# Multi AI Agents Workflow for Content Creation

**Tertiary Infotech Academy Pte Ltd**
UEN: 201200696W

www.tertiarycourses.com.sg | enquiry@tertiaryinfotech.com | +65 6100 0613

© Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

# Digital Attendance

**Attendance is mandatory for SSG funding.**

Take AM, PM and Assessment digital attendance for every session.

Use the SSG / TMS QR code provided by your trainer.

**Minimum 75% attendance required**

© Tertiary Infotech Academy Pte Ltd

# About the Trainer

**[ Trainer Name ]**

[ Title / Role ]

Qualifications: _____

Expertise: _____

Experience: _____

Contact / Profile: _____

© Tertiary Infotech Academy Pte Ltd

# About the Trainer

PhD-qualified trainer specialising in AI, software engineering and developer tooling.

Builds AI marketing teams of agents with ChatGPT and Codex.

Trains professionals across Singapore on practical, project-based AI skills.

Certifications: PMP, AWS, Microsoft, CompTIA, CKA, CKAD.

INTRODUCTION

# Let's Know Each Other

Take a minute to introduce yourself to the class:

**Your name & role**

**What you do day to day**

**Your content work today**

**What you want from this course**

© Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

# Ground Rules

### Phones on silent

Step out quietly for calls or breaks.

### Participate actively

No question is stupid — ask freely.

### Mutual respect

Agree to disagree; one conversation at a time.

### Be punctual

Return from breaks on time.

### 75% attendance

Required for funding eligibility.

### Stay hands-on

Follow along with every activity.

© Tertiary Infotech Academy Pte Ltd

ASSESSMENT

# Briefing for Assessment

### Clear your space

Place phones and other materials under the table or on the floor.

### No recording

No photos or recording of assessment materials.

### Open book

Only slides, learner guide and approved materials are allowed.

### Work individually

Complete the assessment on your own; no discussion.

### Manage your time

Written Assessment then Practical Performance — watch the clock.

### Appeals

An appeal process is available if you disagree with the outcome.

© Tertiary Infotech Academy Pte Ltd

ASSESSMENT

# Assessment & Funding

## Final Assessment

- Written Assessment (WA) — 1 hour, starts 4:00 PM
- Practical Performance (PP) — 1 hour
- Format: Open book — class ends 6:00 PM
- Allowed: slides, learner guide & approved materials only
- Appeal process available

## Criteria for Funding

**Minimum 75% attendance**

Based on SSG digital attendance records.

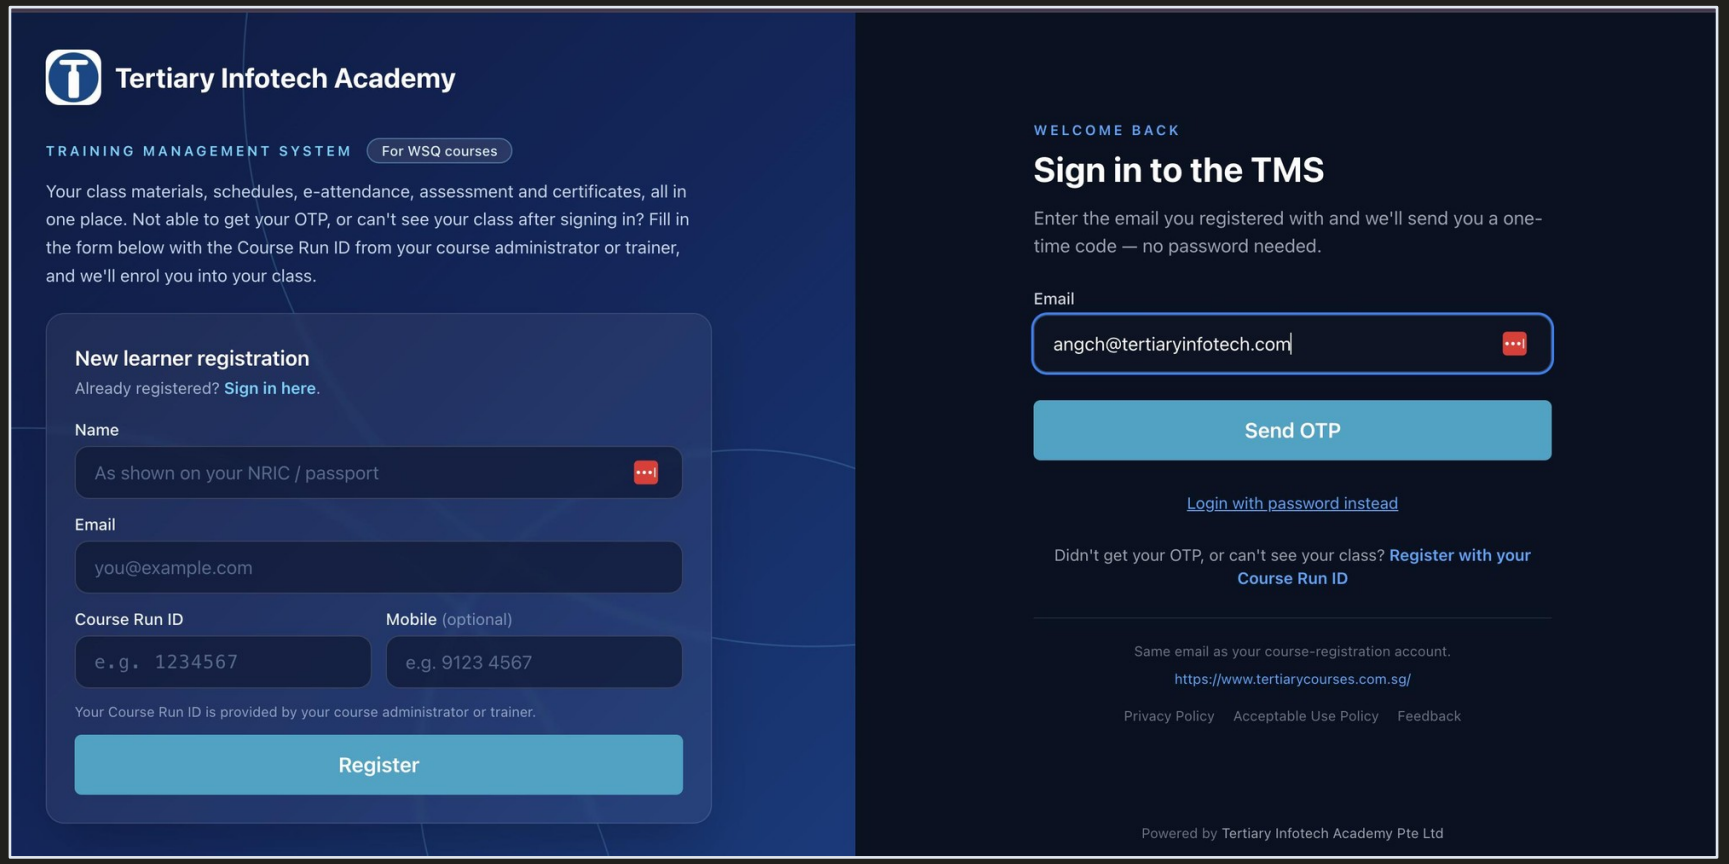

**Assessed as ‘Competent’**

Complete and pass both assessment components.

© Tertiary Infotech Academy Pte Ltd

COURSE PORTAL

# Login to LMS and Download Course Material

Log in at lms-tms.tertiaryinfotech.com with your registered email and the OTP sent to your inbox, then open this course to download the slides and Learner Guide.

© Tertiary Infotech Academy Pte Ltd

LEARNING MANAGEMENT SYSTEM

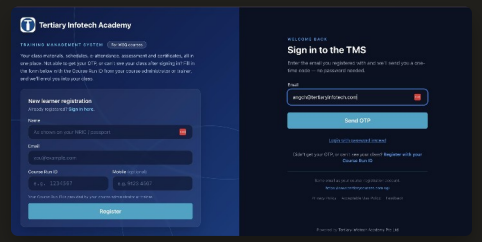

# Courseware & Assessment on the LMS

## Download the courseware

Get the slides and learner guide from the LMS for the open-book assessment.

## Take the assessment

Complete the Written Assessment and Practical Performance on the LMS.

## Log in

Use your enrolled account to access the course materials and assessment.

LMS: https://lms-tms.tertiaryinfotech.com/

© Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

# Certification & TRAQOM Survey

## TRAQOM Survey (Mandatory)

Complete the certification & TRAQOM survey to receive your certificate.

https://lms-tms.tertiaryinfotech.com/

## Digital Attendance

Remember to take AM, PM and Assessment digital attendance — required for your funding.

© Tertiary Infotech Academy Pte Ltd

WHAT YOU WILL ACHIEVE

# Learning Outcomes

By the end of the two days you will be able to:

## LO1 · Conceptualise

Conceptualise content ideas that meet marketing objectives, and map them into digital storyboards.

## LO2 · Identify

Identify content requirements from customer preferences, and decide how often to publish.

## LO3 · Determine

Determine content types and styles, and the modes and processes for distributing content.

## LO4 · Develop

Develop guidelines for executing the content strategy, with suitable delivery modes and responsible AI practices.

© Tertiary Infotech Academy Pte Ltd

ROADMAP

# Course Outline

Four topics over two days. Day 1 forms the team; Day 2 runs its campaigns.

01

## T1 · Ideation and Storyboarding

The studio, the team's instructions, skills and connectors; Campaign 1. Labs 1–5.

02

## T2 · Audience and Requirements

Personas from evidence; cadence and calendar; the first blog article. Labs 6–8.

03

## T3 · Creation and Coordination

Lead magnet, social week, newsletter + landing page, video — behind a human gate. Labs 9–12.

04

## T4 · Distribution and Responsible AI

The weekly report on a schedule; the playbook; subagents at work. Labs 13–15.

© Tertiary Infotech Academy Pte Ltd

# Lab Materials

Fifteen labs, each in its own folder with a README, prompts (MD and PDF), assets, an evidence checklist and, where useful, a solution.

| DAY | LABS | TOPIC |
|---|---|---|
| **1** | 1 Agent team · 2 Instructions · 3 Skills · 4 Connectors | T1 · form the team |
| **1** | 5 Campaign 1: research to storyboard | T1 · Campaign 1 |
| **1** | 6 Personas · 7 Cadence and calendar · 8 Blog article | T2 · audience, content |
| **2** | 9 Lead magnet · 10 Social week · 11 Newsletter + landing page · 12 Video | T3 · Campaigns 2–4 |
| **2** | 13 Weekly report · 14 Playbook · 15 Subagents: debate + QA loop | T4 · Campaign 5 |

TIP One horizon-studio folder from Lab 1 to Lab 15 — the team keeps what it learns.

© Tertiary Infotech Academy Pte Ltd

# ChatGPT or Codex?

Every lab says which to use. The rule: ChatGPT to create and schedule; Codex when the agents work on files.

| USE | LABS | WHAT IT IS FOR |
|---|---|---|
| **ChatGPT** | 8, 9 | One person creating or designing. |
| **Codex** | 1, 2, 5, 6, 7, 10, 12, 14, 15 | The team's files: role cards, skills, subagents, scripts, the video. |
| **Codex, then ChatGPT** | 3 | Build in Codex, then share in ChatGPT. |
| **ChatGPT, then Codex** | 4 | Install plugins, then test the agents. |
| **Codex, then ChatGPT Work** | 11 | Build in Codex; Gmail drafts in ChatGPT Work. |
| **ChatGPT Work** | 13 | Scheduled tasks and plugins. |

TIP Both work on the same horizon-studio folder, so whatever one makes, the other can open.

© Tertiary Infotech Academy Pte Ltd

SCHEDULE

# Lesson Plan (9:00 AM – 6:00 PM)

Tea breaks 10 min, lunch 45 min. Full timings and slide numbers are in the Lesson Plan.

| BLOCK | DAY 1 — FORM THE TEAM | DAY 2 — RUN THE CAMPAIGNS |
|---|---|---|
| **Morning 1** | 9:00–10:30 Welcome · Topic 1 · Lab 1 | 9:00–10:40 Topic 3 · Labs 9–10 |
| **Morning 2** | 10:40–12:40 Labs 2–3 | 10:50–12:35 Labs 11–12 · recap |
| **Afternoon 1** | 13:25–15:20 Labs 4–5 | 13:20–15:00 Topic 4 · Labs 13–14 |
| **Afternoon 2** | 15:30–18:00 Topic 2 · Labs 6–8 · review | 15:10–16:00 Subagents lab · summary · 16:00–18:00 Assessment |

TIP Day 2 assessment: Written Assessment 4:00–5:00 PM, Practical Performance 5:00–6:00 PM.

© Tertiary Infotech Academy Pte Ltd

TOPIC 1

# Multi-AI-Agent Content Ideation and Digital Storyboarding

1. AI agents, the tools, and Horizon's story
2. Why a team of agents
3. A home for the team; Horizon's public website
4. Form the team: instructions, skills, connectors
5. Campaign 1: research, ideas and a storyboard

© Tertiary Infotech Academy Pte Ltd

# The OpenAI Suite of Products

OpenAI's products share the same models — they differ in where they run and who they are for.

### ChatGPT

Chat and Work in one app — web, desktop and mobile. Ask, write, analyse; run multi-step tasks with plugins.

### Codex

The agentic tool for building: it works on a folder of files. The team's home in this course.

### Sites

Pages published from a chat with @Sites (beta on Plus, Pro and workspaces).

### Dots

Persistent agents with their own cloud computer (Pro, Business Premium).

### Workspace agents

Shared agents with apps and triggers (Business, Enterprise, Edu).

### ChatGPT Space

Shared pages where people, ChatGPT, Codex and Dots work together.

© Tertiary Infotech Academy Pte Ltd

# What Is ChatGPT (Chat + Work)?

One desktop app: the toggle above the composer picks Chat or Work, and the sidebar holds Codex.

## Chat

Ask, draft, analyse and research; Projects keep shared files and instructions (Lab 1).

## Work

Launched 9 July 2026: runs multi-step tasks with plugins, such as Google Drive and Gmail.

## Plugins and skills

Plugins bundle apps, skills and app templates; build your own skills with @skill-creator.

## Sites and scheduled tasks

Pages published with @Sites; tasks on a schedule — 5 active on Plus, 15 on Pro.

© Tertiary Infotech Academy Pte Ltd

# What Is Codex?

An agentic tool: describe a goal in plain English and Codex plans, writes, runs and checks the work — editing files and running commands for you.

## Runs where you work

In the ChatGPT desktop app's sidebar, on a folder on your computer.

## Agentic

Plans multi-step tasks and acts on them — not just answers or autocompletes.

## Tool-using

Reads and writes files, runs commands in a sandbox, makes images with $imagegen.

## Extensible — the team's home

AGENTS.md, role cards, skills, subagents and hooks. You build Horizon's team here (Labs 1–7, 10–12, 14, 15).

© Tertiary Infotech Academy Pte Ltd

# Dots and Workspace Agents

Always-on agents on the higher plans. Not needed for the labs — good to know.

## Dots

Announced at OpenAI DevDay, 29 September 2026: a persistent agent with its own cloud computer that keeps working after you close the chat. The first Dot is included on Pro and Business Premium.

## Kept in check

Background research is read-only. Custom Rules permit, require approval for, or prohibit actions; Activity View shows its work.

## Workspace agents

Business, Enterprise and Edu: Agents in the sidebar → describe a workflow → add apps → choose a trigger.

© Tertiary Infotech Academy Pte Ltd

# Which Plan Has What

Features by ChatGPT plan, checked 8 Oct 2026. Prices change — check chatgpt.com/pricing.

| FEATURE | PLANS | IN THIS COURSE |
|---|---|---|
| **ChatGPT Work, Codex** | Plus, Pro, Business, Enterprise | Every lab |
| **Sites** | Plus, Pro and workspaces (beta) | Lab 11 |
| **Plugins and skills** | Paid plans | Labs 3, 4, 13 |
| **Scheduled tasks** | Paid plans — 5 active on Plus, 15 on Pro | Lab 13 |
| **Dots (first one included)** | Pro, Business Premium | Good to know |
| **Workspace agents** | Business, Enterprise, Edu | Good to know |

TIP This edition builds the team with skills and Codex subagents, so it works on Plus and Pro.

© Tertiary Infotech Academy Pte Ltd

# A Brief History of AI, 2023–2026

## Prompt Engineering

2023

ChatGPT goes mainstream; Anthropic launches Claude (March). Results depend on how you word the prompt.

## Context Engineering

2024

Models call tools. Anthropic open-sources the Model Context Protocol (Nov). Results depend on what the model can see.

## Harness Engineering

2025

E.g. Claude Code and Codex. The system around the model gives rise to agentic AI: task-oriented agents that plan, act and check their work.

## AI Agents

2026

Always-on agents that work 24/7 on their own, e.g. OpenClaw, Hermes Agent and ChatGPT Dots.

From wording one prompt, to curating context, to engineering the system around the model — and now, agents that work around the clock.

© Tertiary Infotech Academy Pte Ltd

# What Is a Harness?

The model is the brain. The harness is everything built around it that turns a model into an agent able to finish long tasks.

## The agentic loop

Plans, acts, checks the result and repeats until the goal is met.

## Tools and context

Files, commands, search and connectors (MCP); instructions, memory and skills loaded at the right moment.

## Guardrails and checks

Permission modes, approvals, hooks and tests — what it must ask before it acts.

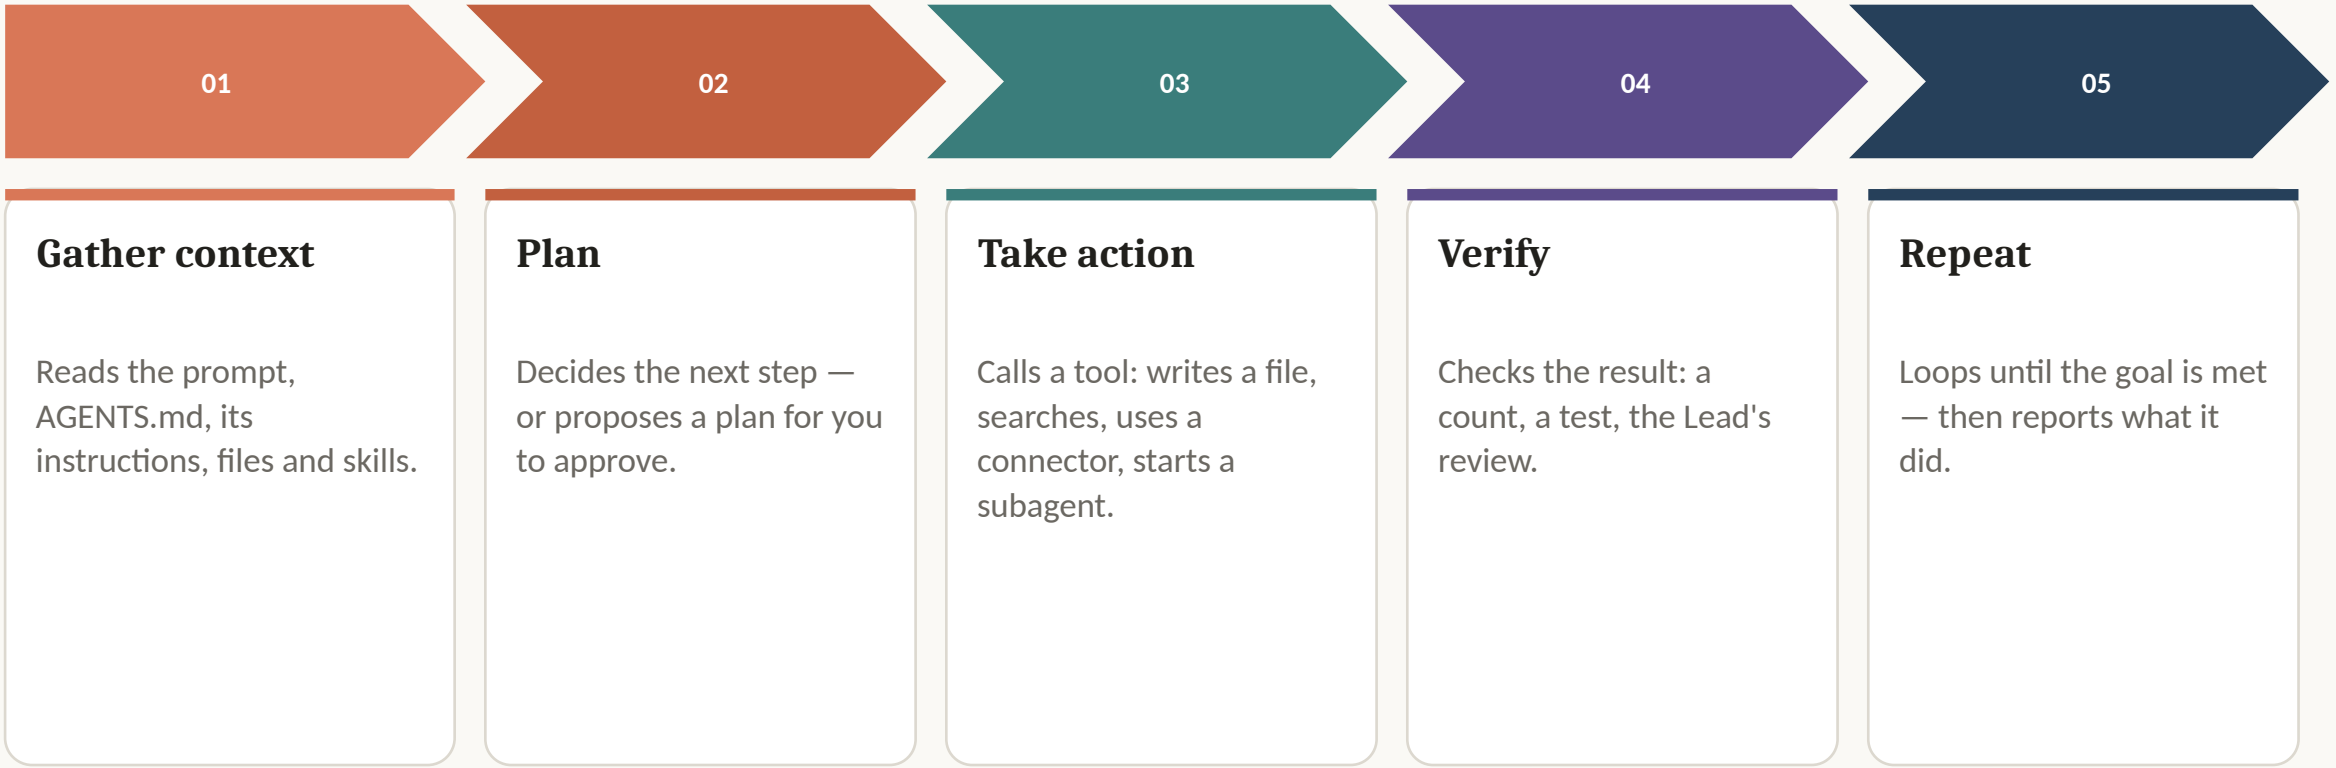

## Harnesses you will meet

Codex and ChatGPT Work in class; also Claude Code, Gemini CLI, Hermes Agent and OpenClaw.

