

Evidence — Lab 05: Audience Research and Personas from Evidence

Multi AI Agents Workflow for Content Creation · Day 1 · Claude Cowork (sub-agents)

Capture a screenshot or file for each line. Evidence beats a description.

- ☐ Three analyst sub-agents ran, one per file.
- ☐ Every persona statement carries a count and a file.
- ☐ The 60+ group is marked LOW CONFIDENCE (n = 12).
- ☐ The most-unticked checklist item is named (retirement number).
- ☐ Enquiry quotes are verbatim, with ids.
- ☐ content-spec.md has every field for every persona.

Notes

What did not work first time, and what you changed:

What you did NOT verify:
