

Prompts — Lab 01: Build Your Marketing Agent Team

Multi AI Agents Workflow for Content Creation (Claude Edition) · Day 1 · Use Claude Code

Use: Claude Code — Code mode (the `</>` button) in the Claude desktop app, in your horizon-studio folder. Paste each prompt as written; change only what the lab tells you to.

Easiest: copy each prompt from <https://tertiarycourses.github.io/TGS-2023036153-Multi-AI-Agents-Workflow-for-Content-Creation/prompts/claude/#lab-1> (one Copy button per prompt).

PROMPT A — Claude Code: plan your team

Act as a marketing consultant. Interview me, the owner of Horizon Wealth Planning, to plan my AI marketing team. Ask one question at a time and wait for my answer: my goal, what success looks like by March 2027, who we want to reach, which channels we use, how much we publish each week, and who approves before anything goes out. Then list 8 to 10 team members I could have, numbered, each with a one-line job. Include the six roles in data/team-charter.md and mark the ones you recommend. Wait for me to choose. Save my answers and my chosen team, with each member's job, to data/team-design.md. This is a plan only: do not create any agent files yet.

PROMPT B — Claude Code: the charter

Read data/team-charter.md, data/team-design.md and data/business-brief.md. Write CLAUDE.md for this studio in four sections – What this is, The team, Rules, Files – under 60 lines. The team is the one I chose in data/team-design.md. Rules: every number comes from data/facts-2026.md; every piece passes fact-check and fin-compliance; nothing is published or sent without a person's approval (the one exception: a review email to the approver); anything shown to me is in plain English for a business owner, with no codes, IDs, file names or line numbers. In Files, add two lines:

- Our copy of the site, which we edit: web/site/. "Start my website" runs scripts/serve-site.mjs in the background and opens `http://localhost:8080/`
- Every post links to `http://localhost:8080/` with UTM tags, never to a `claude.ai` artifact link.