© Tertiary Infotech Academy Pte Ltd

# The Agentic Loop

Every agent runs the same repeating cycle. A team is several loops, side by side.

TIP Goal in → context → action → verification → repeat → goal met.

© Tertiary Infotech Academy Pte Ltd

# Why the Loop Matters

Running a team of agents is steering loops, not typing commands.

## Give direction, not micro-steps

State the goal, the inputs and "done when". Let each loop work out the steps.

## Verification is everything

An agent is only as good as its checks: a facts sheet, a test, the Lead's review.

## Steer mid-loop

Read the plan, interrupt, correct the course — do not wait for a wrong final answer.

## Context is the fuel

What an agent can see decides what it can do: the brief, the data, the skills.

© Tertiary Infotech Academy Pte Ltd

# Agentic AI vs AI Agents

Both use tools, skills and memory. The difference is how long they live and what starts them.

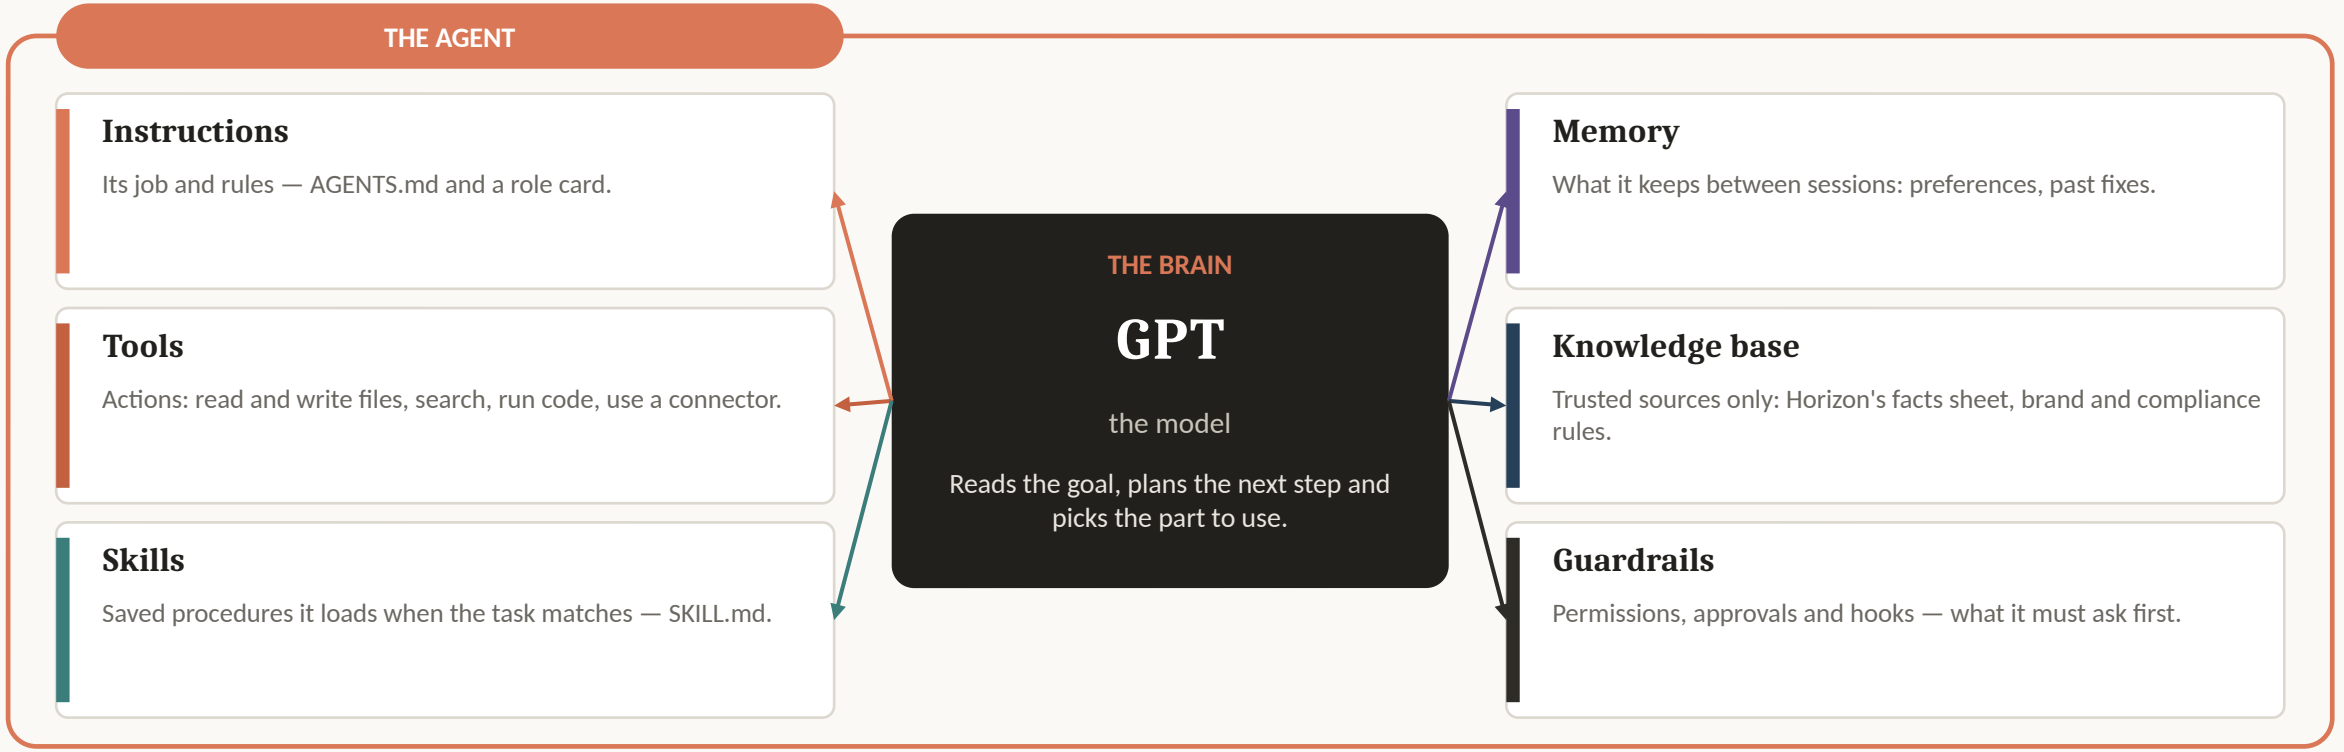

| FEATURE | AGENTIC AI — TASK-ORIENTED | AI AGENTS — ALWAYS ON, 24/7 |
|---|---|---|
| **Tool calling** | Yes — files, search, connectors, subagents. | Yes — plus chat apps, the browser and other agents. |
| **Skills** | Yes — loads SKILL.md procedures when the task matches. | Yes — and can write and improve its own skills. |
| **Memory** | Within the task, plus project memory across sessions. | Long-term memory about you and your work. |
| **Availability** | Starts when you give it a task; stops when done. | Runs 24/7 on a computer or server. |
| **Started by** | You, with a task. | You, a schedule, a message or another agent. |
| **In this course** | Codex running a campaign (Labs 1–12). | The scheduled weekly report (Lab 13); Dots, if your plan has them. |

TIP Rule of thumb: a job with an end → agentic AI; a job that recurs → an always-on agent.

© Tertiary Infotech Academy Pte Ltd

# What Is an Agent Made Of?

A model on its own can only answer. Wrap it with these parts and it can act — and check what it did.

You build every one of these for Horizon's six agents in Labs 2–4.

© Tertiary Infotech Academy Pte Ltd

THE SCENARIO

# Build a Marketing Team, Then Run Campaigns

Horizon Wealth Planning has a website, a goal of 40 booked chats a month — and no marketing team. You build one, made of AI agents.

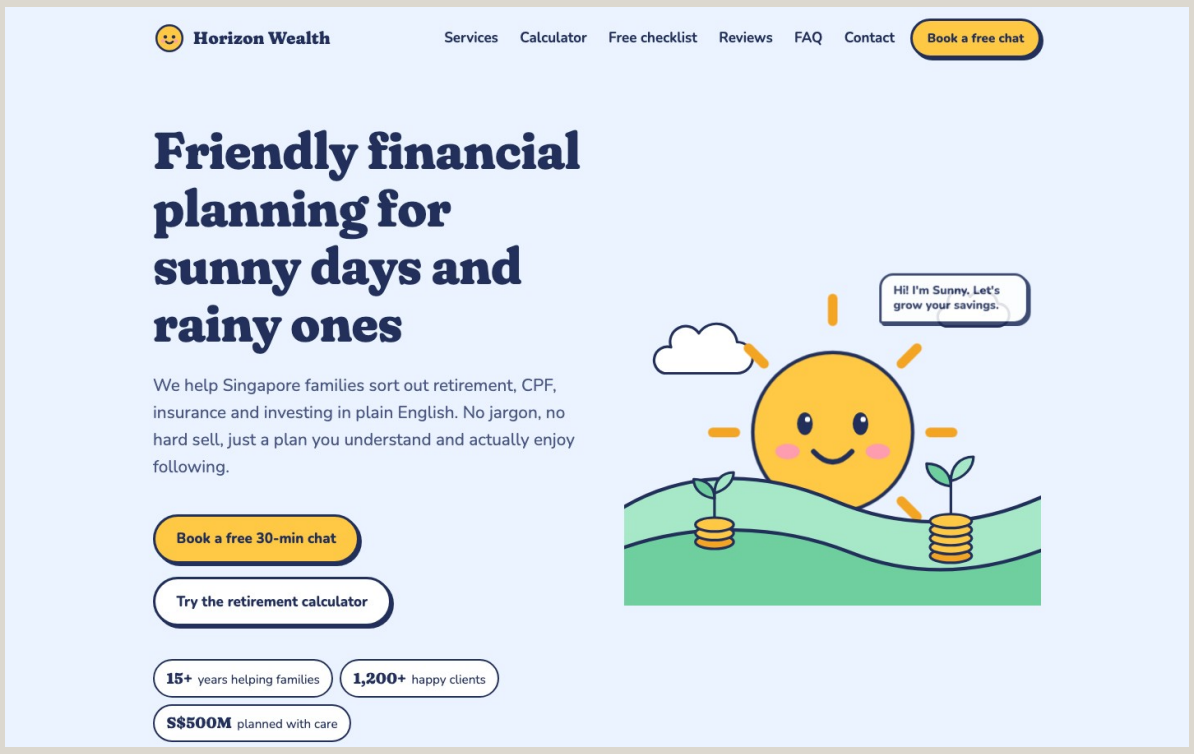

| 01 | 02 | 03 | 04 | 05 | 06 |
|---|---|---|---|---|---|
| **Form the team** | **Campaign 1** | **Know the audience** | **First content** | **Campaigns 2–4** | **Campaign 5** |
| A Lead and five specialists: instructions, skills, connectors (Labs 1–4). | Research, ideas and a storyboard (Lab 5). | Personas, requirements, cadence (Labs 6–7). | A blog article and the lead magnet (Labs 8–9). | Social week, newsletter + landing page, video (Labs 10–12). | Always on: the weekly report; the playbook (13–14). |

© Tertiary Infotech Academy Pte Ltd

THE SCENARIO

# Meet Horizon Wealth Planning

The firm's public website — the same link for every learner. You do not build it; every campaign points back here.

WEBSITE [tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation](tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation)

### Plain English

Retirement, CPF, insurance and investing — no jargon, no hard sell.

### One goal

Turn visitors into booked free 30-minute chats.

### Regulated

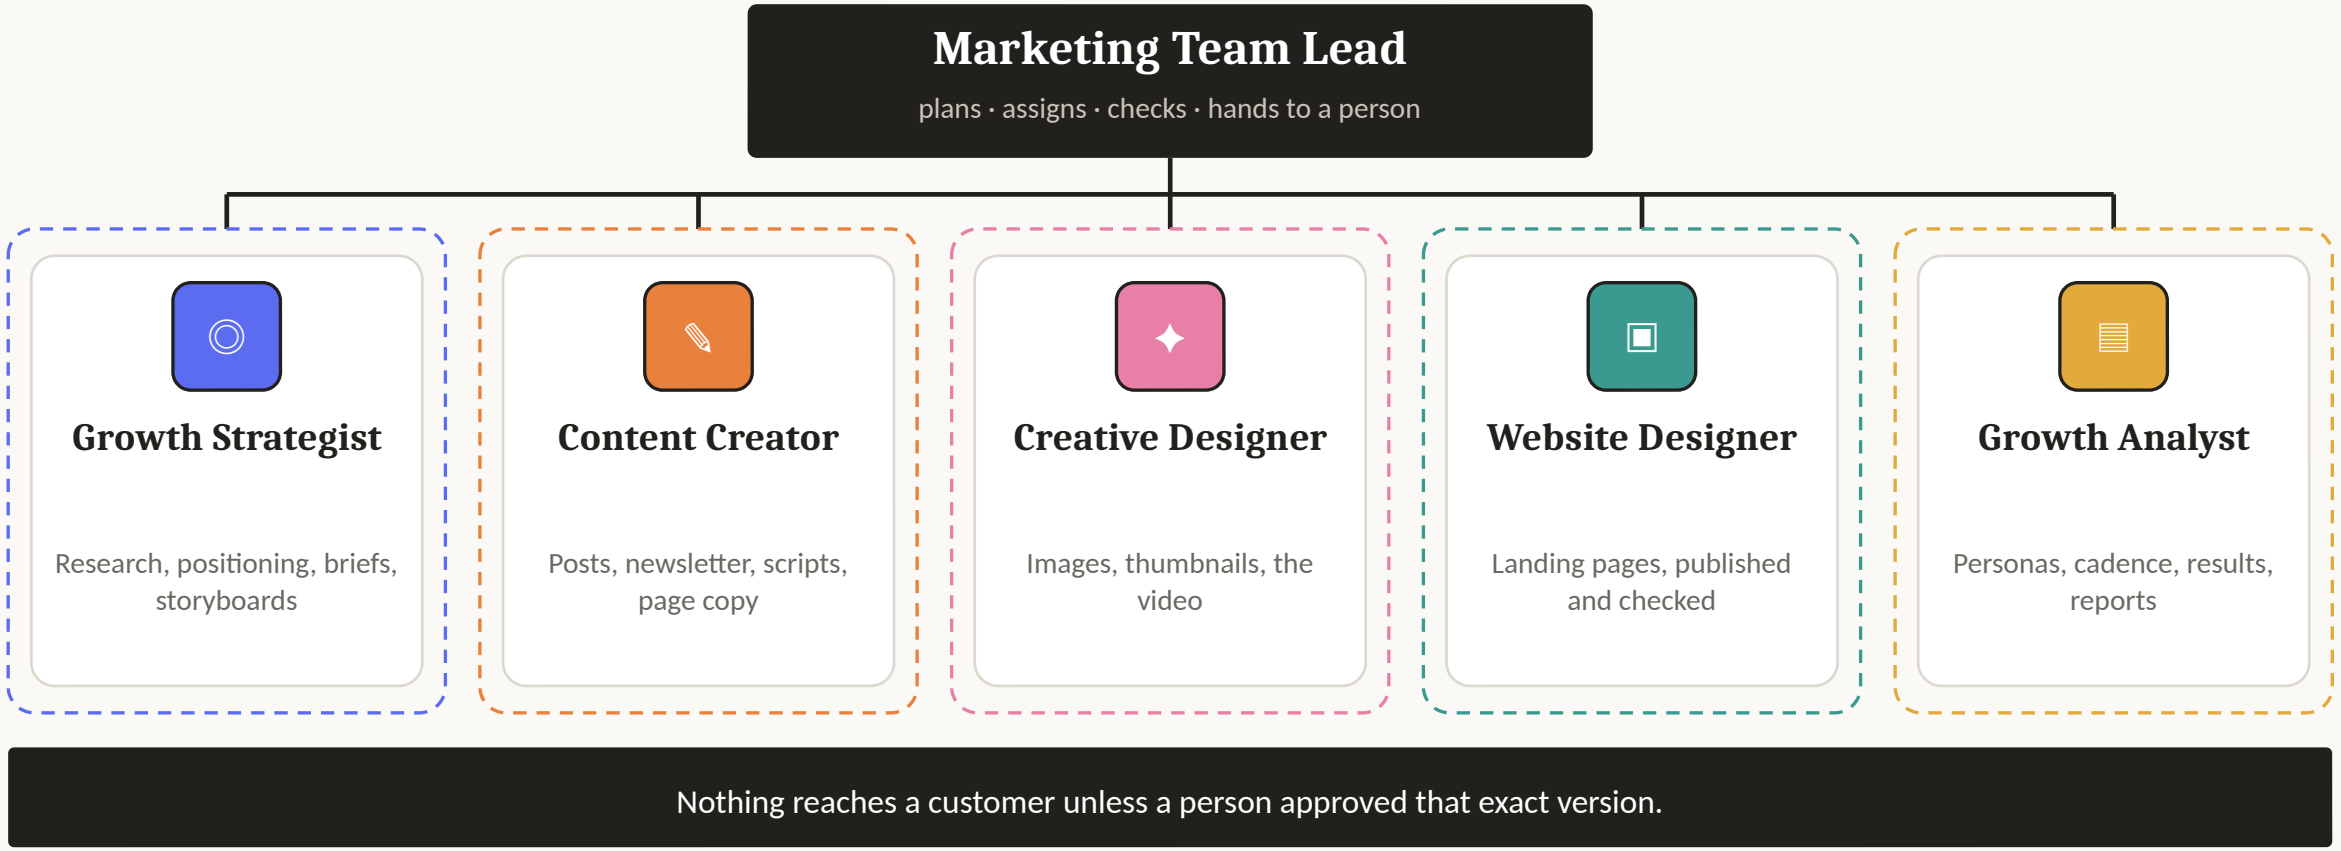

Financial content: general information only, never a promised return.

© Tertiary Infotech Academy Pte Ltd

THE TEAM

# Your AI Marketing Team

One Lead and five specialists — each with instructions, its own skills and connectors.

