio link.

Check your work

- ☐ The strategist, creator and designer each delivered their part.
- ☐ You approved the script, then the finished video.
- ☐ ep01.mp4 is 1920x1080, under 90 seconds, every scene present.
- ☐ Every figure on screen matches facts-2026.md.
- ☐ The description has chapters, link, disclaimer and AI disclosure.
- ☐ The upload is private (or the dry run printed the request).

If it goes wrong

- **ffmpeg not found** — Install it, or use sample-explainer.mp4 to test the upload.

Stretch

- Ask the designer for a 30-second vertical Short from the same scenes.

Why it matters: Approve twice: once for the words, once for the finished video. Rendering can break what the script got right.

Next

Lab 11 — Campaign 5: Always On — the Weekly Growth Report. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in `.env`. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
