

Lab 10 — Campaign 2: Social Media Posts (Demo)

Multi AI Agents Workflow for Content Creation (Claude Edition) · Day 2 · Use Claude Code

USE: CLAUDE CODE — Code mode (the `</>` button) in the Claude desktop app, in your horizon-studio folder

Course: Multi AI Agents Workflow for Content Creation (Claude Edition) (TGS-2023036153)

Day 2 · Topic 3 · about 40 minutes · slides 115–121

Surface: Claude Code (agent team) → LinkedIn, Facebook

Features: the publisher kit and its hook · an agent team: creator, designer, Lead · teammates message each other · human approval → you post

Copy the prompts: <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/claude/#lab-10> — click **Copy** next to each prompt, then paste it into the chat.

The story so far

Week 1 of the campaign starts Monday. As a demo, one LinkedIn post and one Facebook post, each with a visual — and Rachel's one rule: nothing goes out unless a person approved that exact version.

Your goal

A demo of Week 1: one LinkedIn and one Facebook post, each with a visual. Copy and design must agree, the Lead must check every claim — and only a person can approve.

You'll build

two posts with images, reviewed, approved by you and posted by you (or, optionally, through the API) — shown as artifacts, with a Word copy of each

What is in this folder

.md or .pdf? A .md file (Markdown) is plain text that Claude reads. Every .md here has a .pdf twin with the same name — open the PDF to read it yourself.

- assets/social-brief.md
- assets/publisher-kit/
- assets/publishing-spec.md
- assets/approvals-format.csv
- assets/connect-accounts.md
- assets/env.example
- assets/sample-calendar.csv
- solution/ — reference files from the verified build (each .md with its .pdf)

- `prompts.md` / `prompts.pdf` — every prompt, ready to paste
- `evidence/checklist.md` / `checklist.pdf` — what to capture as proof

Step by step

1. **New session** — Left sidebar: click + next to horizon-studio. Click the session title at the top and rename it "Lab 10". Run all of this lab's prompts in it.
2. **The gate is on** — Your studio folder came with the approval gate and agent teams switched on — nothing to install.
3. **Test the gate** — Ask Claude to approve a post itself. The gate must block it.
4. **Start the team** — Copy and paste Prompt A. Teammates appear in the panel; ↑ ↓ and Enter open one; Ctrl+T shows the task list.
5. **Watch them talk** — The designer asks the creator for each post's hook; the Lead sends fixes back.
6. **Approve as a person** — Review in the artifact (or open the review email and click its link). Click Approve or Request changes on each post, then Copy in the bottom bar and paste into the chat.
7. **Get ready to post** — After you have approved the posts, copy and paste Prompt B. Each post appears with a Copy button for its text, and the folder with the two images opens on your computer.
8. **Post it yourself** — Paste the text, add the image, Post — on LinkedIn and a test Facebook Page. Or stop at the preview.
9. **Optional: post via the API** — Connect test accounts (`connect-accounts.pdf`). Dry run, then say go — not for posts you posted by hand.

The prompts

PROMPT A — Claude Code: the social team

Create an agent team for Week 1 social from data/social-brief.md and strategy/calendar.csv. Spawn two teammates using the agent types content-creator and creative-designer; you are the Lead.

- content-creator: 1 LinkedIn + 1 Facebook post with linkedin-post, facebook-post and copywriting, one file each in content/social/week-01/, with the frontmatter in data/publishing-spec.md.
- creative-designer: one image per post (a rendered card in Horizon colours: LinkedIn 1200 x 627, Facebook 1080 x 1080) with alt text; message the creator for each post's hook before designing. Save each as a PNG beside its post and fill in the post's image and alt lines.
- You: fact-check and fin-compliance on every post and image; message fixes to the teammate who owns it.

Before you start, ask me how I will review: in the artifact, or by email (then ask for the approver's address). When a post passes, submit it for review with scripts/submit.mjs. Publish the two posts as an artifact, each as it will look in the feed, with its image and alt text; under each post put two working buttons (JavaScript): Approve turns the card green; Request changes opens a box for my note. A bar at the bottom asks my name once, builds the exact lines to paste in the chat ("approved <id> by <name>", "changes <id>: <note>") and has a Copy button that says "Copied - now paste it in the chat". Keep the lines on screen in case copying is blocked. If I chose email, send ONE review email to the approver with Gmail: the artifact link and what passed the checks. Send nothing else; publish nothing.

Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

PROMPT B — Claude Code: ready to post

For each Week 1 post approved in review/approvals.csv, publish a "ready to post" artifact: the post text with a Copy button, its image, and the steps to post it by hand on LinkedIn or our Facebook Page. Then open the folder with the two images on my computer. Publish nothing yourself. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

Ask about the result

Once a result opens, type any of these in the chat to get its meaning. Ask until it makes sense to you — then decide.

- "Which post do you expect to do best, and why?"
- "What did the Lead send back to the writer, and why?"
- "Is anything here not ready to post? Explain in plain English."

Check your work

- ☐ The gate stopped Claude from approving.
- ☐ Two teammates ran; the task list showed their tasks.
- ☐ The designer and the creator messaged each other.
- ☐ Two posts with images from the designer, alt text and UTM links.
- ☐ You reviewed in the artifact or by email and pasted the approval in the chat; the rows show your name and a hash.
- ☐ You posted the approved text and image yourself (or, optionally, through the API after you said go).

If it goes wrong

- **You got subagents, not a team** — Start a new session in your studio folder and ask for "an agent team" by name.
- **LinkedIn returns 426** — LINKEDIN_VERSION must be a recent YYYYMM.

Stretch

- Add the growth-analyst to suggest the best posting time per post from channel-benchmarks.csv.
- Link each LinkedIn post to the Lab 8 blog article.

Why it matters: Subagents report to one boss; teammates also talk to each other. A designer who can ask the writer for the hook makes a better image.

Next

Lab 11 — Campaign 3: Newsletter and a Landing Page. Keep what you built — the next lab starts from it.

Safety

Use only this lab's synthetic data and your own accounts. Never paste a real API key, password, token or client data into a prompt or a file. Every email address in the data must resolve to your own inbox. Nothing is published or sent without a person approving that exact version.