© Tertiary Infotech Academy Pte Ltd

THE TEAM

# Who Does What

Each agent's job, the skills it owns and the connectors it may use.

| AGENT | JOB | SKILLS | CONNECTORS |
|---|---|---|---|
| **Team Lead** | Plans, assigns, checks, hands to a person | fact-check, fin-compliance | @Google Drive (read), @Gmail (drafts only) |
| **Growth Strategist** | Research, positioning, briefs, storyboards | competitor-scan, campaign-brief, content-marketing | web search, @Google Drive (read) |
| **Content Creator** | Posts, newsletter, scripts, page copy | sunny-voice, copywriting, channel-formats, linkedin-post, facebook-post, blog-post, newsletter | @Google Drive (docs), @Gmail (drafts only) |
| **Creative Designer** | Images, thumbnails, the video | brand-visuals, video-render | $imagegen, ffmpeg in Codex |
| **Website Designer** | Landing pages, published and checked | web-design, landing-page, lead-magnet, page-qa | @Sites (publish), @Computer Use (browser check) |
| **Growth Analyst** | Personas, cadence, results, reports | audience-insights, campaign-report | @Google Drive and Sheets (read), Python in Codex |

TIP You build every part of this table in Labs 2, 3 and 4.

© Tertiary Infotech Academy Pte Ltd

THE SCENARIO

# The Tools for This Edition

The ChatGPT Edition: ChatGPT, ChatGPT Work and Codex in one app.

| TOOL | WHAT THE TEAM USES IT FOR | LABS |
|---|---|---|
| **ChatGPT Project** | The team's shared files and instructions | Lab 1 |
| **Codex** | The Lead's chat; role cards; skills; subagents; scripts; the video; the Lab 15 debate and QA loop | Labs 1–12, 14, 15 |
| **ChatGPT Work** | Plugins (Drive, Gmail), skills, scheduled tasks | Labs 4, 11, 13 |
| **@Sites** | The campaign landing page; Horizon's website is given as a public link | Lab 11 |

TIP Every external post, email and video passes one gate: a person approves the exact version.

© Tertiary Infotech Academy Pte Ltd

# Why a Team of Agents?

The Lead runs specialists in parallel, each in its own context, then combines what they return.

### ONE AGENT DOES EVERYTHING

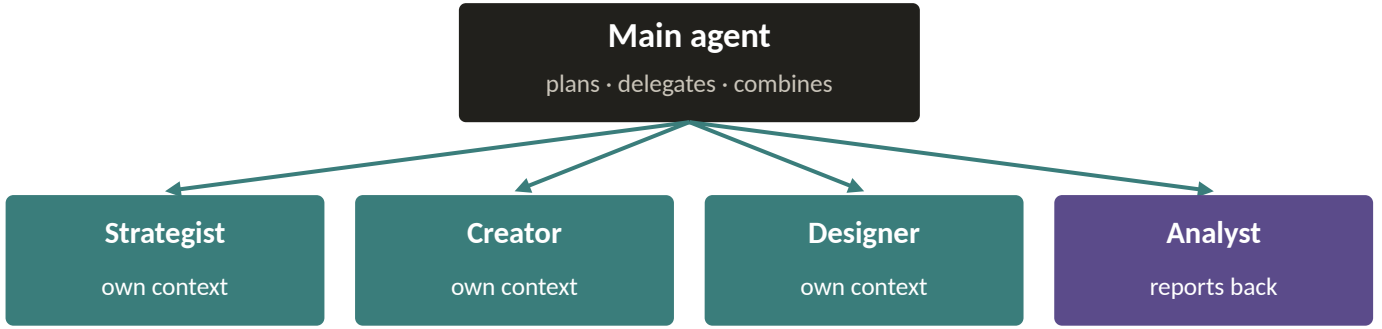

**One agent**

One context window, filling up with every job

research | copy | images | pages | data

**One job after another · one voice · marks its own homework**

### A MAIN AGENT DELEGATES

**In parallel · each with a fresh, focused context · only the results come back**

### Faster

Research, copy and design run at the same time.

### Focused

Each agent holds only its own job and its own skills.

### Specialised

Its own instructions, tools, connectors and model.

### Second opinion

The Lead checks work it did not write.

### The cost

More tokens and more to review. Split only work that is truly independent.

© Tertiary Infotech Academy Pte Ltd

# Get the Tools Ready

Install once; every lab says which tool to open.

DOWNLOAD

**chatgpt.com/download**

**macOS**
Download for macOS from the page

**Windows**
Opens the Microsoft Store listing

Work, Codex and Sites need a paid plan.

1. **Download and install** The new desktop app from chatgpt.com/download, not "ChatGPT Classic".
2. **Sign in** On the plan you will use in class — limits follow the account.
3. **Find Chat, Work and Codex** The toggle above the composer; Codex in the sidebar.
4. **Node.js 22, Python 3, ffmpeg** For the publisher kit and the video (Pillow for Python).
5. **A personal Google account** For Drive and Gmail — never an employer's.

© Tertiary Infotech Academy Pte Ltd

# A Home for the Team

Before you hire agents, give them shared rules, shared facts and a website to point to.

## A Project + AGENTS.md

Project files and instructions in ChatGPT; the charter in AGENTS.md for Codex.

## data/

The facts sheet, brand, compliance checklist and business brief — the only sources agents may use.

## Horizon's public website

Given, not built: each learner opens their own local copy; the public copy is on GitHub Pages.

© Tertiary Infotech Academy Pte Ltd

LAB 01 · HANDS-ON

# Build Your Marketing Agent Team

LAB 01 DAY 1 · ~30 MIN USE: CODEX

THE STORY SO FAR

October 2026. Rachel has a website and a goal: 40 booked chats a month by March. She has no marketing team. Before you hire one made of agents, give it a home — shared rules, shared facts — and open your own copy of Horizon's website.

YOU'LL BUILD

**the Horizon Marketing project, horizon-studio/ with AGENTS.md, and your own copy of the site running at http://localhost:8080/**

Surface: ChatGPT Project → Codex

Features: a ChatGPT Project with shared files · AGENTS.md · your own copy of Horizon's website

YOUR WEBSITE http://localhost:8080 PUBLIC SITE tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation

© Tertiary Infotech Academy Pte Ltd

# Build Your Marketing Agent Team

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **Choose the folder** In Codex create a local project and choose labs_chatgpt/horizon-studio. It is ready-made — do not create one.

2. **Make the Project** In ChatGPT create the Project "Horizon Marketing" with the charter, brand, facts and compliance files. Copy and paste Prompt A as its instructions.

3. **Plan your team** In Codex, copy and paste Prompt B. Answer as Horizon's owner and pick your team — keep the six charter roles. It is a plan only: Lab 2 builds the agents.

4. **Write the charter** After Codex saves data/team-design.md, copy and paste Prompt C. Open AGENTS.md — every agent reads it.

5. **Open the website** Ask: "Start my website." It opens at http://localhost:8080/ — your own copy of Horizon's website; every post links to it. Check the calculator shows S$693,138.

© Tertiary Infotech Academy Pte Ltd

# Build Your Marketing Agent Team

**PROMPT A — ChatGPT Project: instructions**

You support Horizon Wealth Planning's AI marketing team. Use the project files: team-charter.md for who does what, brand.md for the voice and look, facts-2026.md for every number, and compliance-checklist.md before anything is shown to a person. Never publish or send anything.

© Tertiary Infotech Academy Pte Ltd

# Build Your Marketing Agent Team (cont.)

**PROMPT B — Codex: plan your team**

Act as a marketing consultant. Interview me, the owner of Horizon Wealth Planning, to plan my AI marketing team. Ask one question at a time and wait for my answer: my goal, what success looks like by March 2027, who we want to reach, which channels we use, how much we publish each week, and who approves before anything goes out. Then list 8 to 10 team members I could have, numbered, each with a one-line job. Include the six roles in data/team-charter.md and mark the ones you recommend. Wait for me to choose. Save my answers and my chosen team, with each member's job, to data/team-design.md. This is a plan only: do not create any agent files yet.

© Tertiary Infotech Academy Pte Ltd

# Build Your Marketing Agent Team (cont.)

PROMPT C — Codex: the charter

Read data/team-charter.md, data/team-design.md and data/business-brief.md. Write AGENTS.md for this studio in four sections — What this is, The team, Rules, Files — under 60 lines. The team is the one I chose in data/team-design.md. Rules: every number comes from data/facts-2026.md; every piece passes fact-check and fin-compliance; nothing is published or sent without a person's approval (the one exception: a review email to the approver); anything shown to me is in plain English for a business owner, with no codes, IDs, file names or line numbers. In Files, add two lines:
- Our copy of the site, which we edit: web/site/. "Start my website" runs scripts/serve-site.mjs in the background and opens http://localhost:8080/
- Every post links to http://localhost:8080/ with UTM tags, never to the public site.

**NOTE** Shared context first, agents second. Every agent you add later starts from these files, so a wrong rule here is wrong everywhere.

© Tertiary Infotech Academy Pte Ltd

LAB 01 · VERIFY

# Build Your Marketing Agent Team

Check your work before moving on.

**CHECK YOUR WORK**

- ✓ The Horizon Marketing project holds the four files and the instructions.
- ✓ data/team-design.md holds your answers and the team you chose, with the six charter roles in it — and no agent files yet.
- ✓ AGENTS.md has the four sections and is under 60 lines.
- ✓ Its rules name the facts sheet, the two checks and the human approval.
- ✓ AGENTS.md names your copy of the site and the link every post points to.
- ✓ Your website opens at http://localhost:8080/; the calculator shows S$693,138.

© Tertiary Infotech Academy Pte Ltd

# Anatomy of an Agent

A role card in agents/. AGENTS.md tells Codex to use one subagent per role, each following its card.

agents/content-creator.md

```
# Content Creator — role card
You are Horizon Wealth Planning's Content Creator.
## What you read   the brief, facts-2026.md, brand.md
## What you deliver   content files, ready for review
## Skills   sunny-voice, copywriting, channel-formats,
           linkedin-post, facebook-post, blog-post, newsletter
## Plugins   @Google Drive (docs), @Gmail (drafts only)
## Never   add a number not on the facts sheet; send;
           approve or publish for real
## Report back   what, where, anything unverified

# AGENTS.md — The marketing team
When I ask for the team, use subagents — one per
role — each following its card in agents/.
```

© Tertiary Infotech Academy Pte Ltd

# Good Agent Instructions

Five parts, every time. The "Never" part matters most in a regulated firm.

## The job

One sentence: what this agent is for. The card name is how you ask for it.

## Reads and delivers

Which files it may use; what it hands back, and where.

## Never

Its hard limits: no invented figures, no sending, no publishing, no approving.

## Report back

Three lines: what, where, anything unverified — so the Lead can combine results.

© Tertiary Infotech Academy Pte Ltd

# Form the Team: Instructions for Each Agent

LAB 02 | DAY 1 · ~45 MIN | USE: CODEX

THE STORY SO FAR

Rachel sketches the team on a whiteboard: a Lead and five specialists. Each needs a clear job, and a clear line it must never cross — this is a regulated firm.

YOU'LL BUILD

## agents/: five role cards, and the roster in AGENTS.md

Surface: Codex (role cards, subagents)

Features: five role cards in agents/ · the roster in AGENTS.md · subagents by asking

© Tertiary Infotech Academy Pte Ltd

# Form the Team: Instructions for Each Agent

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 2". Run all of this lab's prompts in it.
2. **Read the roles** Open role-specs.md: one Lead and five specialists, each with a job, skills, connectors and limits.
3. **Write the instructions** Copy and paste Prompt A. It builds the five specialists from the charter; extra ideas stay in team-design.md.
4. **See the team** After the five files appear in agents/, copy and paste Prompt B. The Lead is not a file — it is you, in this session.
5. **Read one closely** Open agents/content-creator.md. Is the "Never" section strict enough for a regulated firm?
6. **Meet the team** After the list shows five agents, copy and paste Prompt C. Each agent introduces itself in one line — in its own context.
7. **Tighten one** Change one instruction you disagree with and save it. It is your team.

© Tertiary Infotech Academy Pte Ltd

# Form the Team: Instructions for Each Agent

PROMPT A — Codex: five role cards

Read data/role-specs.md. Create five role cards in agents/ — growth-strategist.md, content-creator.md, creative-designer.md, website-designer.md and growth-analyst.md. Each has: the job, what it reads, what it delivers, the plugins it may use, what it must never do, and how it reports back. Then add "## The marketing team" to AGENTS.md: one line per agent pointing to its card, and the rule "when I ask for the team, use subagents — one per role — each following its card".

© Tertiary Infotech Academy Pte Ltd

# Form the Team: Instructions for Each Agent (cont.)

PROMPT B — Codex: see the team

List the role cards in agents/. For each, show the file name, the role and its one-line job, in a table. Then confirm there are five, and that AGENTS.md lists all five under "## The marketing team". If any other card is there, list it and ask me before moving it to _archive/.

© Tertiary Infotech Academy Pte Ltd

# Form the Team: Instructions for Each Agent (cont.)

**PROMPT C — Codex: meet the team**

Use subagents — one per role, each following its card in agents/. Ask each: "In one line, who are you, and what is the first thing you would do for Horizon's goal of 40 booked chats a month?" Show me the five answers in a table.

**NOTE** Clear jobs beat clever prompts. An agent that knows what it must never do is safer than one that is merely told to be careful.

© Tertiary Infotech Academy Pte Ltd

# Form the Team: Instructions for Each Agent

Check your work before moving on.

### CHECK YOUR WORK

- [x] Five files exist in agents/, one per specialist.
- [x] Each card has job, reads, delivers, plugins, never and report sections.
- [x] AGENTS.md lists the team and the subagent rule.
- [x] Five agents answered, each in its own context.
- [x] Every agent has a "never" rule that blocks publishing.
- [x] You changed one instruction and can say why.

© Tertiary Infotech Academy Pte Ltd

# Twenty Skills, Owned by Role

Instructions say who an agent is; skills say how it does the job.

| AGENT | SKILLS |
|---|---|
| **Team Lead** | fact-check, fin-compliance |
| **Growth Strategist** | competitor-scan, campaign-brief, content-marketing |
| **Content Creator** | sunny-voice, copywriting, channel-formats, linkedin-post, facebook-post, blog-post, newsletter |
| **Creative Designer** | brand-visuals, video-render |
| **Website Designer** | web-design, landing-page, lead-magnet, page-qa |
| **Growth Analyst** | audience-insights, campaign-report |

TIP Master copies in skills/; .agents/skills/ for Codex; @skill-creator for ChatGPT.

© Tertiary Infotech Academy Pte Ltd

# Anatomy of a Skill

Frontmatter (the trigger), then short steps. Free until it is needed.

.agents/skills/campaign-brief/SKILL.md

```
---
name: campaign-brief
description: Use when planning a Horizon campaign.
  Objective, audience, message, proof, channels,
  CTA, measures, and a five-beat storyboard.
---
# Campaign brief
1. Objective: one measurable action (e.g. chats booked).
2. Audience: the persona(s) from strategy/personas.md, with evidence.
3. Core message in one sentence; proof from data/facts-2026.md only.
4. Channels and formats; one call to action; measures and a date.
5. Storyboard in five beats — hook, tension, proof, resolution, action —
   each with visual, words, claim and source.
6. Never: returns, fee amounts, invented clients, fear.
```

© Tertiary Infotech Academy Pte Ltd

LAB 03 · HANDS-ON

# Give Each Agent Its Skills

LAB 03 DAY 1 · ~50 MIN USE: CODEX, THEN CHATGPT

THE STORY SO FAR

The team exists, but every agent writes in its own way. Rachel wants Horizon's voice, facts and compliance rules applied the same way by every agent, every time.

YOU'LL BUILD

**twenty skills in .agents/skills/, wired to the agents that own them**

Surface: Codex ($skill-creator) → ChatGPT (@skill-creator)

Features: twenty skills owned by role — research, writing, LinkedIn, Facebook, blog, newsletter, web design, lead magnet, video, analysis and compliance · SKILL.md · the "Use when" trigger · test without naming

© Tertiary Infotech Academy Pte Ltd

# Give Each Agent Its Skills

USE CODEX, THEN CHATGPT · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 3". Run all of this lab's prompts in it.
2. **Read the spec** skills-spec.md lists the twenty skills and who owns each.
3. **Create the skills** Copy and paste Prompt A.
4. **Wire them up** After the twenty skills appear in .agents/skills/, copy and paste Prompt B, then C to list every skill. The Lead's two go in AGENTS.md, not a file.
5. **Test without naming** In a new session ask: "Write a Facebook post about the free Money Check-up Checklist." Ask which skills were used.
6. **Break it on purpose** Ask for a post that says "guaranteed 8% a year". fin-compliance must flag it as Critical.
7. **Share with ChatGPT** Use @skill-creator in ChatGPT to add sunny-voice, channel-formats and fin-compliance there too.

© Tertiary Infotech Academy Pte Ltd

# Give Each Agent Its Skills

PROMPT A — Codex: twenty skills

$skill-creator Read data/skills-spec.md and create the twenty skills in .agents/skills/<name>/ SKILL.md. Each has a name, a description that starts "Use when…" and short numbered steps, under 80 lines. Use data/brand.md, data/channel-formats.md, data/facts-2026.md and data/compliance-checklist.md as the sources — do not invent rules.

© Tertiary Infotech Academy Pte Ltd

# Give Each Agent Its Skills (cont.)

PROMPT B — Codex: wire them up

Add a "Skills" line to each role card in agents/ with its skills from data/skills-spec.md. Add to AGENTS.md that the Lead (this chat) runs fact-check and fin-compliance on everything before showing it to me.

© Tertiary Infotech Academy Pte Ltd

# Give Each Agent Its Skills (cont.)

**PROMPT C — Codex: see the skills**

List the skills in .agents/skills/. Show each skill, its owner (a role card, or the Lead) and its "Use when" line in a table. Confirm there are twenty, that each specialist has the skills the spec gives it, and that fact-check and fin-compliance belong to the Lead (this chat).

**NOTE** A skill costs almost nothing until it is needed. Keep the rules file (AGENTS.md) short and put procedures in skills.

© Tertiary Infotech Academy Pte Ltd

# Give Each Agent Its Skills

Check your work before moving on.

### CHECK YOUR WORK

- ✓ Twenty folders in .agents/skills/, each with a SKILL.md.
- ✓ Every description starts "Use when…".
- ✓ Each specialist lists its own skills from the spec.
- ✓ The untold test picked sunny-voice and facebook-post.
- ✓ fin-compliance flagged "guaranteed 8%" as Critical.
- ✓ Three skills also appear in ChatGPT Skills.

© Tertiary Infotech Academy Pte Ltd

# Plugins for Each Agent

Install once in Plugins; call them with @. Sites and $imagegen are built in.

| AGENT | MAY USE | LIMIT |
|---|---|---|
| **Team Lead** | @Google Drive (read), @Gmail (drafts only) | reads; drafts only |
| **Growth Strategist** | web search, @Google Drive (read) | cite every source |
| **Content Creator** | @Google Drive (docs), @Gmail (drafts only) | Gmail: drafts only |
| **Creative Designer** | $imagegen, ffmpeg in Codex | no fake "clients" |
| **Website Designer** | @Sites (publish), @Computer Use (browser check) | publish after approval |
| **Growth Analyst** | @Google Drive and Sheets (read), Python in Codex | no personal data |

TIP Use your personal Google account — never an employer's.

© Tertiary Infotech Academy Pte Ltd

# Least Privilege

A regulated firm gives each agent only what its job needs.

### Ask of each connector

Does this agent's job need it? If not, it does not get it.

### Drafts, not sends

Email is drafted, posts are files, pages wait — a person sends and publishes.

### Write it down

Each agent's instructions name its connectors and limits; its card lists only the plugins it may call.

© Tertiary Infotech Academy Pte Ltd

LAB 04 • HANDS-ON

# Install the Plugins Each Agent Needs

LAB 04 | DAY 1 • ~45 MIN | USE: CHATGPT, THEN CODEX

THE STORY SO FAR

The analyst cannot read the data, the designer has no design tool and the creator cannot draft an email. Connect each agent to what its job needs — and nothing more.

YOU'LL BUILD

**every specialist tested on its own connector, with its limits written into its instructions**

Surface: ChatGPT plugins → Codex

Features: @Google Drive · @Gmail (drafts) · @Computer Use · $imagegen · @Sites · least privilege per agent

© Tertiary Infotech Academy Pte Ltd

# Install the Plugins Each Agent Needs

USE CHATGPT, THEN CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** Start a new chat in the Horizon Marketing project and name it "Lab 4". Run all of this lab's prompts in it.
2. **Install the plugins** Plugins: Google Drive, Gmail and Computer Use. Sites and $imagegen are built in.
3. **Use your own account** Connect your personal Google account — never an employer's.
4. **Put the data on Drive** Upload data/ to a Drive folder named Horizon Studio.
5. **Open Codex** In Codex, start a new thread in horizon-studio named "Lab 4" for the next two prompts.
6. **Test each agent** Copy and paste Prompt A — one small job per agent, each on its own plugin.
7. **Write the limits** After the five results are reported, copy and paste Prompt B.

