

Lab 01 — Build Your Marketing Agent Team

Multi AI Agents Workflow for Content Creation (ChatGPT Edition) · Day 1 · Use Codex

USE: CODEX — Codex, in your horizon-studio folder

Course: Multi AI Agents Workflow for Content Creation (ChatGPT Edition) (TGS-2023036153)

Day 1 · Topic 1 · about 30 minutes · slides 33–38

Surface: ChatGPT Project → Codex

Features: a ChatGPT Project with shared files · AGENTS.md · your own copy of Horizon's website

Copy the prompts: <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/chatgpt/#lab-1> — click **Copy** next to each prompt, then paste it into the chat.

The story so far

October 2026. Rachel has a website and a goal: 40 booked chats a month by March. She has no marketing team. Before you hire one made of agents, give it a home — shared rules, shared facts — and open your own copy of Horizon's website.

Your goal

Before anyone builds a team, the team needs a home: one folder of shared facts and rules, and your own copy of Horizon's website — the one every post links to.

You'll build

the Horizon Marketing project, horizon-studio/ with AGENTS.md, and your own copy of the site running at <http://localhost:8080/>

Horizon's website

You work on your own copy in `web/site/` of your folder; Labs 8 and 9 add to it. Ask "Start my website" to open it at <http://localhost:8080/> — every post links there. The public site is only for looking at; nobody changes it.

- **Your website (the link in every post):** <http://localhost:8080/>
- **Public site (to look at only):** <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/>

Folder structure

```
labs_chatgpt/
├── horizon-studio/      ← choose this folder
│   ├── content/        posts, newsletter, scripts (agents fill it)
│   ├── data/           every lab's briefs and data, ready to read
│   ├── README.md
│   ├── reports/        campaign results, the weekly report
│   ├── research/       market and competitor research
│   ├── review/         approvals
│   ├── strategy/       briefs, personas, calendar
│   └── web/
│       └── site/
│           └── index.html the local copy of Horizon's site
```

What is in this folder

.md or .pdf? A .md file (Markdown) is plain text that Claude reads. Every .md here has a .pdf twin with the same name — open the PDF to read it yourself.

- assets/horizon-site.html
- assets/team-charter.md
- assets/business-brief.md
- assets/brand.md
- assets/facts-2026.md
- assets/compliance-checklist.md
- solution/ — reference files from the verified build (each .md with its .pdf)
- prompts.md / prompts.pdf — every prompt, ready to paste
- evidence/checklist.md / checklist.pdf — what to capture as proof

Step by step

1. **Choose the folder** — In Codex create a local project and choose labs_chatgpt/horizon-studio. It is ready-made — do not create one.
2. **Make the Project** — In ChatGPT create the Project "Horizon Marketing" with the charter, brand, facts and compliance files. Copy and paste Prompt A as its instructions.
3. **Plan your team** — In Codex, copy and paste Prompt B. Answer as Horizon's owner and pick your team — keep the six charter roles. It is a plan only: Lab 2 builds the agents.
4. **Write the charter** — After Codex saves data/team-design.md, copy and paste Prompt C. Open AGENTS.md — every agent reads it.
5. **Open the website** — Ask: "Start my website." It opens at <http://localhost:8080/> — your own copy of Horizon's website; every post links to it. Check the calculator shows S\$693,138.

The prompts

PROMPT A — ChatGPT Project: instructions

You support Horizon Wealth Planning's AI marketing team. Use the project files: team-charter.md for who does what, brand.md for the voice and look, facts-2026.md for every number, and compliance-checklist.md before anything is shown to a person. Never publish or send anything.

PROMPT B — Codex: plan your team

Act as a marketing consultant. Interview me, the owner of Horizon Wealth Planning, to plan my AI marketing team. Ask one question at a time and wait for my answer: my goal, what success looks like by March 2027, who we want to reach, which channels we use, how much we publish each week, and who approves before anything goes out.

Then list 8 to 10 team members I could have, numbered, each with a one-line job. Include the six roles in data/team-charter.md and mark the ones you recommend. Wait for me to choose.

Save my answers and my chosen team, with each member's job, to data/team-design.md. This is a plan only: do not create any agent files yet.

PROMPT C — Codex: the charter

Read data/team-charter.md, data/team-design.md and data/business-brief.md. Write AGENTS.md for this studio in four sections — What this is, The team, Rules, Files — under 60 lines. The team is the one I chose in data/team-design.md. Rules: every number comes from data/facts-2026.md; every piece passes fact-check and fin-compliance; nothing is published or sent without a person's approval (the one exception: a review email to the approver); anything shown to me is in plain English for a business owner, with no codes, IDs, file names or line numbers.

In Files, add two lines:

- Our copy of the site, which we edit: web/site/.

"Start my website" runs scripts/serve-site.mjs in the background and opens <http://localhost:8080/>

- Every post links to <http://localhost:8080/> with UTM tags, never to a claude.ai artifact link.

Check your work

- ☐ The Horizon Marketing project holds the four files and the instructions.

- ☐ data/team-design.md holds your answers and the team you chose, with the six charter roles in it — and no agent files yet.
- ☐ AGENTS.md has the four sections and is under 60 lines.
- ☐ Its rules name the facts sheet, the two checks and the human approval.
- ☐ AGENTS.md names your copy of the site and the link every post points to.
- ☐ Your website opens at <http://localhost:8080/>; the calculator shows S\$693,138.

If it goes wrong

- **The website does not open** — Say: "Start my website again." If the page still does not load, say: "Open web/site/index.html in my web browser."
- **It created agent files already** — Not yet — say "Move everything in agents/ to _archive/. We build the team in Lab 2." The plan in data/team-design.md is all Lab 1 needs.

Stretch

- Ask: "Read web/site/index.html. In five bullets: who it is for, the offer, the main call to action, what the calculator does, and the disclaimer."
- Ask for a one-paragraph summary of the site from the point of view of a busy 35-year-old parent.

Why it matters: Shared context first, agents second. Every agent you add later starts from these files, so a wrong rule here is wrong everywhere.

Next

Lab 2 — Form the Team: Instructions for Each Agent. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file — tokens live only in .env. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
