

Lab 09 — The Lead Magnet: a Checklist and Its Welcome Emails

Multi AI Agents Workflow for Content Creation (Claude Edition) · Day 2 · Use Claude Code

USE: CLAUDE CODE — Code mode (the `</>` button) in the Claude desktop app, in your horizon-studio folder

Course: Multi AI Agents Workflow for Content Creation (Claude Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 40 minutes · slides 100–107

Surface: Claude Code (artifact, Gmail drafts, Marketing plugin, your Horizon skills)

Features: lead-magnet skill · a printable A4 checklist as an artifact · the Marketing plugin's email sequence · newsletter and sunny-voice · drafts only

Copy the prompts: <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/claude/#lab-9> — click **Copy** next to each prompt, then paste it into the chat.

The story so far

Day 2. Before the campaign weeks start, Rachel wants the thing that turns readers into leads: the Money Check-up Checklist, designed to be downloaded, and the emails that follow it.

Your goal

The Money Check-up Checklist is what turns a reader into a lead. Make it worth downloading — a branded checklist — and write the welcome emails that follow the download.

You'll build

the Money Check-up Checklist as a printable A4 page (artifact and PDF) and on your copy of Horizon's website, and three welcome emails — shown as artifacts, with a Word copy of each

What is in this folder

.md or .pdf? A .md file (Markdown) is plain text that Claude reads. Every .md here has a .pdf twin with the same name — open the PDF to read it yourself.

- assets/checklist-items.md
- assets/brand.md
- prompts.md / prompts.pdf — every prompt, ready to paste
- evidence/checklist.md / checklist.pdf — what to capture as proof

Step by step

1. **New session** — Left sidebar: click + next to horizon-studio. Click the session title at the top and rename it "Lab 9". Run all of this lab's prompts in it.
2. **Design it** — Copy and paste Prompt A. The checklist opens as an artifact; ask in the chat for any change.
3. **Write the welcome emails** — After the checklist looks right, copy and paste Prompt B. The three emails also appear as drafts in your Gmail.
4. **Check it** — After the three emails are saved, copy and paste Prompt C.
5. **Put it on the website** — After the checks pass, copy and paste Prompt D. Your copy of the website opens in your browser, with the checklist behind an email box.

The prompts

PROMPT A — Claude Code: the checklist

Use the lead-magnet skill. Turn data/checklist-items.md into the "Money Check-up Checklist": a title with one promise, the ten items as tick boxes, one figure from data/facts-2026.md, the next step (book a free chat) and the full disclaimer. Lay it out as a printable A4 page in the colours and fonts in data/brand.md and publish it as an artifact. Save a PDF of it in content/lead-magnet/.
Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: the welcome emails

Use the Marketing plugin's email sequence to write three welcome emails for people who download the checklist: day 0 (here it is), day 3 (the item most people miss — the retirement number), day 7 (book a free chat). Follow the newsletter and sunny-voice skills → content/email/welcome-sequence.md.
Then, using the Gmail connector, create the three emails as DRAFTS in my Gmail, addressed to me. Send nothing.
Publish the three emails as an artifact: one tab per email, laid out as it will look in the inbox.
Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT C — Claude Code: check it

Run fact-check and fin-compliance on the checklist text and the three emails. Show the issues in one table, with a fix for each. Once I agree, make the fixes in the files and in the Gmail drafts. Publish the table as an artifact, coloured by severity. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT D — Claude Code: put it on the website

Add the checked Money Check-up Checklist to Horizon's website in web/site/index.html, as a new section before the reviews, in the site's style: the title and promise, what's inside, and an email box with a required consent tick box. Once a valid email is entered, show the ten items as tick boxes and a "Print or save as PDF" button. Add "Free checklist" to the menu. Change nothing else on the site. Then open web/site/index.html in my web browser.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Which checklist item do people most often miss, and why does it matter?"
- "Read the day 3 email as a 55-year-old. Is anything unclear?"
- "Explain each issue in one line: what is wrong, and the fix."

Check your work

- ☐ The checklist uses Horizon's colours and all ten items.
- ☐ It makes one promise and ends with the full disclaimer.
- ☐ Three emails, each with a subject under 50 characters, are drafts in your Gmail — nothing was sent.
- ☐ Each email has one call to action, unsubscribe and the disclaimer.
- ☐ fin-compliance shows no Critical or High issue.
- ☐ The checklist is on your copy of the website: email and consent first, then the ten tick boxes.

If it goes wrong

- **No drafts in Gmail** — Type /mcp: Gmail must be connected (Lab 4). Then say "create the Gmail drafts again".
- **The PDF is missing** — Say: "save the checklist as a PDF in content/lead-magnet/".

Stretch

- Ask for a 1080x1350 social card that promotes the checklist, published as an artifact.

Why it matters: A lead magnet earns an email address. Give real value first; the call to action comes last.

Next

Lab 10 — Campaign 2: Social Media Posts (Demo). Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