© Tertiary Infotech Academy Pte Ltd

# Install the Plugins Each Agent Needs

PROMPT A — Codex: test each agent

Use subagents, one per check, each following its role card:
1. growth-strategist: web search — one 2026 news item about financial planning in Singapore, cited.
2. growth-analyst: @Google Drive — read firm-metrics.csv from Horizon Studio; report average monthly enquiries.
3. content-creator: @Gmail — a DRAFT to me with the subject "Connector test". Do not send.
4. creative-designer: $imagegen — a 1080x1080 test image in Horizon colours.
5. website-designer: @Computer Use — open our own copy of the site (web/site/index.html) at mobile width and report any problem. Report each result in one line.

© Tertiary Infotech Academy Pte Ltd

# Install the Plugins Each Agent Needs (cont.)

**PROMPT B — Codex: least privilege**

Update the "Plugins" section of each role card in agents/ to match data/connectors-setup.md: what it may use, and that @Gmail is drafts-only. Remove any plugin a role does not need.

**NOTE** Least privilege is a design decision, not a setting. Ask of each connector: does this agent's job need it?

© Tertiary Infotech Academy Pte Ltd

# Install the Plugins Each Agent Needs

Check your work before moving on.

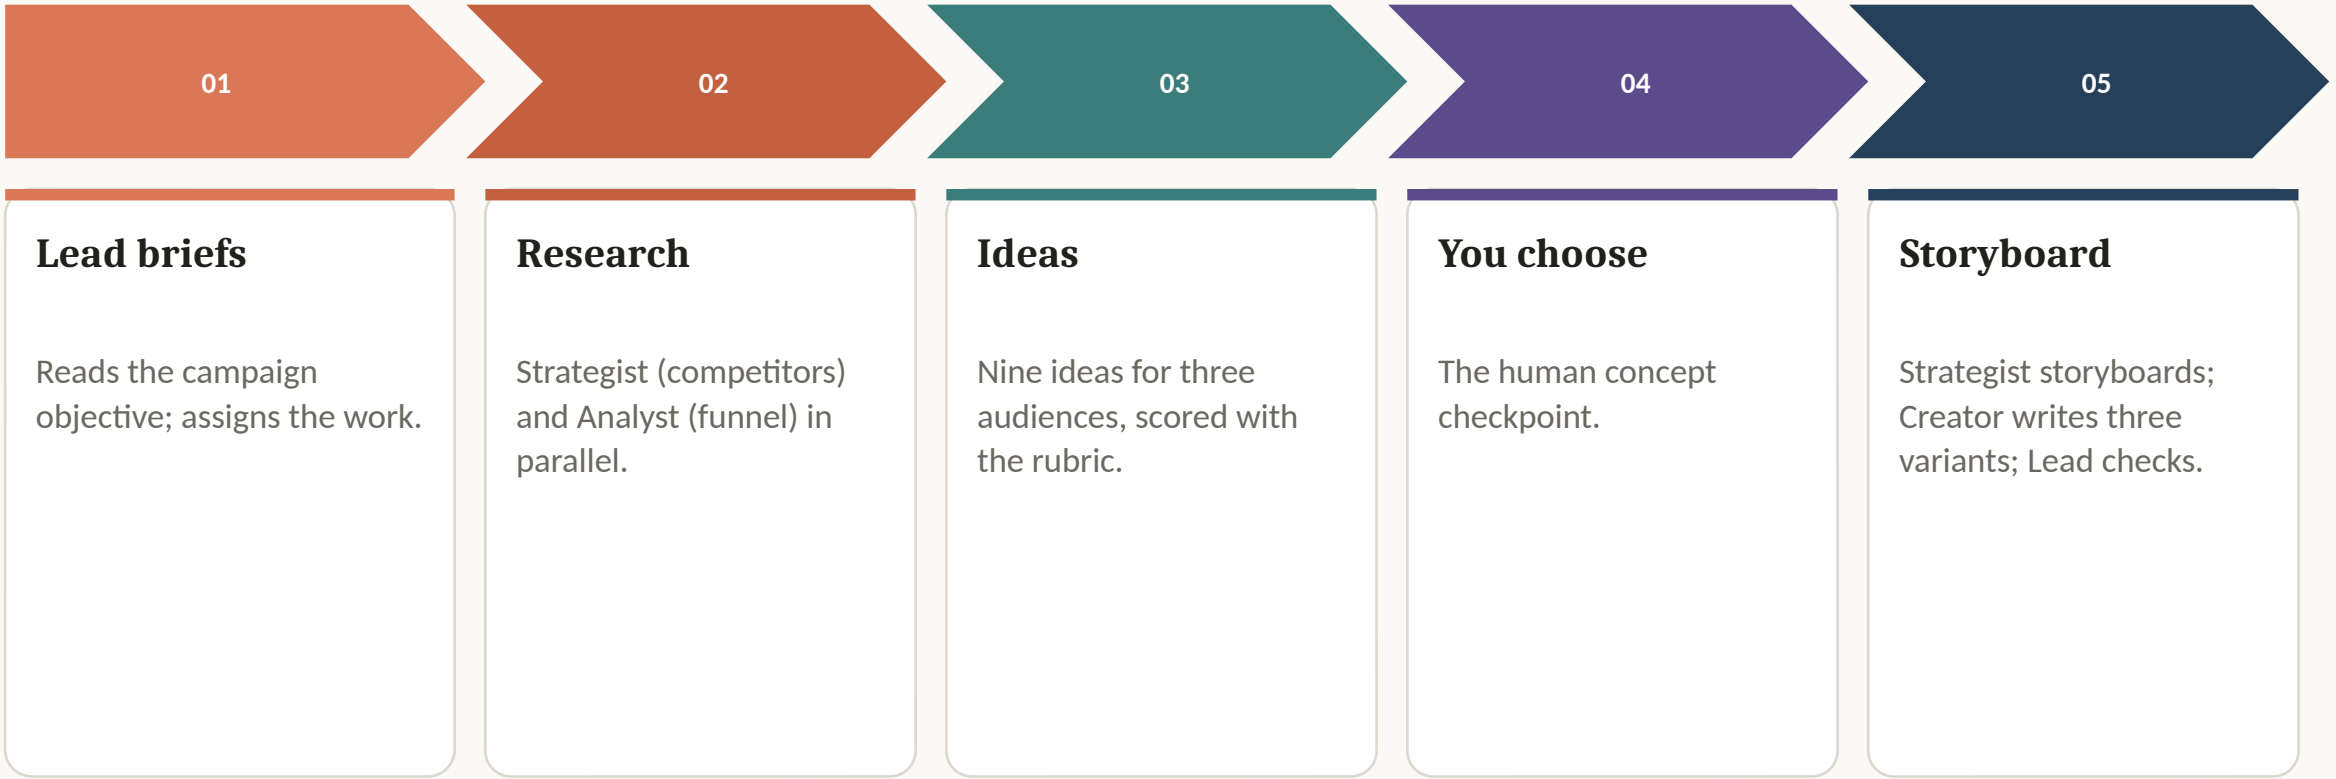

**CHECK YOUR WORK**

- ✓ The three plugins are installed and connected.
- ✓ Five checks ran, each by its own agent.
- ✓ The Gmail test is a draft in your inbox — nothing was sent.
- ✓ The analyst read the CSV from Drive, not from the local folder.
- ✓ Each agent's tools line names only the connectors its job needs.

© Tertiary Infotech Academy Pte Ltd

# How the Team Runs a Campaign

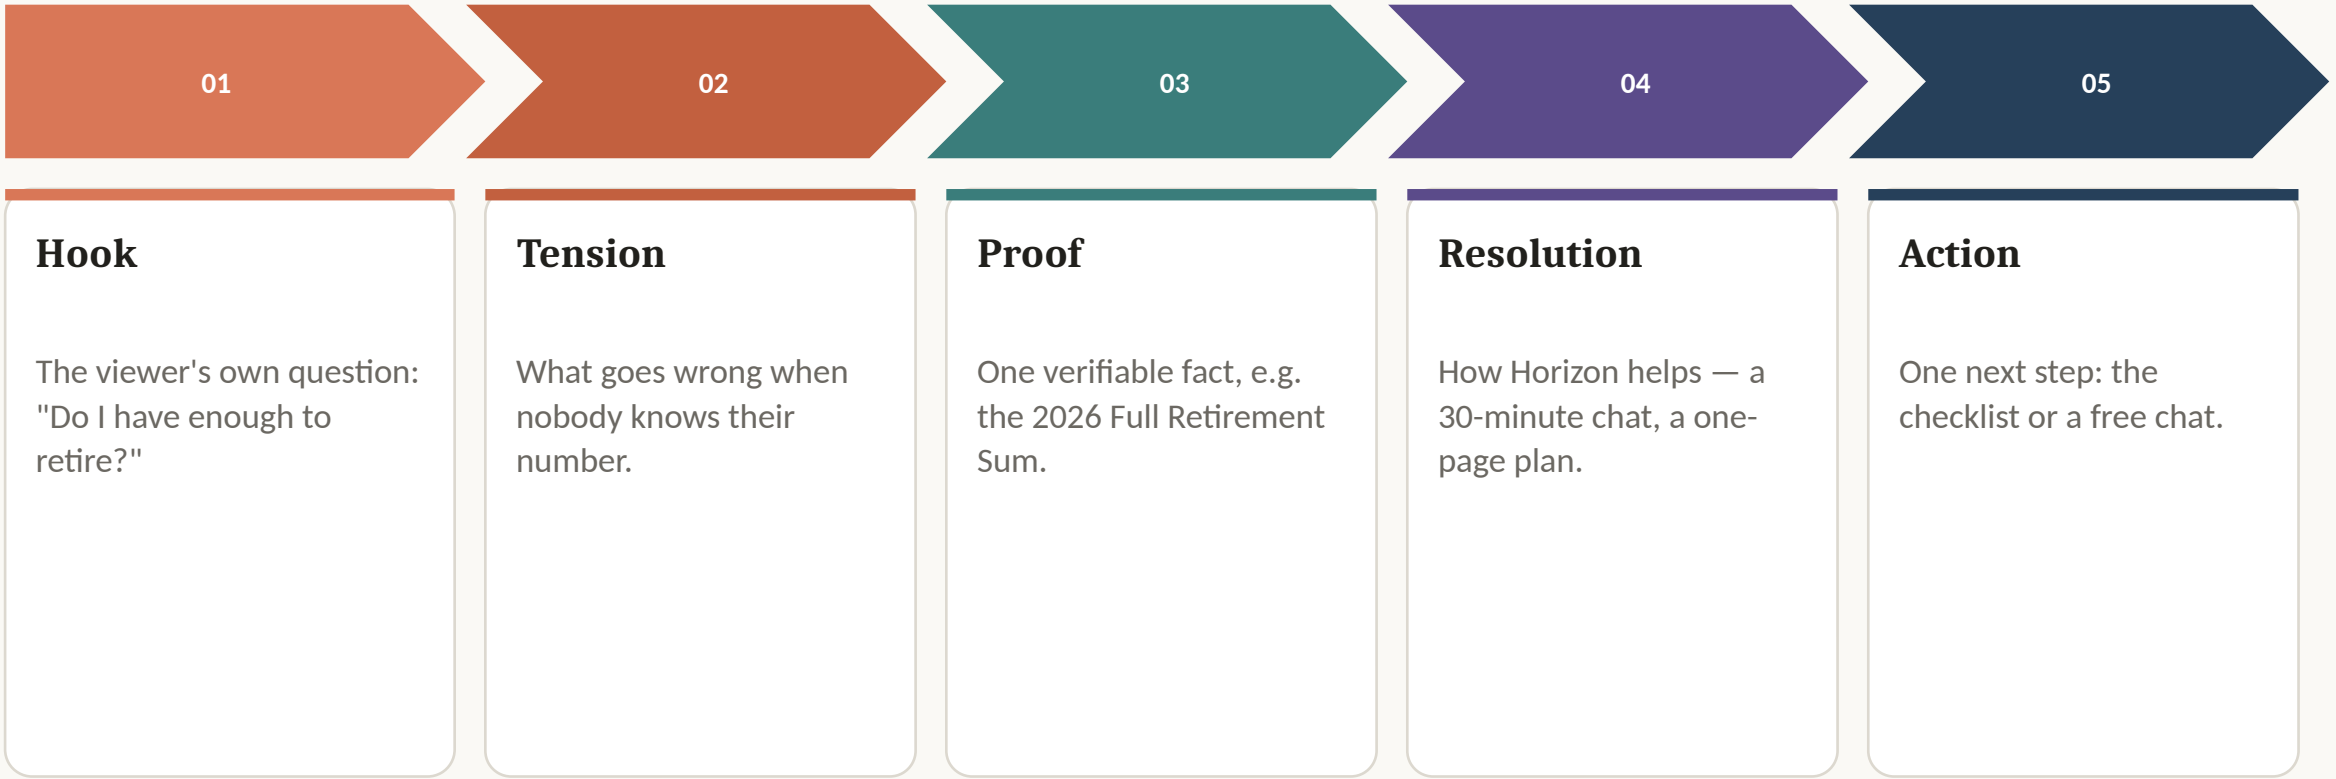

Campaign 1, "Know Your Number": research in parallel, a person chooses, the team makes it concrete.

© Tertiary Infotech Academy Pte Ltd

# The Five-Beat Storyboard

Every channel tells the same story with the same claims.

© Tertiary Infotech Academy Pte Ltd

# Financial Content Is Regulated

The Lead checks every piece against twelve rules (compliance-checklist.md).

| RULE | WHAT IT MEANS | IF BROKEN |
|---|---|---|
| **C1 · Not advice** | General information only — say so | Critical |
| **C2 · No promises** | No guaranteed or "risk-free" returns | Critical |
| **C3 · Label illustrations** | Assumptions shown; not guaranteed | Critical |
| **C5 · No performance** | Never client returns or "average" returns | Critical |
| **C9 · Consent** | Marketing only to people who opted in | Critical |
| **C11 · Facts sheet** | Every figure from facts-2026.md | Critical |

TIP MAS Guidelines on Standards of Conduct for Digital Advertising Activities apply from 25 March 2026.

© Tertiary Infotech Academy Pte Ltd

LAB 05 • HANDS-ON

# Campaign 1: Research to Storyboard, with Subagents

LAB 05 | DAY 1 • ~50 MIN | USE: CODEX

THE STORY SO FAR

The team's first campaign: 'Know Your Number', November to January. Rachel wants research, ideas for three audiences, her choice, and a storyboard every channel follows.

YOU'LL BUILD

**competitor research, the funnel, nine scored ideas, the campaign brief and a five-beat storyboard with three channel variants — with a Word copy of each**

Surface: Codex (subagents in parallel)

Features: the Lead delegates · strategist and analyst in parallel · nine scored ideas · a human concept checkpoint · a five-beat storyboard

© Tertiary Infotech Academy Pte Ltd

# Campaign 1: Research to Storyboard, with Subagents

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 5". Run all of this lab's prompts in it.
2. **Brief the Lead** The briefs are already in data/. You are the client; your session is the Marketing Team Lead.
3. **Research in parallel** Copy and paste Prompt A. Watch the strategist and the analyst run at the same time.
4. **Read the ideas** Nine ideas, scored with the rubric. The Lead stops for you.
5. **Choose** Pick one idea and note its number and why — the human concept checkpoint.
6. **Storyboard** After you have chosen, copy and paste Prompt B in the chat, replacing <number> and <one line> with your choice.
7. **Decide as Rachel** After you have read the issues, copy and paste Prompt C. You confirm what is true about Horizon; the team removes or fixes the rest.

© Tertiary Infotech Academy Pte Ltd

# Campaign 1: Research to Storyboard, with Subagents

PROMPT A — Codex: research and ideas

Act as the Marketing Team Lead for the campaign in data/campaign-objective.md. Use subagents, in parallel:
- growth-strategist: competitor-scan → save research/competitive-analysis.md.
- growth-analyst: the funnel in data/firm-metrics.csv — what 40 chats a month needs → save research/funnel.md.
When both finish, the growth-strategist proposes three ideas each for young professionals, mid-career families and pre-retirees, scored with data/idea-rubric.md and tagged with a funnel stage (content-marketing) → strategy/ideas.md. Show me the top five and stop — I will choose. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Campaign 1: Research to Storyboard, with Subagents (cont.)

PROMPT B — Codex: the storyboard

I choose idea <number>, because <one line>. Use subagents:
- growth-strategist: campaign-brief → strategy/campaign-brief.md, then a five-beat storyboard with data/storyboard-template.md → strategy/storyboard.md.
- content-creator: three channel variants that keep the same claims — LinkedIn, Facebook, a 60-second video. Then run fact-check and fin-compliance yourself and show me the issues before anything is final. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Campaign 1: Research to Storyboard, with Subagents (cont.)

**PROMPT C — Codex: decide on the issues**

I confirm "no obligation" and the free checklist — add them to the facts sheet (data/facts-2026.md). Delete any other claim that is not on the facts sheet. Fix all the Medium and Low issues, then show me the updated storyboard. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

**NOTE** Agents diverge; a person decides. The concept checkpoint is where the campaign becomes yours.

© Tertiary Infotech Academy Pte Ltd

# Campaign 1: Research to Storyboard, with Subagents (cont.)

FOLLOW-UP — type any of these in the chat

After Prompt A: Explain this result in three sentences. Which idea would you pick, and why?

Why does idea <number> score higher than idea <number>?

What does the funnel say is our biggest problem?

After Prompt B: Explain the issues in plain English. What do I need to decide?

After Prompt C: What changed since the last version? Is anything still not ready for Rachel?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Campaign 1: Research to Storyboard, with Subagents

Check your work before moving on.

### CHECK YOUR WORK

- ✓ The strategist and the analyst ran in parallel.
- ✓ The competitor analysis and the funnel are done, with sources.
- ✓ Nine scored ideas, each with its author.
- ✓ You chose the idea and recorded why.
- ✓ The storyboard has five beats; every claim has a source.
- ✓ You confirmed two claims; after Prompt C no High issue is left.

© Tertiary Infotech Academy Pte Ltd

# Where You Are Now

The team exists and has run its first campaign. But who exactly is it for — and how often should it publish?

### Formed · Labs 1–4

A studio, the public website, six agents with instructions, skills and connectors.

### Campaign 1 · Lab 5

Research in parallel, nine scored ideas, your choice, a storyboard.

### What is missing

Evidence about the audience and a cadence the team can deliver. That is Topic 2.

© Tertiary Infotech Academy Pte Ltd

TOPIC 2

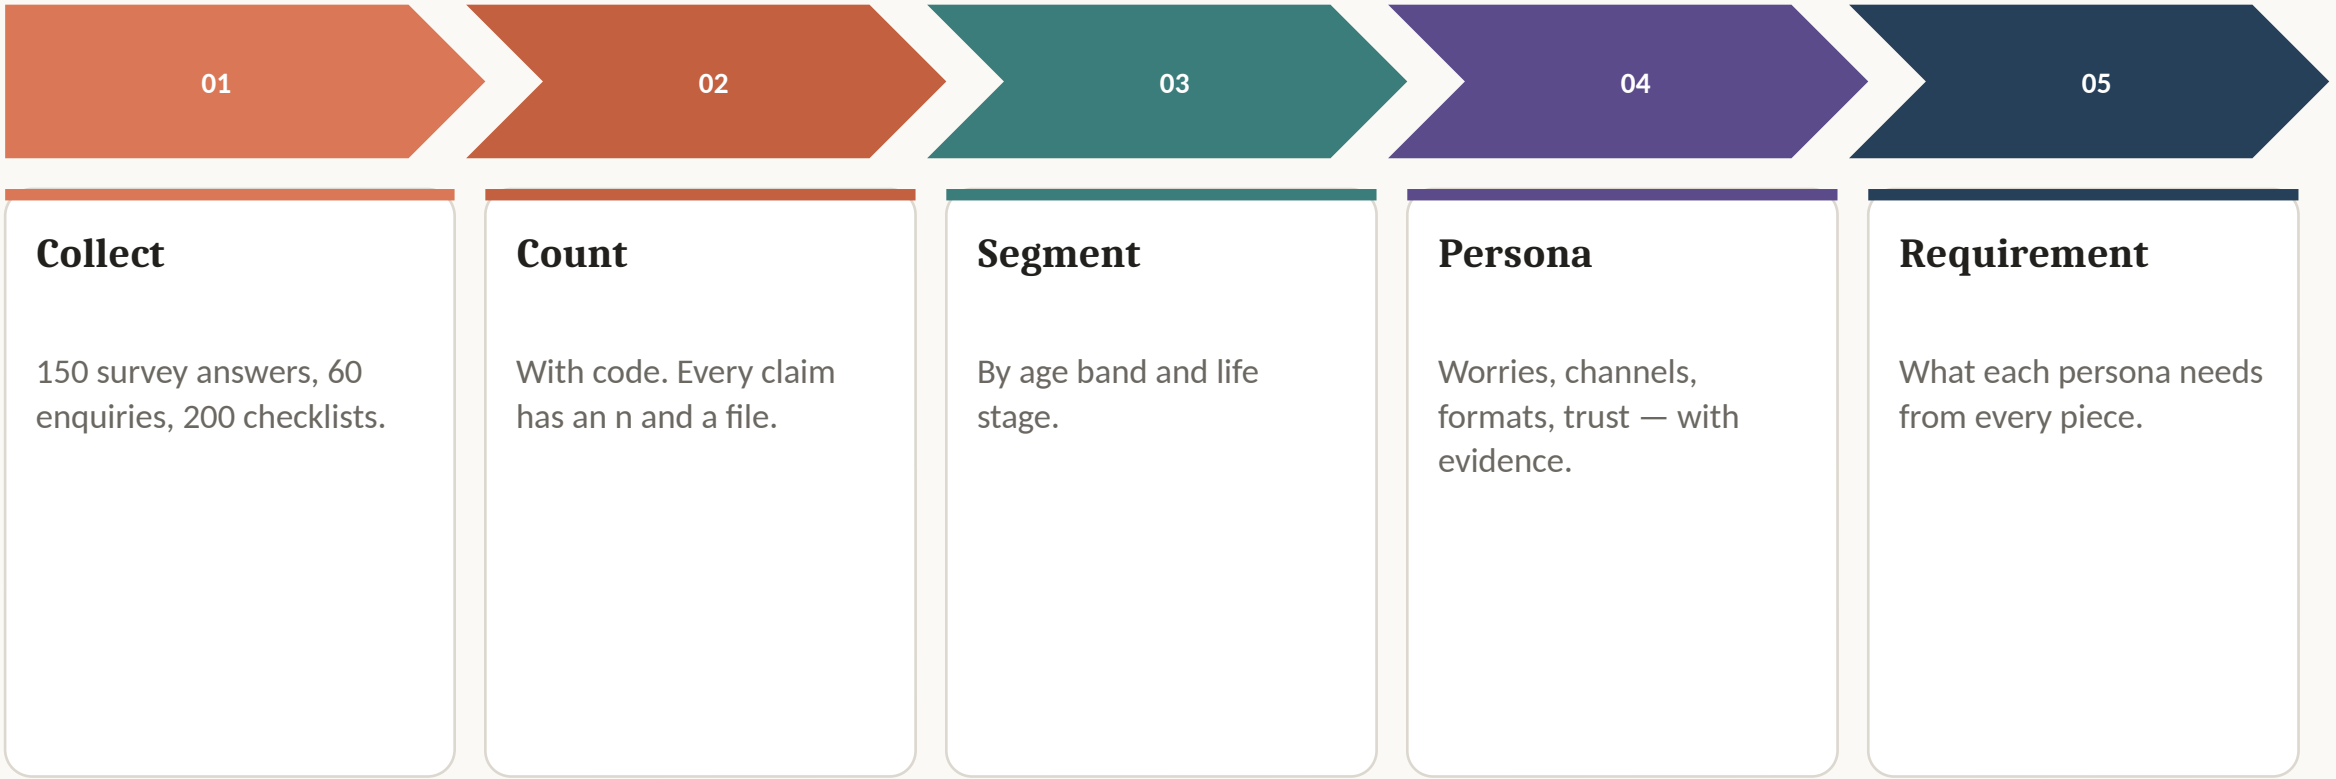

# Audience Research and Content Requirement Analysis

1. The Growth Analyst: personas from evidence
2. Content requirements every agent can follow
3. How often to publish: value, fatigue and capacity
4. The calendar the team will run

© Tertiary Infotech Academy Pte Ltd

# Evidence Before Personas

Lab 6: the Growth Analyst builds personas the way an analyst would.

© Tertiary Infotech Academy Pte Ltd

# Observed, Inferred or Low Confidence?

Three labels keep a persona honest.

| LABEL | EXAMPLE | USE IT |
|---|---|---|
| **Observed** | 30–39s chose Facebook, LinkedIn and YouTube equally (survey, n = 44) | As fact, with the count |
| **INFERENCE** | "They are short of time on weekdays" — not asked | As a hypothesis to test |
| **LOW CONFIDENCE** | The 60+ group (n = 12) | Never alone; get more data |
| **Verbatim** | "I am 54 and not sure if my CPF will be enough." (E-id) | Exactly as written, with the id |

TIP Ask "which rows show that?" of anything that sounds insightful.

© Tertiary Infotech Academy Pte Ltd

LAB 06 · HANDS-ON

# Growth Analyst: Personas from Evidence

LAB 06 | DAY 1 · ~40 MIN | USE: CODEX

THE STORY SO FAR

Jun Wei drafted personas from instinct: 'busy young parents who love TikTok'. Rachel is not convinced. There are 150 survey answers, 60 enquiries and 200 checklists.

YOU'LL BUILD

**three evidence-based personas and the content spec — with a Word copy of each**

Surface: Codex (analyst subagents)

Features: three analyst sub-agents, one per data file · counts, not impressions · confidence labels · content requirements

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst: Personas from Evidence

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 6". Run all of this lab's prompts in it.
2. **Check the data** The CSVs and templates are already in data/. Open one and skim it.
3. **Analyse in parallel** Copy and paste Prompt A — three analyst sub-agents, one per file.
4. **Challenge a claim** Pick one persona statement and ask: "which rows show that?"
5. **Write the guides** After the personas are written, copy and paste Prompt B: a writing guide for each persona — how to talk to them.
6. **Check the gaps** The 60+ group must be LOW CONFIDENCE.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst: Personas from Evidence

PROMPT A — Codex: three analysts

Use three growth-analyst subagents in parallel, one per file: data/survey-responses.csv, data/enquiries.csv, data/checklist-results.csv. Each uses audience-insights: counts with code, n and the file on every claim, INFERENCE and LOW CONFIDENCE labels, enquiry quotes verbatim with ids. Combine the results into three personas with data/persona-template.md → strategy/personas.md. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst: Personas from Evidence (cont.)

PROMPT B — Codex: requirements

Use the growth-strategist and the content-creator subagents to write a writing guide for each persona (data/content-spec-template.md → strategy/content-spec.md): what they most want to know, where to reach them, what to make and how long, the tone, the proof that convinces them, what we ask them to do next, and what we never say. Back each answer with the data: which file, and how many people. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

**NOTE** Ask "which rows show that?" of anything that sounds insightful. If the agent cannot point to rows, it is an inference.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst: Personas from Evidence (cont.)

FOLLOW-UP — type any of these in the chat

Explain these personas in three sentences. Which one should we target first, and why?

Which survey answers show that <a sentence from a persona>?

Why is the 60+ group marked low confidence?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst: Personas from Evidence

Check your work before moving on.

**CHECK YOUR WORK**

- ✓ Three analyst sub-agents ran, one per file.
- ✓ Every persona statement carries a count and a file.
- ✓ The 60+ group is LOW CONFIDENCE (n = 12).
- ✓ The most-unticked checklist item is the retirement number.
- ✓ Enquiry quotes are verbatim, with ids.
- ✓ The writing guide answers every question for every persona.

© Tertiary Infotech Academy Pte Ltd

# Finding the Right Frequency

Lab 7: the Analyst finds where more posts stop paying; the Strategist plans four weeks.

TIP A third LinkedIn post a week brings more unfollows than value. Weekly emails make unsubscribes jump.

© Tertiary Infotech Academy Pte Ltd

LAB 07 • HANDS-ON

# Growth Analyst and Strategist: Cadence and Calendar

LAB 07 | DAY 1 • ~35 MIN | USE: CODEX

THE STORY SO FAR

Jun Wei has 12 hours a week and Rachel needs two business days to review anything. How often should each channel run, and what goes out when?

YOU'LL BUILD

**how often to post on each channel, and a four-week calendar — with a Word copy of each**

Surface: Codex (subagents)

Features: marginal value vs fatigue · team capacity · review buffers · a four-week calendar

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst and Strategist: Cadence and Calendar

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 7". Run all of this lab's prompts in it.
2. **Check the data** The assets are already in data/. Open one and skim it.
3. **Find the sweet spot** Copy and paste Prompt A.
4. **Question it** Why is the newsletter not weekly? The answer is in the unsubscribes.
5. **Plan four weeks** After the analyst recommends a cadence, copy and paste Prompt B.
6. **Check the buffers** Every review date is two business days ahead; nothing on a holiday.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst and Strategist: Cadence and Calendar

PROMPT A — Codex: the analyst

Use the growth-analyst subagent. From data/channel-benchmarks.csv and data/team-capacity.md, recommend how often to publish on LinkedIn, Facebook, the newsletter and YouTube. Compare the extra clicks from one more post, the unfollows or unsubscribes it costs, and the hours → strategy/cadence.md. Show the numbers. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst and Strategist: Cadence and Calendar (cont.)

**PROMPT B — Codex: the strategist**

Use the growth-strategist subagent to build a four-week calendar from Monday 2 November 2026 in strategy/calendar.csv (columns as data/calendar-format.csv), from the cadence, strategy/storyboard.md and strategy/content-spec.md. review_by two business days before each date; no public holidays; no week over the team's hours. Show a week-by-week summary with hours. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

**NOTE** Frequency is a capacity decision as much as an audience one. A calendar the team cannot deliver is fiction.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst and Strategist: Cadence and Calendar (cont.)

**FOLLOW-UP — type any of these in the chat**

Why is the newsletter not weekly? Show me the numbers.

What happens if we add a third LinkedIn post a week?

Which week is busiest, and does the team have the hours?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Growth Analyst and Strategist: Cadence and Calendar

Check your work before moving on.

## CHECK YOUR WORK

- [x] The cadence gives a frequency per channel with the evidence.
- [x] A third LinkedIn post a week costs far more unfollows than it earns.
- [x] It explains the unsubscribe jump at weekly emails.
- [x] The calendar covers four weeks in the required columns.
- [x] Every review_by date is two business days before publishing.
- [x] No week is over 12 hours.

© Tertiary Infotech Academy Pte Ltd

# From Storyboard to Content

Lab 8: the first real piece — a blog article every post can link to.

### ChatGPT, not Codex

One person making one piece: ChatGPT is enough.

### General help, your rules

Web search and drafting, steered by your skills.

### Your skills know Horizon

blog-post, sunny-voice, fact-check and fin-compliance.

© Tertiary Infotech Academy Pte Ltd

LAB 08 · HANDS-ON

# Content Creator: A Quick Blog Article

LAB 08 | DAY 1 · ~40 MIN | USE: CHATGPT

THE STORY SO FAR

Jun Wei has the storyboard and the personas. Rachel wants the first real piece today: a blog article that people searching for CPF top-ups will find — and that every post can link to.

YOU'LL BUILD

**a 500-700-word blog article with dated sources, checked and fixed, with a Word copy**

Surface: ChatGPT (web search, your Horizon skills)

Features: one prompt runs the whole job: research · draft · fact-check and fin-compliance · fix · a person reads it last

© Tertiary Infotech Academy Pte Ltd

# Content Creator: A Quick Blog Article

USE CHATGPT · copy each prompt from the Prompts page (link in your lab README).

1. **New session** Start a new chat in the Horizon Marketing project and name it "Lab 8". Run all of this lab's prompts in it.

2. **Bring the skills** Use @skill-creator to add blog-post and fact-check to ChatGPT (sunny-voice and fin-compliance came in Lab 3).

3. **Write it** Copy and paste the prompt. ChatGPT researches, writes, checks and fixes the article.

4. **Read it** Read the article and the list of fixes. Say what to change, if anything.

© Tertiary Infotech Academy Pte Ltd

# Content Creator: A Quick Blog Article

PROMPT — ChatGPT: a quick blog

Write a quick blog article for Horizon with the blog-post, sunny-voice, fact-check and fin-compliance skills.
1. Pick one topic from strategy/storyboard.md (upload it) that a Singaporean would search for. Search the web for two current sources (CPF Board, MAS or MoneySense), each with its date.
2. Write 500-700 words: a title under 60 characters, every figure from facts-2026.md, one call to action (book a free 30-minute chat) and the full disclaimer.
3. Run fact-check and fin-compliance; fix every issue and list each fix in one line. Write for a business owner, in plain English. Save a Word copy (.docx) of the article.

**NOTE** One prompt can run the whole job — research, writing and checks. A person still reads the result before it goes anywhere.

© Tertiary Infotech Academy Pte Ltd

# Content Creator: A Quick Blog Article (cont.)

FOLLOW-UP — type any of these in the chat

Summarise the article in three sentences. Who is it for?

Why did you pick this topic, and who will search for it?

What did the checks find, and how did you fix it?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Content Creator: A Quick Blog Article

Check your work before moving on.

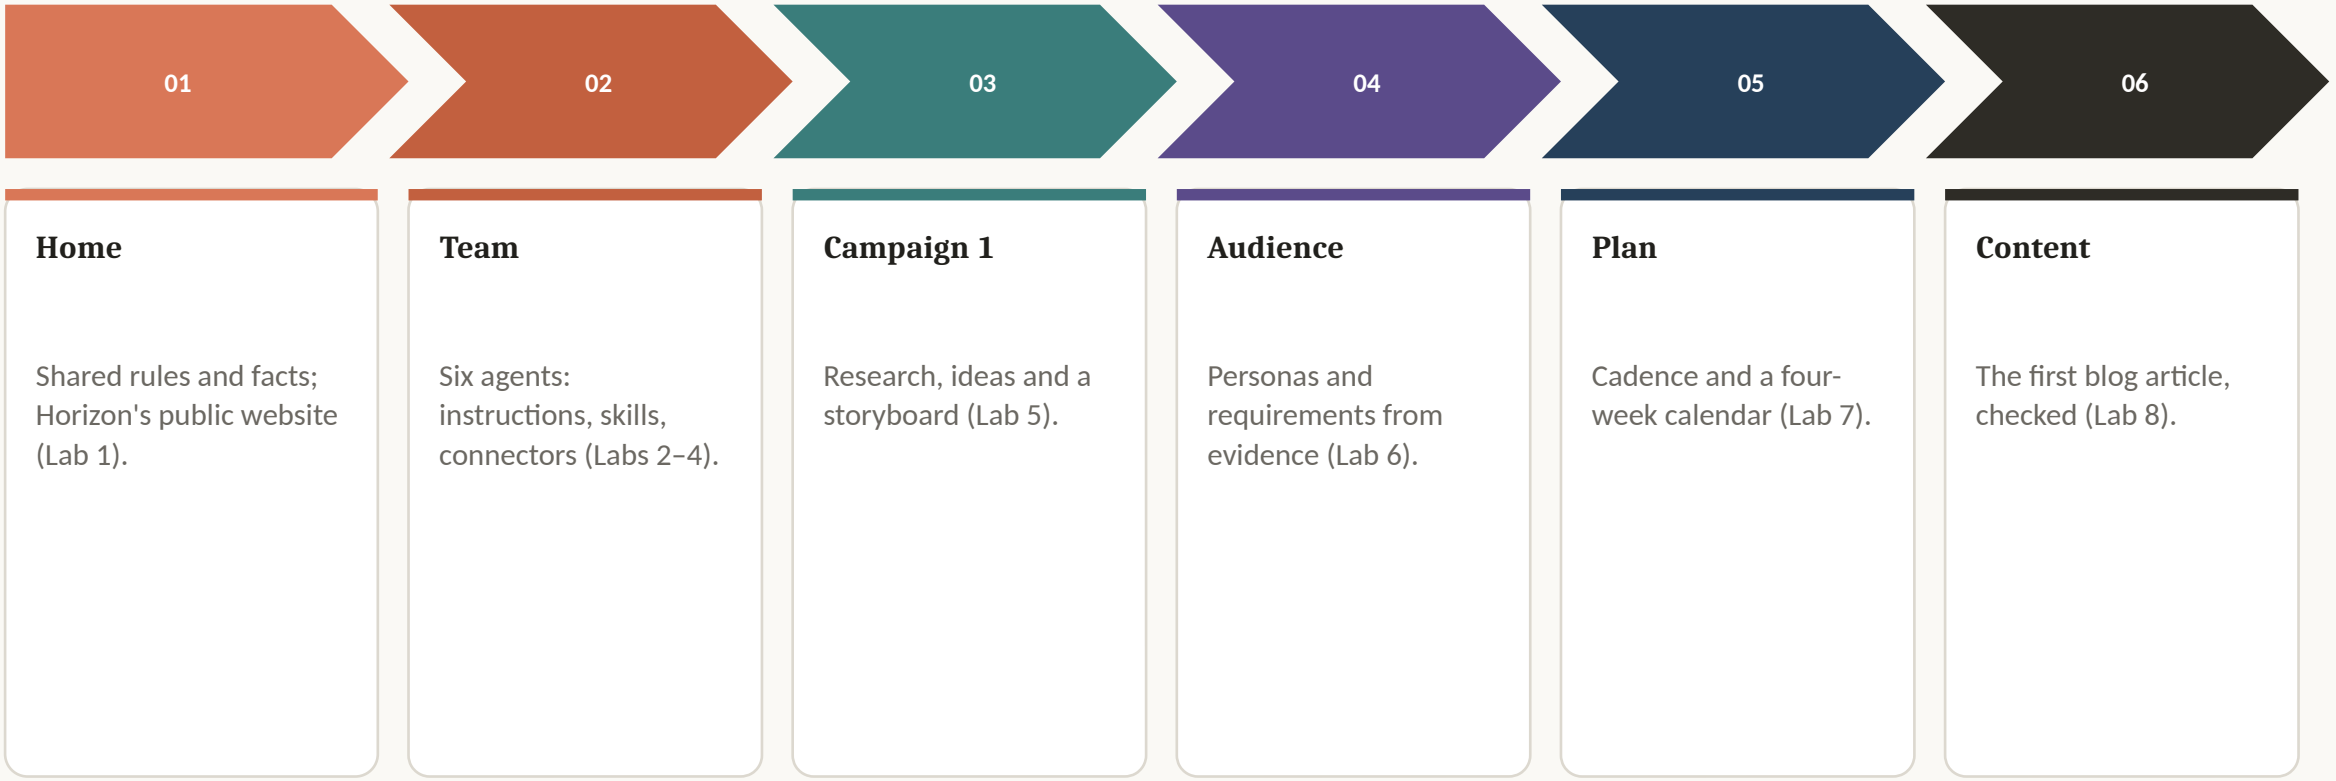

### CHECK YOUR WORK

- ✓ Two sources, each with a date and a link.
- ✓ The title is under 60 characters.
- ✓ Every figure is from Horizon's 2026 facts.
- ✓ The fixes are listed; no Critical or High issue is left.
- ✓ One call to action and the full disclaimer at the end.

© Tertiary Infotech Academy Pte Ltd

# Day 1: The Team Is Ready

Everything the campaigns need tomorrow is in place.

© Tertiary Infotech Academy Pte Ltd

TOPIC 3

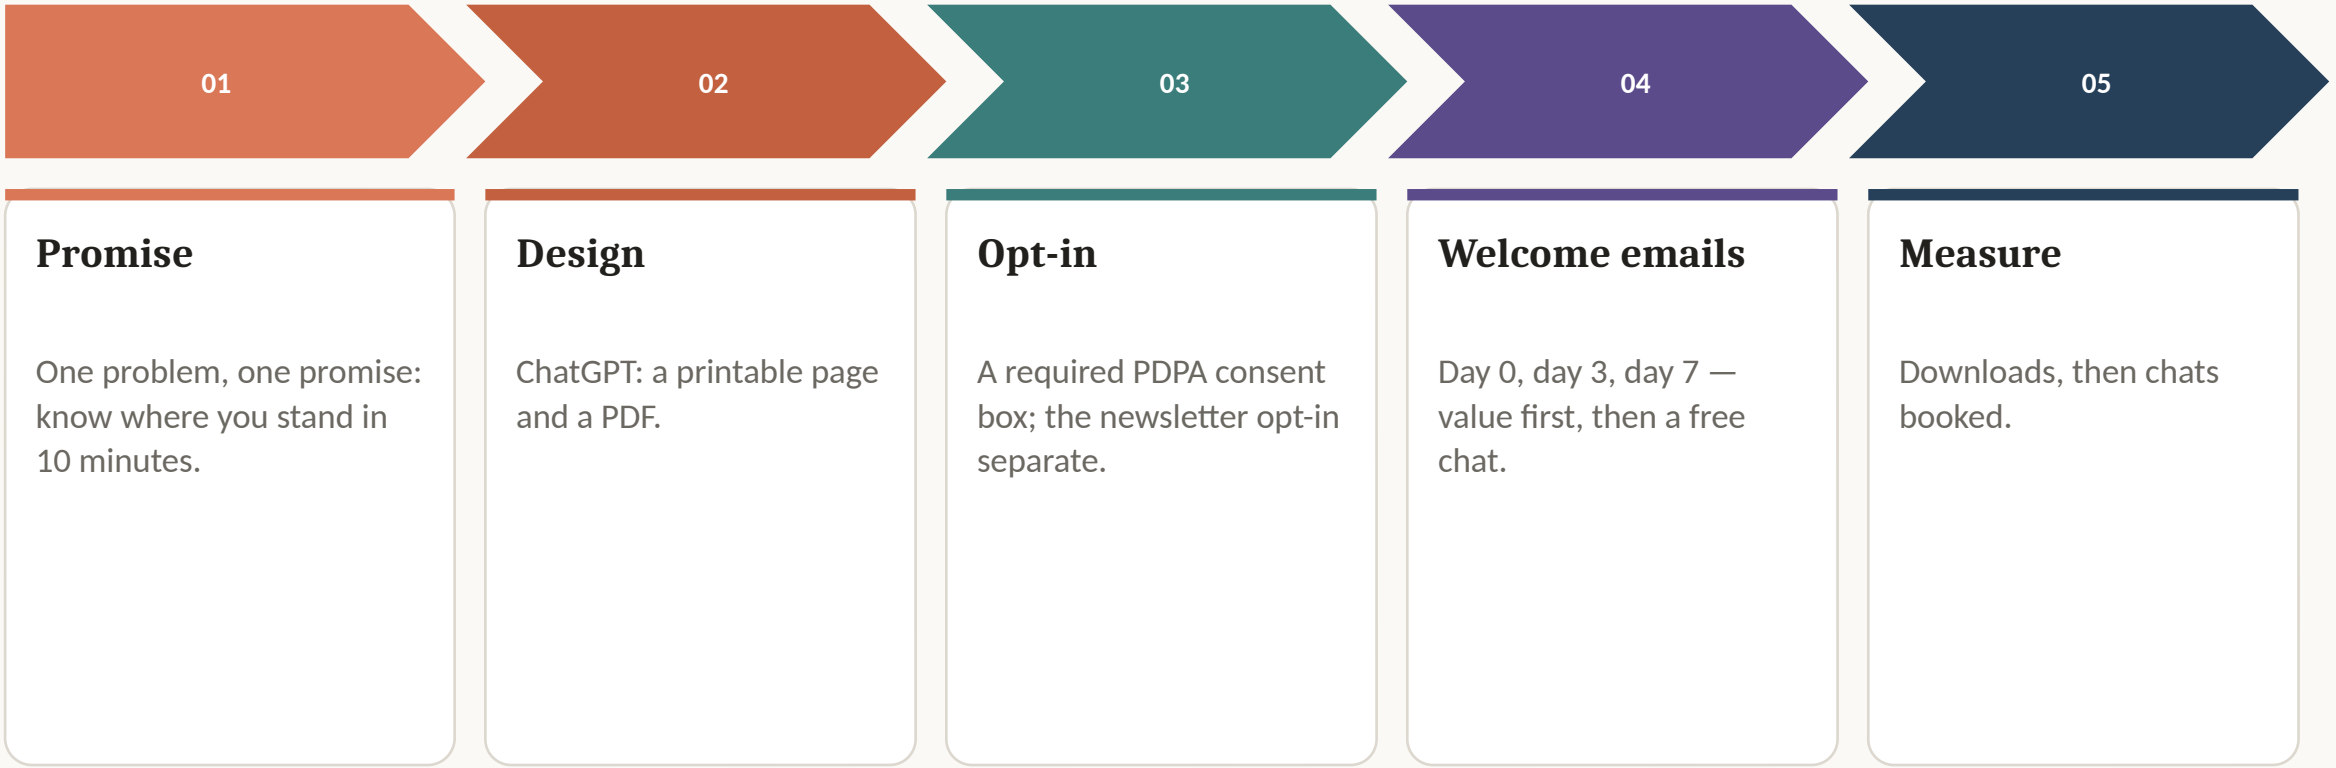

# Multi-Channel Content Creation and Agent Workflow Coordination

1. Subagents and the Lead's review
2. The lead magnet: a checklist people want, and its emails
3. Human in the loop — enforced, not requested
4. Campaigns 2–4: social week, newsletter + landing page, video
5. From approval to LinkedIn, Facebook, email and YouTube

© Tertiary Infotech Academy Pte Ltd

# Content That Earns a Sign-up

Lab 9: the Money Check-up Checklist and the emails that follow it.

TIP Lab 11 builds the landing page that offers it.

© Tertiary Infotech Academy Pte Ltd

LAB 09 · HANDS-ON

# The Lead Magnet: a Checklist and Its Welcome Emails

LAB 09 | DAY 2 · ~40 MIN | USE: CHATGPT

THE STORY SO FAR

Day 2. Before the campaign weeks start, Rachel wants the thing that turns readers into leads: the Money Check-up Checklist, designed to be downloaded, and the emails that follow it.

YOU'LL BUILD

**the Money Check-up Checklist as a printable A4 PDF and three welcome emails — with a Word copy of each**

Surface: ChatGPT (@Gmail drafts, your Horizon skills)

Features: lead-magnet skill · a printable A4 checklist (PDF) · a three-email welcome sequence · drafts only

© Tertiary Infotech Academy Pte Ltd

# The Lead Magnet: a Checklist and Its Welcome Emails

USE CHATGPT · copy each prompt from the Prompts page (link in your lab README).

1. **New session** Start a new chat in the Horizon Marketing project and name it "Lab 9". Run all of this lab's prompts in it.

2. **Bring the skills** Use @skill-creator to add lead-magnet and newsletter to ChatGPT.

3. **Design it** Copy and paste Prompt A. ChatGPT lays out the checklist and gives you a PDF; ask in the chat for any change.

4. **Write the welcome emails** After the checklist looks right, copy and paste Prompt B. The three emails also appear as drafts in your Gmail.

5. **Check it** After the three emails are saved, copy and paste Prompt C.

© Tertiary Infotech Academy Pte Ltd

# The Lead Magnet: a Checklist and Its Welcome Emails

PROMPT A — ChatGPT: the checklist

Use the lead-magnet skill. Turn data/checklist-items.md into the "Money Check-up Checklist": a title with one promise, the ten items as tick boxes, one figure from data/facts-2026.md, the next step (book a free chat) and the full disclaimer. Lay it out as a printable A4 page in the colours and fonts in data/brand.md and give me a PDF to download. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# The Lead Magnet: a Checklist and Its Welcome Emails (cont.)

PROMPT B — ChatGPT: the welcome emails

Write three welcome emails for people who download the checklist: day 0 (here it is), day 3 (the item most people miss — the retirement number), day 7 (book a free chat). Follow the newsletter and sunny-voice skills → content/email/welcome-sequence.md. Then, using @Gmail, create the three emails as DRAFTS in my Gmail, addressed to me. Send nothing. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# The Lead Magnet: a Checklist and Its Welcome Emails (cont.)

**PROMPT C — ChatGPT: check it**

Run fact-check and fin-compliance on the checklist text and the three emails. Show the issues in one table, with a fix for each. Once I agree, make the fixes in the files and in the Gmail drafts. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

**NOTE** A lead magnet earns an email address. Give real value first; the call to action comes last.

© Tertiary Infotech Academy Pte Ltd

# The Lead Magnet: a Checklist and Its Welcome Emails (cont.)

FOLLOW-UP — type any of these in the chat

Which checklist item do people most often miss, and why does it matter?

Read the day 3 email as a 55-year-old. Is anything unclear?

Explain each issue in one line: what is wrong, and the fix.

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# The Lead Magnet: a Checklist and Its Welcome Emails

Check your work before moving on.

### CHECK YOUR WORK

- ✓ The checklist uses Horizon's colours and all ten items.
- ✓ It makes one promise and ends with the full disclaimer.
- ✓ Three emails, each with a subject under 50 characters, are drafts in your Gmail — nothing was sent.
- ✓ Each email has one call to action, unsubscribe and the disclaimer.
- ✓ fin-compliance shows no Critical or High issue.

© Tertiary Infotech Academy Pte Ltd

# Subagents in Codex

No files to wire: ask directly, and Codex runs one subagent per role.

## Ask directly

"Use subagents — one per role, each following its card in agents/." Codex delegates when you ask.

## Watch the panel

The Subagents panel shows Active and Done. Click one to see its work and summary.

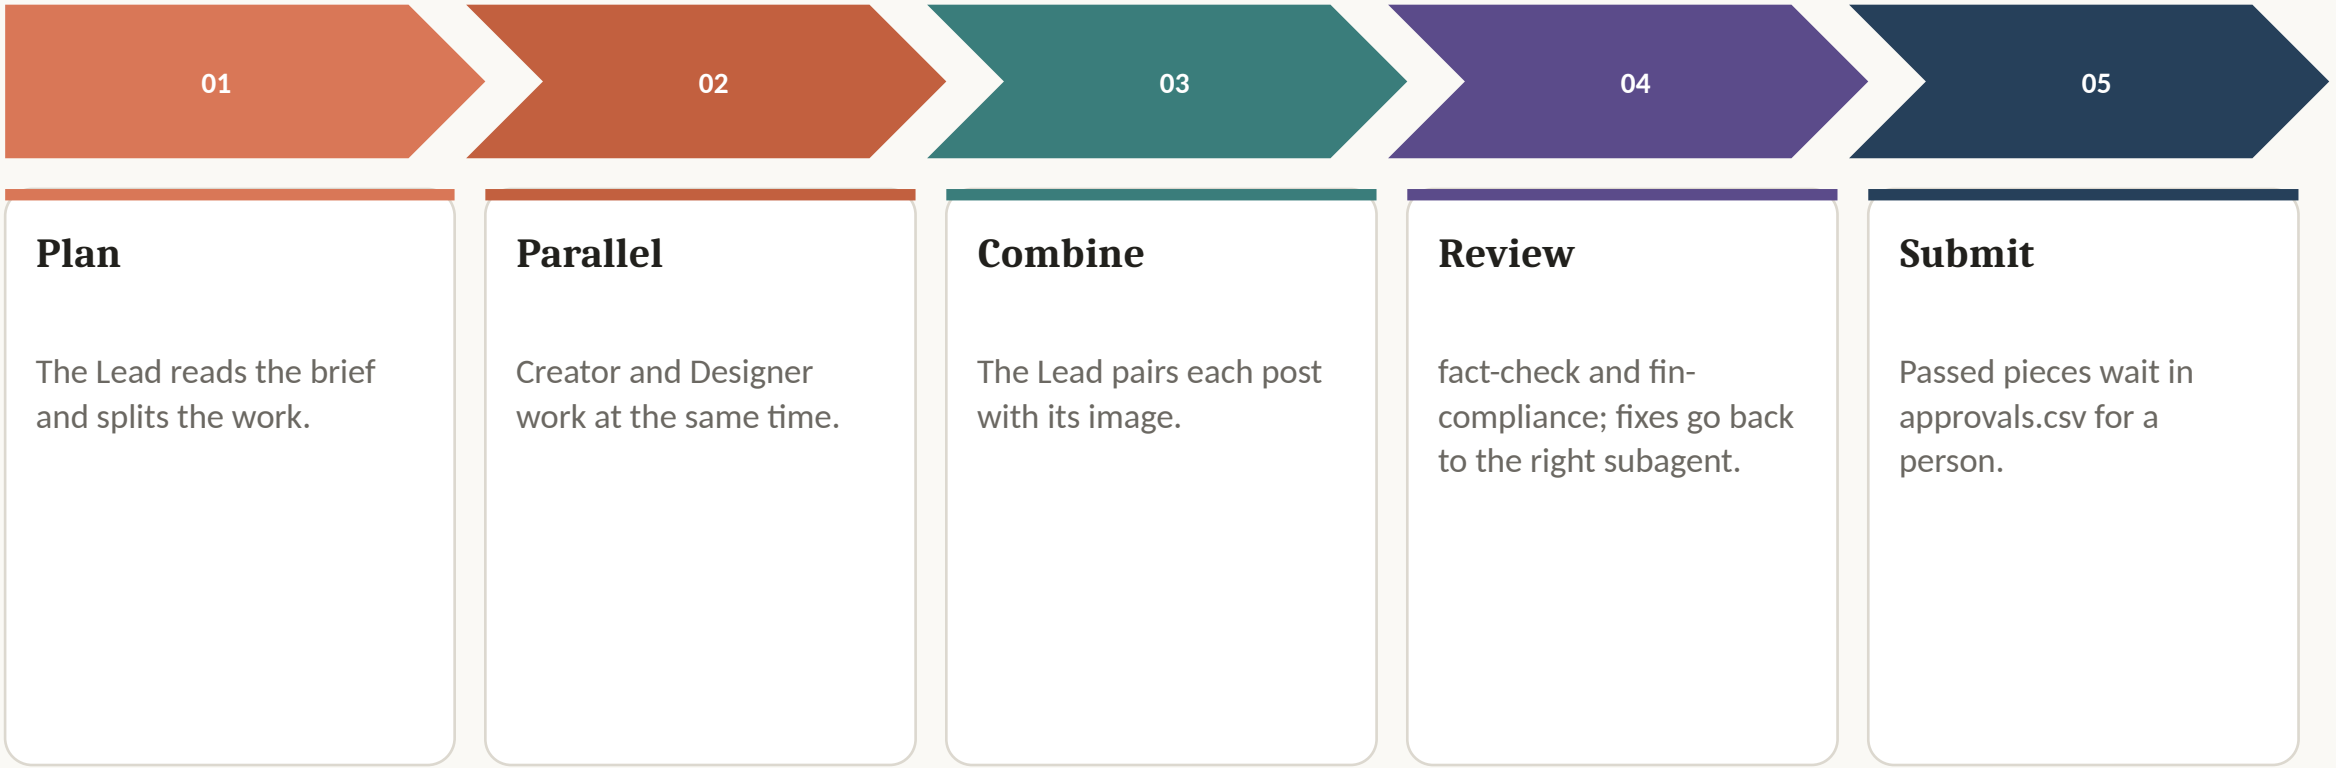

## They inherit your limits

Subagents run with your sandbox and permissions — keep workspace-write.

© Tertiary Infotech Academy Pte Ltd

# Parallel, Then Review

Subagents report back to the Lead; the Lead sends fixes back.

TIP Subagents talk to the Lead, not to each other. The Lead's review is what makes parallel work safe.

© Tertiary Infotech Academy Pte Ltd

# Which Pattern When?

Subagents alone, or subagents with the Lead's review loop.

| | SUBAGENTS | LEAD REVIEW LOOP |
|---|---|---|
| **Talks to** | Returns a result to the Lead | The Lead passes fixes back to the subagent |
| **Coordination** | The Lead splits the work | The Lead reviews, sends back and checks again |
| **Best for** | Research, analysis, one-off drafts | Copy ↔ design ↔ review loops |
| **Cost** | Lower: one round of results | Higher: every fix is another round |
| **Campaigns** | Labs 5, 6 | Labs 10, 11, 12, 15 |

TIP Subagents run with your sandbox and permissions. The Lead is the only one who talks to everyone.

© Tertiary Infotech Academy Pte Ltd

# Human in the Loop, Enforced

A rule in a prompt persuades. The publisher kit builds a gate that holds.

## Only people approve

approve.mjs refuses to run without an interactive terminal — an agent's tool call cannot approve.

## The approved words go out

The approval stores a hash. Edit one word and publish --live refuses until a person approves again.

## A hook stops agents

A PreToolUse hook blocks agents from running approve.mjs or publishing unapproved items — in Codex, you trust it first.

© Tertiary Infotech Academy Pte Ltd

# The Hook That Holds the Gate

Ask Codex to add it to .codex/hooks.json, then trust it. Exit code 2 blocks the call.

**Ask Codex**

```
Add a PreToolUse hook in .codex/hooks.json that runs
  node scripts/gate-hook.mjs
before every shell command. It must block any
command that runs approve.mjs, and any
publish.mjs --live whose item is not approved and
unchanged. Show me the hook, then ask me to trust it.
```

© Tertiary Infotech Academy Pte Ltd

# The Publishing APIs

publish.mjs is a dry run by default. Tokens live only in .env.

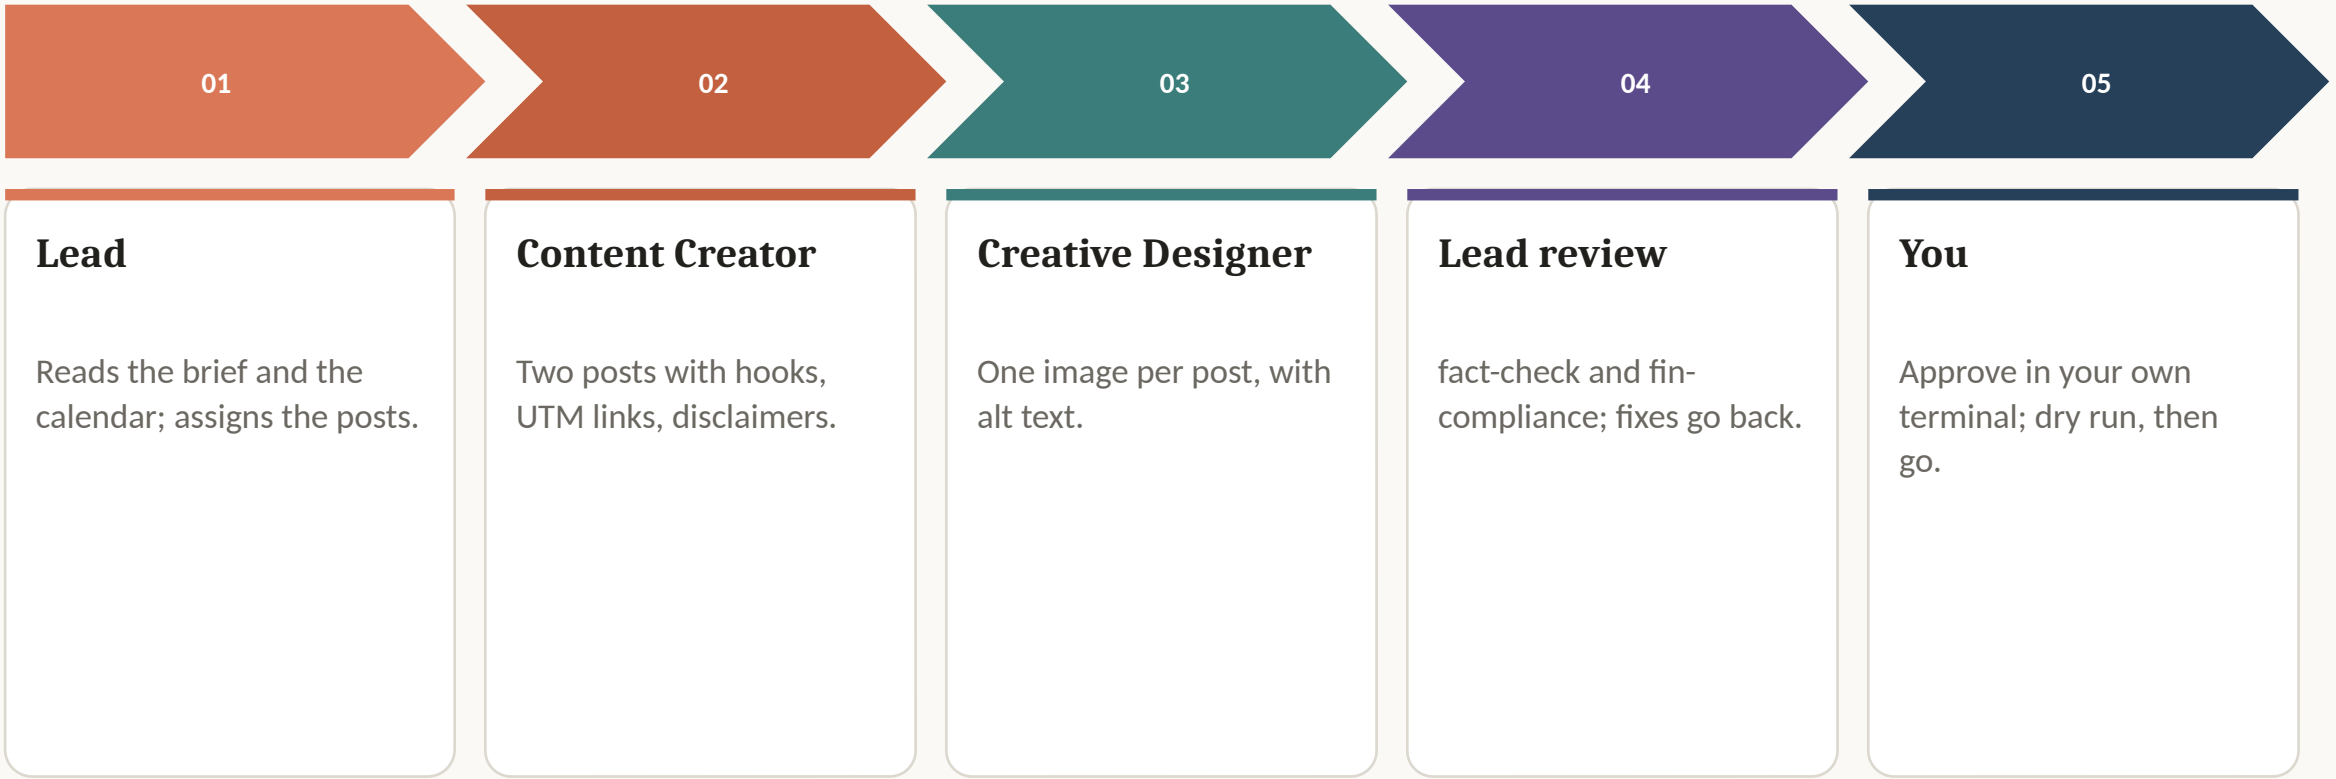

| CHANNEL | ENDPOINT | PERMISSION |
|---|---|---|
| **LinkedIn** | POST api.linkedin.com/rest/posts (LinkedIn-Version: YYYYMM) | w_member_social — your own profile |
| **Facebook** | POST graph.facebook.com/<version>/<page-id>/feed | Page token: pages_manage_posts |
| **YouTube** | Resumable upload to youtube/v3/videos, privacy private | youtube.upload; unaudited projects stay private |
| **Newsletter** | No API — HTML + text files, then Gmail drafts | Consent = yes, unsubscribed = no |

TIP No accounts? Every lab works in dry-run mode: you see the exact request that would be sent.

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: A Social Media Week

Lab 10, a demo: one LinkedIn and one Facebook post, each with a visual.

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: Social Media Posts (Demo)

LAB 10 DAY 2 · ~40 MIN USE: CODEX

THE STORY SO FAR

Week 1 of the campaign starts Monday. As a demo, one LinkedIn post and one Facebook post, each with a visual — and Rachel's one rule: nothing goes out unless a person approved that exact version.

YOU'LL BUILD

**two posts with images, reviewed, approved by you and posted (or dry-run) — with a Word copy of each**

Surface: Codex (subagents) → LinkedIn, Facebook

Features: the publisher kit · creator and designer subagents in parallel · the Lead's review · human approval → post

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: Social Media Posts (Demo)

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 10". Run all of this lab's prompts in it.
2. **Switch on the gate** The publisher kit is in your scripts/ folder since Lab 1. Ask Codex: "Add a hook that blocks any command running scripts/approve.mjs." Then trust it.
3. **Test the gate** Ask Codex to approve anything. approve.mjs refuses without a person at a terminal.
4. **Run the team** Copy and paste Prompt A. Watch the Subagents panel: Active, then Done.
5. **Read the review** The Lead's fact-check and fin-compliance table — at least one fix.
6. **Approve as a person** In your own terminal: node scripts/approve.mjs <id> --by "Your Name".
7. **Publish** After you have approved the posts, copy and paste Prompt B. A dry run only: it shows what would be sent.
8. **Optional: post through the apps** Follow "Optional: post through LinkedIn and Facebook" in this lab's README.

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: Social Media Posts (Demo)

PROMPT A — Codex: the social team

You are the Lead. Plan Week 1 social from data/social-brief.md and strategy/calendar.csv. Use subagents in parallel, each following its card:
- content-creator: 1 LinkedIn + 1 Facebook post with linkedin-post, facebook-post and copywriting, one file each in content/social/week-01/, with the frontmatter in data/publishing-spec.md. Each post links to my website, http://localhost:8080/, with UTM tags.
- creative-designer: one image per post with $imagegen and alt text, from the brief. Save each as a PNG beside its post and fill in the post's image and alt lines, so the image is posted with it. Then run fact-check and fin-compliance on every post and send each fix back to the right subagent. When a post passes, run node scripts/submit.mjs on it. Publish nothing. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: Social Media Posts (Demo) (cont.)

**PROMPT B — Codex: publish**

For every Week 1 post approved in review/approvals.csv, run node scripts/publish.mjs <id> as a dry run and show me each request. Wait for me to say "go" before any --live run.

**NOTE** Parallel subagents are fast; the Lead's review is what makes them safe.

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: Social Media Posts (Demo) (cont.)

FOLLOW-UP — type any of these in the chat

Which post do you expect to do best, and why?

What did the Lead send back to the writer, and why?

Is anything here not ready to post? Explain in plain English.

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Campaign 2: Social Media Posts (Demo)

Check your work before moving on.

**CHECK YOUR WORK**

- ✓ The hook (or approve.mjs) stopped the agent from approving.
- ✓ Two subagents ran in parallel; both reached Done.
- ✓ The Lead sent at least one fix back to a subagent.
- ✓ Two posts with images, alt text, frontmatter and UTM links; each dry run shows its image being uploaded.
- ✓ You approved in your own terminal; the rows show your name and a hash.
- ✓ Dry runs printed every request; nothing went live unless you said go.

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter + Landing Page

Lab 11: three specialists, one email and one page, consent first.

01

### Content Creator

The issue and the landing-page copy.

02

### Website Designer

The checklist page, page-qa, then Sites.

03

### Growth Analyst

Recipients by consent: 31 of 40.

04

### Lead

Checks everything; the build waits for you.

05

### Drafts

Gmail drafts — one to you to test. Nothing sent.

© Tertiary Infotech Academy Pte Ltd

# Consent Decides Who Gets Mail

The PDPA, applied by an agent that counts.

### Opt-in only

consent = yes and unsubscribed = no. Everyone else goes to excluded.csv with a reason.

### Every email carries

An unsubscribe link, Horizon's address and the short disclaimer.

### The page collects little

Name, email, a required consent box, a separate unticked newsletter opt-in.

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter and a Landing Page

LAB 11 DAY 2 · ~45 MIN

USE: CODEX, THEN CHATGPT WORK

THE STORY SO FAR

The Sunny Sunday email books chats most cheaply. November's issue promotes a new landing page for the free checklist — and must reach only the 31 people who opted in.

YOU'LL BUILD

**the November newsletter, its recipient list, the landing page published, and Gmail drafts — with a Word copy of each**

Surface: Codex (subagents) → @Sites → ChatGPT Work (@Gmail)

Features: creator writes, website designer builds the lead-magnet page, analyst filters by consent, the Lead checks · drafts only

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter and a Landing Page

USE CODEX, THEN CHATGPT WORK · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 11". Run all of this lab's prompts in it.
2. **Start the campaign** Copy and paste Prompt A.
3. **Approve the words** Read the email and the page copy; approve nl-2026-11 in your own terminal.
4. **Publish the page** The website designer runs page-qa and publishes web/checklist/ as @Sites.
5. **Check the list** Only people with consent = yes and unsubscribed = no are on the recipient list.
6. **Create the drafts** After the page is published and the list checked, copy and paste Prompt B.
7. **Send one test** Send only the draft addressed to yourself, and read it on your phone.

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter and a Landing Page

PROMPT A — Codex: the newsletter team

You are the Lead for the November Sunny Sunday email (data/newsletter-brief.md, data/newsletter-spec.md) and its landing page (data/landing-page-brief.md). Use subagents:
- content-creator: issue.md (id nl-2026-11) with newsletter, and the landing-page copy.
- website-designer: web/checklist/index.html with lead-magnet, web-design and landing-page; page-qa.
- growth-analyst: recipients.csv and excluded.csv from data/subscribers.csv. Check everything, then submit nl-2026-11.
After I approve, build newsletter.html and .txt, and deploy web/checklist with @Sites (Only those invited). Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter and a Landing Page (cont.)

**PROMPT B — ChatGPT Work: Gmail drafts**

Using @Gmail, create a DRAFT of the newsletter in content/newsletter/2026-11/newsletter.html (upload it) for each address in recipients.csv, plus one draft to me only. Send nothing. Report how many drafts and how many people were excluded, and why.

**NOTE** Consent decides who gets mail — not the agent and not the deadline. Marketing to people who did not opt in breaks the PDPA.

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter and a Landing Page (cont.)

FOLLOW-UP — type any of these in the chat

Explain the email in three sentences. What do we want readers to do?

Who was left off the mailing list, and why?

What did the landing-page check look at, and did it pass?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Campaign 3: Newsletter and a Landing Page

Check your work before moving on.

**CHECK YOUR WORK**

- ✓ Three specialists worked on the campaign; the Lead checked all.
- ✓ You approved nl-2026-11 in your own terminal before the build.
- ✓ The landing page passed page-qa and is published.
- ✓ The recipient list holds 31 people; 9 are excluded, with reasons.
- ✓ The email has unsubscribe, address and disclaimer.
- ✓ Drafts only — nothing was sent to the list.

© Tertiary Infotech Academy Pte Ltd

# Campaign 4: The YouTube Explainer

Lab 12: the team writes and designs; you approve twice.

### Strategist and Creator

The angle, then 5–7 scenes with words on screen and a description with chapters and an AI disclosure.

### Creative Designer

Storyboard, thumbnail, then the render with video-render — ffmpeg, 1920×1080, under 90 s.

### Upload privately

Approve the words, then the finished video. It uploads as private; a person makes it public.

© Tertiary Infotech Academy Pte Ltd

LAB 12 · HANDS-ON

# Campaign 4: The YouTube Explainer

LAB 12 | DAY 2 · ~45 MIN | USE: CODEX

THE STORY SO FAR

Pre-retirees say they would rather watch than read. Rachel wants the first 'Money in Plain English' video, uploaded privately until she has watched it.

YOU'LL BUILD

**the script, storyboard and thumbnail, the video, and a private YouTube upload (or dry run) — with a Word copy of each**

Surface: Codex (subagents, $imagegen, render, upload)

Features: strategist angle · creator script · designer storyboard, thumbnail and render · approve twice · private upload

© Tertiary Infotech Academy Pte Ltd

# Campaign 4: The YouTube Explainer

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 12". Run all of this lab's prompts in it.
2. **Script it as a team** Copy and paste Prompt A.
3. **Approve the script** Read the scenes, title and description; approve yt-ep01-script in your own terminal.
4. **Render it** After you approve the script, copy and paste Prompt B. The designer runs video-render.
5. **Approve the video** Ask the Lead to submit the video, watch ep01.mp4 to the end, then approve yt-ep01.
6. **Upload** After you approve the video, copy and paste Prompt C. It goes up as private.
7. **Disclose** In YouTube Studio, answer the altered or synthetic content question before making it public.

© Tertiary Infotech Academy Pte Ltd

# Campaign 4: The YouTube Explainer

PROMPT A — Codex: the video team

You are the Lead for YouTube episode 1 (data/youtube-brief.md). Use subagents:
growth-strategist (the angle and hook), content-creator (content/video/ep01/scenes.json, 5-7 scenes, and ep01.md with title, tags, description, chapters and the AI disclosure) and creative-designer (a thumbnail with $imagegen, using brand-visuals). Fact-check and fin-compliance the script, then submit it as yt-ep01-script. Publish nothing. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Campaign 4: The YouTube Explainer (cont.)

**PROMPTS B and C — Codex: render and upload**

PROMPT B
Use the creative-designer subagent with video-render on the approved scenes.json → content/video/ep01/ep01.mp4 (data/video-spec.md). Check it with ffprobe. Do not change approved words.

PROMPT C
Run node scripts/publish.mjs yt-ep01 as a dry run. If I say "go", run it with --live: it uploads as PRIVATE. Give me the YouTube Studio link.

**NOTE** Approve twice: once for the words, once for the finished video. Rendering can break what the script got right.

© Tertiary Infotech Academy Pte Ltd

# Campaign 4: The YouTube Explainer (cont.)

FOLLOW-UP — type any of these in the chat

Walk me through the video scene by scene, in plain English.

Which figure on screen should I double-check, and against what?

What does the AI disclosure say, and why do we need it?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Campaign 4: The YouTube Explainer

Check your work before moving on.

### CHECK YOUR WORK

- [ ] The strategist, creator and designer each delivered their part.
- [ ] You approved the script, then the finished video.
- [ ] ep01.mp4 is 1920x1080, under 90 seconds, every scene present.
- [ ] Every figure on screen matches Horizon's 2026 facts.
- [ ] The description has chapters, link, disclaimer and AI disclosure.
- [ ] The upload is private (or the dry run printed the request).

© Tertiary Infotech Academy Pte Ltd

# Where You Are Now

Three campaigns, every piece checked by the Lead and approved by a person. But the team stops when you close the laptop.

### Gate · Lab 10

People approve, hashes hold, a hook stops agents.

### Campaigns · Labs 10–12

Social week, newsletter + landing page, the video.

### What is missing

A team that works every week on its own — and rules to govern it. That is Topic 4.

© Tertiary Infotech Academy Pte Ltd

TOPIC 4

# Content Distribution, Strategy Guidelines and Responsible AI Practices

1. Campaign 5: always on, with a scheduled task
2. Responsible AI for financial content
3. Measure the patterns; write the team playbook
4. Subagents at work: argue a strategy, then a QA loop

© Tertiary Infotech Academy Pte Ltd

# From Skill to Schedule

Lab 13: do the job once, keep it as a skill, let a schedule run it.

| 01 | 02 | 03 | 04 | 05 |
|---|---|---|---|---|
| **Do** | **Verify** | **Skill** | **Schedule** | **Review** |
| The Growth Analyst writes the weekly report once, from Drive. | Fix the sections until the report is right. | campaign-report holds the procedure. | A scheduled task runs it every Monday at 8am. | It leaves a Gmail draft — a person decides. |

TIP Scheduled runs appear in Scheduled; Plus allows 5 active tasks.

© Tertiary Infotech Academy Pte Ltd

TOPIC 4 • ALWAYS ON

# Automate the Preparation, Not the Decision

What a scheduled agent should and should not do for a regulated firm.

### Prepare

Read the data, run the skill, draft the report, flag what needs a decision.

### Draft, never send

Write "draft only — never send, publish or approve" in the skill AND the schedule.

### Keep a human gate

The schedule fills an inbox. A named person still decides.

© Tertiary Infotech Academy Pte Ltd

# Campaign 5: Always On — the Weekly Growth Report

LAB 13 DAY 2 · ~35 MIN USE: CHATGPT WORK

THE STORY SO FAR

The team must keep working after class. Rachel wants the Growth Analyst's report in her inbox every Monday — as a draft she decides on.

YOU'LL BUILD

**a scheduled task that drafts the weekly growth report every Monday at 8am, and one draft in Gmail**

Surface: ChatGPT Work (skill, scheduled task, @Drive, @Gmail)

Features: the Growth Analyst's campaign-report skill · do · verify · schedule · draft-only delivery

© Tertiary Infotech Academy Pte Ltd

# Campaign 5: Always On — the Weekly Growth Report

USE CHATGPT WORK · copy each prompt from the Prompts page (link in your lab README).

1. **New session** Start a new ChatGPT Work chat and name it "Lab 13". Run all of this lab's prompts in it.
2. **Bring the skill** Use @skill-creator to add campaign-report to ChatGPT.
3. **Do it once** Copy and paste Prompt A. Refine the report until it is right.
4. **Schedule it** After the report is right, copy and paste Prompt B. Runs appear in Scheduled.
5. **Run it now** Run the task once and open the Gmail draft.
6. **Pause it** After class, pause the scheduled task.

© Tertiary Infotech Academy Pte Ltd

# Campaign 5: Always On — the Weekly Growth Report

PROMPTS A and B — ChatGPT Work

PROMPT A

Act as Horizon's Growth Analyst. Using @Google Drive, read campaign-results.csv in the Horizon Studio folder. Use the campaign-report skill and weekly-report-brief.md. Leave the report as a @Gmail DRAFT to me, subject "Horizon weekly growth report" and today's date. Send nothing.

PROMPT B

Do this every Monday at 8am, as a scheduled task. Draft only — never send, publish or approve anything.

**NOTE** Automate the preparation, not the decision. The schedule fills an inbox; a person still decides.

© Tertiary Infotech Academy Pte Ltd

# Campaign 5: Always On — the Weekly Growth Report (cont.)

FOLLOW-UP — type any of these in the chat

What is the one decision this report asks me to make?

Which channel gets us a chat most cheaply, and how sure are you?

What would you change in next month's budget, and why?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Campaign 5: Always On — the Weekly Growth Report

Check your work before moving on.

**CHECK YOUR WORK**

- ✓ The campaign-report skill is available in ChatGPT.
- ✓ The report names the cheapest channel per chat (the newsletter).
- ✓ It recommends a budget split with a reason per channel.
- ✓ A scheduled task runs Mondays at 8am with draft-only instructions.
- ✓ A manual run left a draft — nothing was sent.
- ✓ The task is paused after class.

© Tertiary Infotech Academy Pte Ltd

# Responsible AI in the Team

Each risk has a control you built in this course.

| RISK | CONTROL | WHERE |
|---|---|---|
| **Wrong figure** | fact-check skill; the Lead's review; facts sheet | Labs 3, 5, 10–12 |
| **Read as advice or a promise** | fin-compliance; disclaimers; no returns | Labs 3, 10–12 |
| **An agent with too much access** | Least-privilege connectors per agent | Lab 4 |
| **Unapproved post** | approve.mjs (people only), hash, hook | Lab 10 |
| **Marketing without consent** | The Analyst filters by consent | Lab 11 |
| **Undisclosed AI media** | Description line + YouTube disclosure | Lab 12 |

TIP Keep keys in .env, client data out of prompts, and the approval records for audit.

© Tertiary Infotech Academy Pte Ltd

# Measure What Matters

Lab 14: the numbers decide next month — and which patterns earn their tokens.

### Cost per chat

Spend ÷ chats booked shows which channel works: email first, YouTube last.

### Defects before a person

A Lead that catches mistakes saves the reviewer's time; one agent alone caught none.

### The playbook

Roster, instructions, skills, connectors, approval matrix, incidents — so the team runs without you.

© Tertiary Infotech Academy Pte Ltd

LAB 14 • HANDS-ON

# Measure, Govern and Write the Team Playbook

LAB 14 | DAY 2 • ~40 MIN | USE: CODEX

THE STORY SO FAR

Eight weeks in. Rachel asks which ways of running agents earned their tokens, and how the team runs safely after you leave.

YOU'LL BUILD

**the agent-pattern comparison and the team playbook — with a Word copy of each**

Surface: Codex (subagents)

Features: compare agent patterns · the roster: instructions, skills, connectors · approval matrix · responsible-AI controls

© Tertiary Infotech Academy Pte Ltd

# Measure, Govern and Write the Team Playbook

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 14". Run all of this lab's prompts in it.

2. **Check the data** The assets are already in data/. Open one and skim it.

3. **Compare the patterns** Copy and paste Prompt A.

4. **Write the playbook** After the Lead shows the comparison, copy and paste Prompt B.

5. **Review it as Rachel** Add one rule of your own and say why.

© Tertiary Infotech Academy Pte Ltd

# Measure, Govern and Write the Team Playbook

PROMPT A — Codex: compare

Use the growth-analyst subagent. From data/run-log.csv compare the patterns we used — one agent, subagents, parallel subagents with a Lead review and the scheduled task — on minutes, tokens, defects caught before a person and human edits. Which pattern pays off for which job? Save reports/agent-comparison.md. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

© Tertiary Infotech Academy Pte Ltd

# Measure, Govern and Write the Team Playbook (cont.)

**PROMPT B — Codex: the playbook**

Write strategy/team-playbook.md with data/playbook-outline.md. Include the roster: for each agent its instructions file in agents/, its skills, connectors, model and what it may never do; the approval matrix by risk; the rules in data/responsible-ai-checklist.md; and what to do when a wrong post goes out. Then run fin-compliance on it. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

**NOTE** Teams cost more tokens. The run log shows what you buy with them: defects caught before a person, and fewer edits.

© Tertiary Infotech Academy Pte Ltd

# Measure, Govern and Write the Team Playbook (cont.)

FOLLOW-UP — type any of these in the chat

In one line each: when should we use one agent, subagents and a Lead review?

Who must approve a post that has a CPF figure in it?

A wrong post went out. What are the first three things we do?

**NOTE** Ask until the result makes sense to you — then decide.

© Tertiary Infotech Academy Pte Ltd

# Measure, Govern and Write the Team Playbook

Check your work before moving on.

**CHECK YOUR WORK**

- ✓ The comparison shows the one-agent baseline caught 0 defects.
- ✓ It says which pattern suits which job, with numbers.
- ✓ The roster lists all six agents with skills and connectors.
- ✓ The approval matrix says who approves CPF and tax figures.
- ✓ It has an incident procedure, and your own rule.

© Tertiary Infotech Academy Pte Ltd

# The Lead in the Middle

Subagents cannot message each other. When agents must talk, the Lead carries every message.

01

### Ask

The Lead gives each subagent its job and card.

02

### Return

Each subagent reports back to the Lead only.

03

### Relay

The Lead passes one agent's work to the other.

04

### Repeat

A rebuttal, or a fix and a new audit — another round.

05

### Decide

A person makes the call and approves.

TIP Lab 15 counts how many messages the Lead had to relay.

© Tertiary Infotech Academy Pte Ltd

# A Team That Argues

Lab 15, Part 1: test a strategy before Horizon spends on it.

## Advocate · growth-strategist

- Argues FOR the "Turning 55" CPF explainer
- Cites results, personas and the facts sheet
- Answers the critic's case — two rebuttals

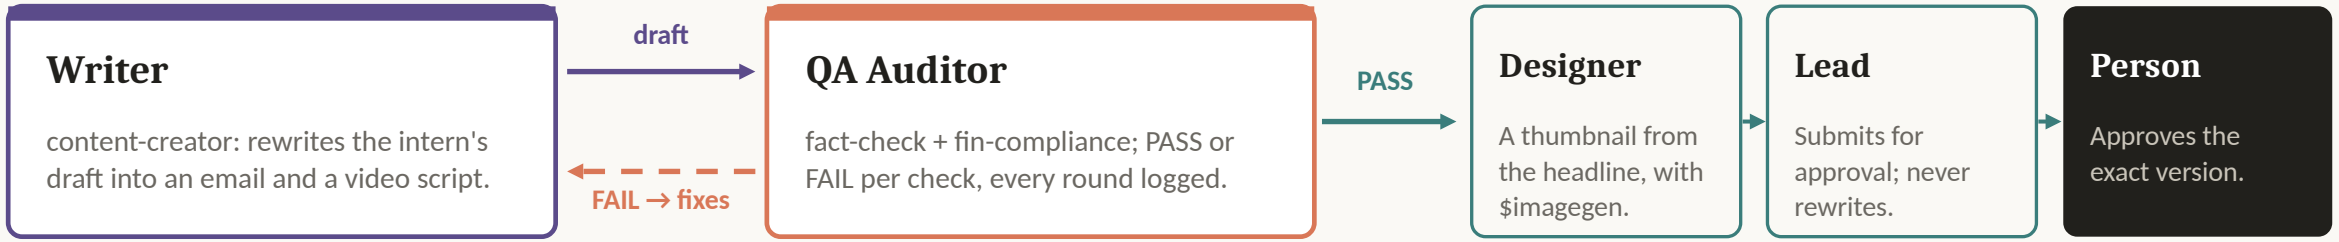

## Critic · growth-analyst

- Argues AGAINST it — cost, timing, audience
- Every point backed by a file, not an opinion
- The Lead judges; a person makes the call

© Tertiary Infotech Academy Pte Ltd

# The QA Loop

Lab 15, Part 2: a failed audit goes back to the writer — the Lead passes the lines on and never fixes them itself.

## THE AUDIT FAILS WHEN

1. A figure is not in facts-2026.md
2. A promise of savings or returns
3. Advice ("everyone should...")
4. A wrong age or a missing disclaimer

Three rounds at most — then the Lead escalates to a person.

© Tertiary Infotech Academy Pte Ltd

LAB 15 · HANDS-ON

# Subagents at Work: A Strategy Debate and a QA Loop

LAB 15 | DAY 2 · ~30 MIN | USE: CODEX

THE STORY SO FAR

January is for people turning 55. Before Horizon spends on a CPF explainer for them, Rachel wants it argued both ways — and the intern's draft checked until it passes.

YOU'LL BUILD

**the decision (pros, cons, verdict), then an email, a video script and a thumbnail that passed QA, submitted for your approval — with a Word copy of each**

Surface: Codex (subagents: an advocate, a critic, a writer, a QA Auditor and a designer; the Lead relays)

Features: an advocate and a critic argue the pros and cons · the Lead judges · a writer and a QA Auditor loop until PASS · the Lead passes each FAIL back to the writer · human approval

# Subagents at Work: A Strategy Debate and a QA Loop

USE CODEX · copy each prompt from the Prompts page (link in your lab README).

1. **New session** In Codex start a new thread in horizon-studio and name it "Lab 15". Run all of this lab's prompts in it.
2. **Part 1: the debate** Copy and paste Prompt A. The advocate and the critic each make their case; the Lead passes each case to the other for a rebuttal.
3. **Decide** Read the decision. Reply "go", "go with conditions" or "no-go" — the call is yours.
4. **Part 2: the QA loop** After you have made the call, copy and paste Prompt B. The audit fails on round 1; watch the Lead pass the fixes back to the writer.
5. **Approve as a person** Read the pieces and the QA report, then in your own terminal: node scripts/approve.mjs <id> --by "Your Name".
6. **Compare** After you have approved the pieces, copy and paste Prompt C. How many fixes did the Lead have to relay?

# Subagents at Work: A Strategy Debate and a QA Loop

PROMPT A — Codex: the strategy debate

Test the strategy in data/turning-55-brief.md before we spend on it. You are the Lead and the judge: do not argue. Use two subagents in parallel:
- advocate, following agents/growth-strategist.md:
  argue FOR the strategy.
- critic, following agents/growth-analyst.md: argue AGAINST it.
- Both: cite data/campaign-results.csv, strategy/personas.md, data/facts-2026.md or data/compliance-checklist.md for every point. Then give each one the other's case and ask for a rebuttal — two rounds at most. Write strategy/turning-55-decision.md with the pros, the cons, your verdict (go / go with conditions / no-go) and the conditions. Show me the verdict first, the pros and cons side by side, the debate round by round, and what I do next. Then wait for my decision. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

# Subagents at Work: A Strategy Debate and a QA Loop (cont.)

PROMPT B — Codex: the QA loop

Run Part 2 of data/turning-55-brief.md, using my decision. Use subagents, each following its card:
- writer (content-creator): rewrite data/turning-55-draft.md into content/turning-55/email.md and content/turning-55/video-script.md.
- qa-auditor: audit each piece with fact-check and fin-compliance; write review/turning-55-qa.md, one section per round, PASS or FAIL per check, with the lines to fix.
- On FAIL, give the auditor's lines to the writer unchanged and audit again. Three rounds at most, then ask me.
- designer (creative-designer): once a piece passes, make one thumbnail with $imagegen and alt text, from its headline.
- You, the Lead: never write or fix content. When everything passes, run node scripts/submit.mjs on each piece. Publish nothing. Show me the QA report: one row per round, PASS or FAIL per check. Write for a business owner, in plain English: no codes, IDs, file names or line numbers; start with what it means and what I do next. Save a Word copy (.docx) of each result.

# Subagents at Work: A Strategy Debate and a QA Loop (cont.)

**PROMPT C — Codex: compare**

Count how many fixes you relayed from the qa-auditor to the writer, and how many rounds each piece needed. In three lines: what would change if the writer and the auditor could message each other directly?

**NOTE** Use subagents when only the result matters. When the agents must talk — to argue, or to send work back — the Lead becomes the messenger, and every message costs a turn.

# Subagents at Work: A Strategy Debate and a QA Loop (cont.)

FOLLOW-UP — type any of these in the chat

Summarise the debate: the best point for, the best point against, and your verdict.

What failed in the first QA round, in plain English?

How many rounds did each piece need, and why?

**NOTE** Ask until the result makes sense to you — then decide.

# Subagents at Work: A Strategy Debate and a QA Loop

Check your work before moving on.

### CHECK YOUR WORK

- ✓ The advocate and the critic each answered the other's case; every point cites a file.
- ✓ The decision has pros, cons, a verdict — and you made the call.
- ✓ Round 1 of the QA report FAILED: the FRS figure, CPF LIFE "from 55", the promised payout, the advice and the missing disclaimer.
- ✓ The Lead passed the fixes to the writer; a later round PASSED.
- ✓ You approved in your own terminal; the rows show your name and a hash.
- ✓ You know how many fixes the Lead relayed.

# How Each Pattern Is Triggered

Five ways your team runs. The difference is what sets each one off.

BY DELEGATION

## Subagents

The Lead starts them when you ask — or when a task matches an agent's description.

e.g.

```
"use subagents,
one per role"
```

agents/ role cards

AFTER THE WORK

## Lead review

The Lead combines subagent results and sends fixes back before a person sees anything.

e.g.

```
fact-check
fin-compliance
```

AGENTS.md rule

ON DEMAND

## Skills

Loaded when the task matches the description. Free until then.

e.g.

```
campaign-brief
video-render
```

.agents/skills/

ON AN EVENT

## Hooks

Run every time an event fires — before a tool runs. The model cannot skip them.

e.g.

```
PreToolUse:
gate-hook.mjs
```

.codex/hooks.json (trusted)

ON THE CLOCK

## Scheduled tasks

Run a skill on a schedule and leave the result for a person.

e.g.

```
Mondays 8am:
campaign-report
```

ChatGPT Work

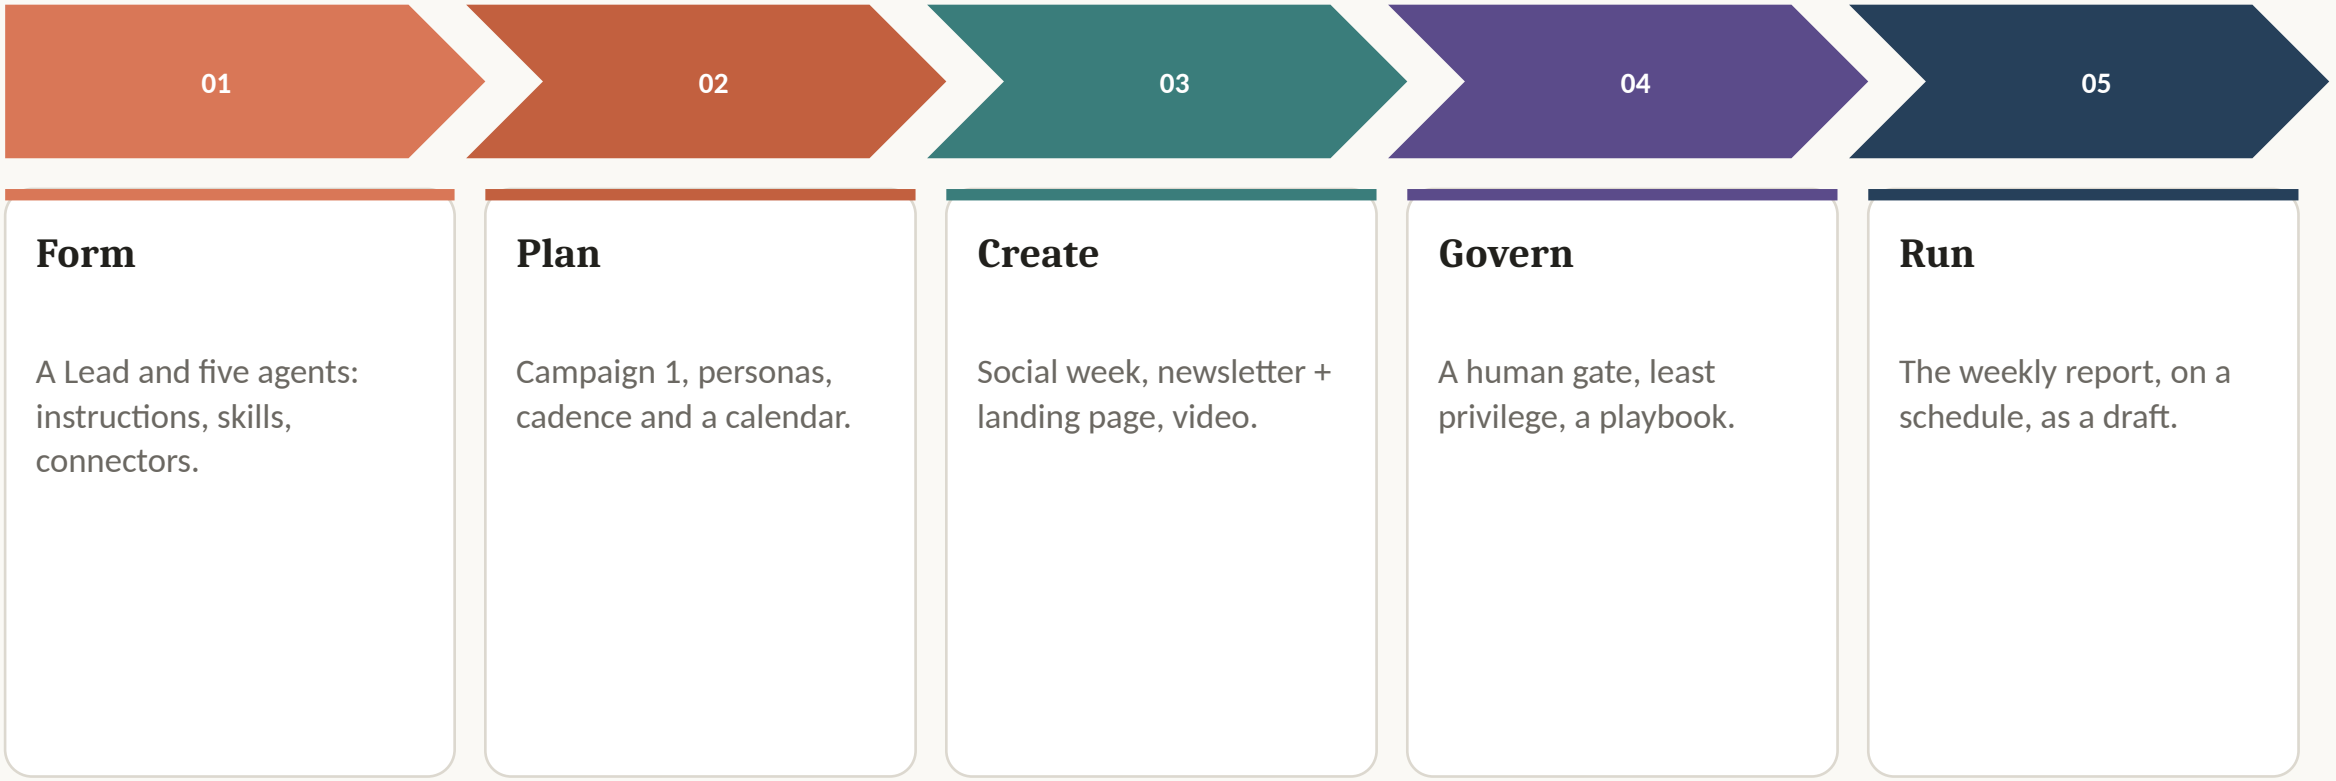

Who decides? You: the approval · the model: delegation and skills · the system, every time: hooks and the clock

LEARNING MANAGEMENT SYSTEM

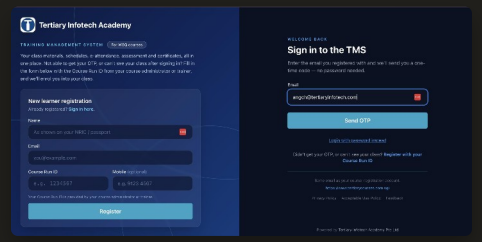

# Courseware & Assessment on the LMS

## Download the courseware

Get the slides and learner guide from the LMS for the open-book assessment.

## Take the assessment

Complete the Written Assessment and Practical Performance on the LMS.

## Log in

Use your enrolled account to access the course materials and assessment.

LMS: https://lms-tms.tertiaryinfotech.com/

© Tertiary Infotech Academy Pte Ltd

BEFORE YOU GO

# Certification & TRAQOM Survey

## TRAQOM Survey (Mandatory)

Complete the certification & TRAQOM survey to receive your certificate.

https://lms-tms.tertiaryinfotech.com/

## Digital Attendance

Remember to take AM, PM and Assessment digital attendance — required for your funding.

© Tertiary Infotech Academy Pte Ltd

ASSESSMENT

# Assessment & Funding

## Final Assessment

- Written Assessment (WA) — 1 hour, starts 4:00 PM
- Practical Performance (PP) — 1 hour
- Format: Open book — class ends 6:00 PM
- Allowed: slides, learner guide & approved materials only
- Appeal process available

## Criteria for Funding

**Minimum 75% attendance**

Based on SSG digital attendance records.

**Assessed as 'Competent'**

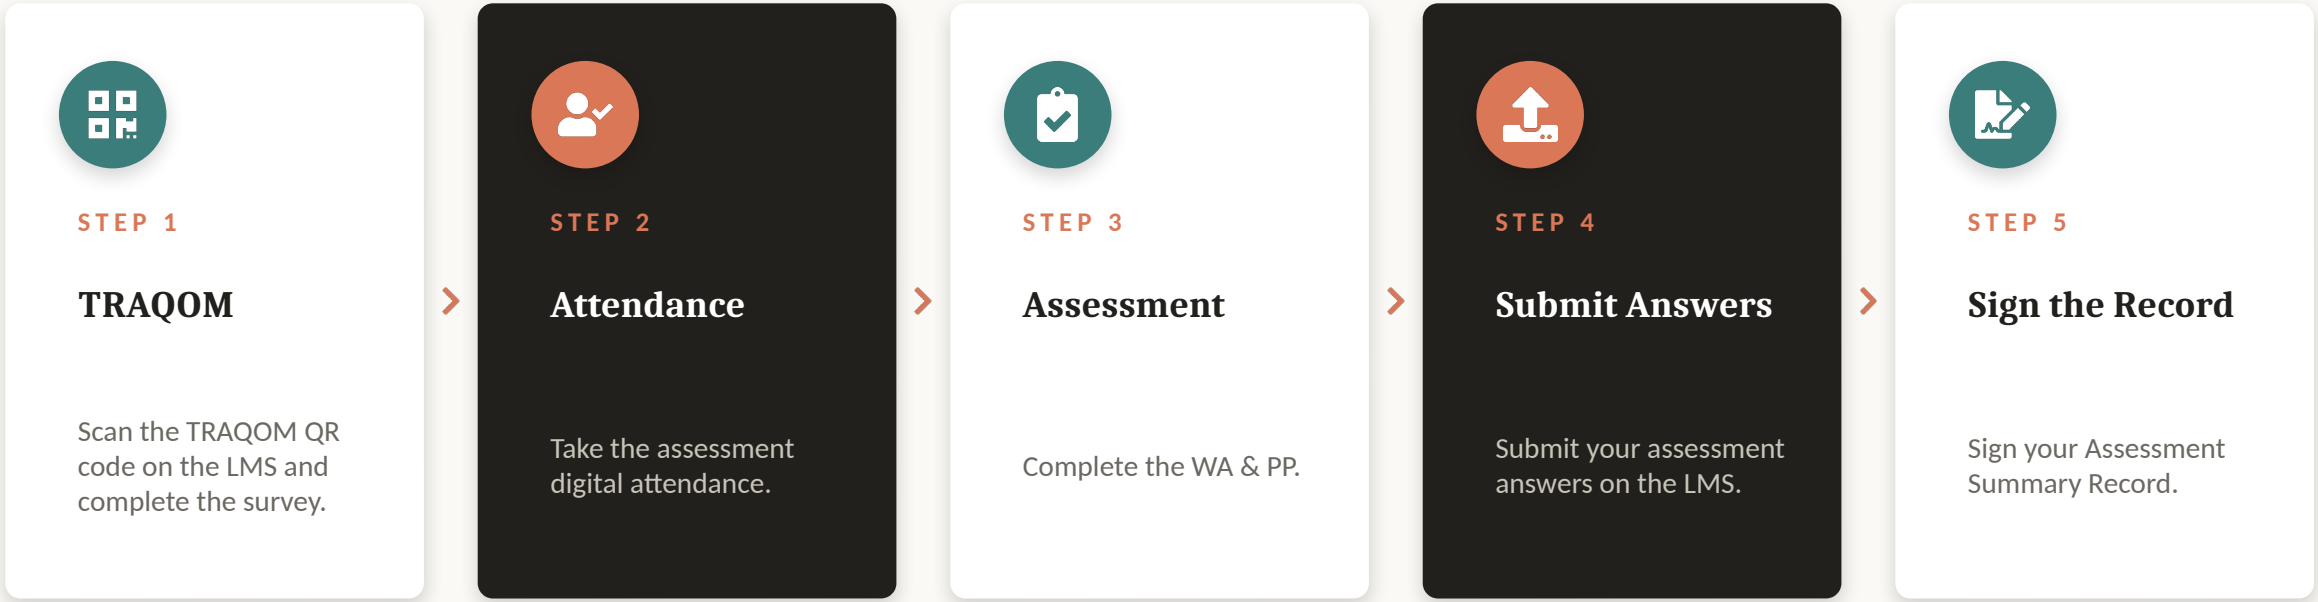

Complete and pass both assessment components.

© Tertiary Infotech Academy Pte Ltd

ASSESSMENT

# Assessment Flow

At the assessment stage, follow these five steps in order.

*TIP* *Courseware and the assessment are on the LMS: https://lms-tms.tertiaryinfotech.com/*

© Tertiary Infotech Academy Pte Ltd

HOUSEKEEPING

# Digital Attendance

**Attendance is mandatory for SSG funding.**

Take AM, PM and Assessment digital attendance for every session.

Use the SSG / TMS QR code provided by your trainer.

**Minimum 75% attendance required**
